AMERICAN LINE TYPE BOOK

Borders, Ornaments

Price List Printing Material and Machinery

1906

American Type Founders Co.

To the Buying Printer

HIS American Line Type Book shows specimens of the latest and best in type designs; the faces popular with all leading advertisers and the large buyers of printing. One reason for the increasing demand for American Type—and which, by the way, makes it The Best Type—is the

fact that the designs are brought out in Families. One of the popular American Line Families is known as the Cheltenham Family, consisting of Cheltenham Oldstyle, Cheltenham Wide, Cheltenham Italic, Cheltenham Bold, Cheltenham Bold Italic, Cheltenham Bold Condensed, Cheltenham Bold Condensed Italic, and the latest addition, Cheltenham Outline.

Other notable American Type Families are the Century Expanded Series, Globe Gothics, Florentines, Copperplate Gothics, Alternate Gothics, Jensons, and the "Post" Family. Many of these are shown for the first time in this American Line Type Book.

In addition to the diversified range of type faces shown in this book, the printer will also find the most attractive line of Decorative Material ever presented. In Brass Rule the selection offered is the largest ever shown, both in plain faces and distinctive faces, which are unexcelled for advertising display.

Everything required for the most complete printing office outfit can be selected from the pages of this Type Book, and the price list of Wood Goods, Printing Material and Printing Machinery will be found an authentic Purchaser's Guide for Printers.

For a large selection of both plain and ornamental type faces not shown in this Specimen Book, printers are referred to the 1900 Desk Book, a copy of which was placed in every printing office in the country.

Job Type Fonts

RINTERS will please notice that in this American Line Type Book all Cap and Lower Case job fonts have been put up and priced separately. This will enable the printer to order an additional font of either Caps or Lower Case when extra characters are required. By ordering additional fonts of either Caps or Lower Case, the use and value of the font is permanently increased. The Job Fonts are all put up to best selected schemes, and the price of every font is based upon its exact pound rate.

Job Type by the Pound

¶ In fonts of 25 pounds and multiples up to 36 point, and above 36 point in 50 pounds and multiples, Job Type is sold by the pound at reduced prices, according to character of face and quantity ordered. Write our nearest Selling House for estimate.

Body Type Fonts

¶ The Body Type shown in this American Line Type Book is put up in packages as indicated by the following table:

FONT	CAPS		SM/ CA	ALL PS	POI	NTS	FIGU	IRES LOV	VER SE	SPA	CES	QU.	ADS
FONT lbs. o	oz.	lbe.	oz.	lbs.	oz.	lbs.	oz. lbs.	oz.	lbe.	oz.	lbs.	oz.	
25 lbs.	2	8	1	8	1	1	ı '	14	11	2	8	2	8
50 lbs.	, 5	•	1	8	2	2	2	29	6	5	I	5	į
100 lbs.	10		3		4	4	4	58	12	10		10	

¶ Printers desiring extra Caps for a 25-pound font can so order, in which case they will receive two and a half pounds of Caps; or, if desiring a larger quantity of Caps, can order Caps for a 50-pound font, in which case they will receive five pounds of Caps.

¶ The same rule applies to Small Caps, Points, Lower Case, and Spaces and Quads. We will supply packages of the weights given above, or any multiples thereof, of any of our Body Type fonts, at regular prices and without delay.

¶ References, Braces and Dashes, Leaders, Fractions and Commercial Marks are not put up with regular Body Type fonts, but if wanted must be ordered in about the following quantities or multiples thereof: References, one-half pound; Braces and Dashes, one pound; Leaders, three and five pounds; Fractions, one pound; Commercial Marks, one pound.

American Lining System

American Point Line American Point Body

American Point Set

Every face on Common Line will line at the bottom with all faces cast on the same body and line; and by using point leads each size will line with all other sizes cast on either Common, Title or Script Lines. This explanation also applies to Title and Script Lines.

The example on this page illustrates practically the 6, 8, 10, 12, 14, 18, 24, 30, 36, 48, 54, 60 and 72 Point sizes of Lining Jenson Condensed, aligned with point justification. To better illustrate the system, one-point brass rule was used in aligning the thirteen sizes—each fine line representing a one-point lead.

- American Common Line—the line common to the majority of faces.
- American TITLE LINE—includes type faces in cap fonts or with short descenders.
- III. American Script Line—embraces Script and other faces with long descenders.

The American Lining System is the perfection of the systems adopted by the foundries of this country. The value of the American Lining System is here exemplified in the use, without justification, of different type faces cast on the American Common Line—a feature that must commend itself to Printers for its simplicity and practical use.

WRITE FOR SPECIAL PRICES ON LARGER FONTS
All Sizes Larger than 18 Point at Job Type Rates

- ¶ Body Type is put up in fonts of 25, 50 and 100 pounds or some multiple of these weights.
- ¶ Italic for Body Type is put up in fonts of $2\frac{1}{2}$ pounds or multiples by regular scheme for 7 Point and smaller sizes. In 8 Point and larger sizes it is put up in fonts of 5 pounds or multiples by regular scheme. It is sold at Job Type rates, but is not included in fonts unless specially ordered.

Spaces and Quads in Job Fonts

Spaces and Quads are put up in Job Fonts at the following prices:

Per Pound 3 Point \$2 00 3½	Per Font 10 Point \$0 55 11 0 50 12 0 50 14 0 055 15 0 065	Per Font 32 Point \$0.75 36 \$0.085 40 \$0.95 42 \$0.95
Per Font \$1 20 5% 0 075 6 0 060 7 0 055 9 0 055	16	48

Spaces and Quads are also put up in assorted fonts of 5 pounds or multiples

Allowance for Old Type and Other Metals

- ¶ Old type (clean and unmixed with other metals), electrotypes, leads and brass, delivered at foundry free, will be taken at current prices in exchange for new type or printing material.
- ¶ Customers sending in old metal are requested to mark their names on all packages, and to forward by mail a shipping receipt or bill of lading, with the net weight of each kind of material, as soon as shipment is made. Compliance with this request will aid in identifying shipments and prevent errors. Ship as "old metal" to secure low freight rate.
- ¶ Special Notice.—Zinc plates, metal containing zinc, or type and other plates mixed with zinc plates, will not be received at any price. Type, electrotype plates, leads and brass must be packed separately as the value of each differs.

All faces of type shown in this book are cast on the American Line with the exception of Tiffany Text shown on page 40h which is cast on the original line to preserve the characteristic features of the design. Also the following Typewriter faces shown on pages 88a, 88b, 88c and 88d: Ribbon-Face Typewriter, 10 Point American, Yost, Standard, and Stenograf Typewriter—all of which are cast on their original line.

Gripper Margins	Table Showing Amount of Paper Required for
Imposition of Cuts and Tables	Any Job of from 50 to 5000 Copies 1156
Margins	Table Showing the Number of Staples to One
Press Points, uses of	Pound of Wire
Testing Margins	To Print Consecutive Numbers
Tests of Imposition 1157	Type Standards

Standard Sizes of Newspapers

This table of sizes is based upon the standard sizes of newspapers, with columns 13 12-point ems wide and 6-point column rules. The adoption of these sizes is advisable especially in starting newspapers or putting in new outfits, thereby gaining desirable uniformity.

Number of Columns and Pages	Standard Size of Paper	Size of Each Page	 Face Length of 6-pt. Col. Rules 	Length of Head Rules required
	INCHES	INCHES	INCHES	12 POINT
4-Column Quarto	22 x 30	8 11 x 14	13%	53½ ems
5-Column Quarto	26 x 40	11½ x 18	1784	67 ems
6-Column Quarto	30 x 44	13% x 20	19%	801 ₂ ems
7-Column Quarto	35×48	15% x 22	2184	94 ems
8-Column Quarto	40 x 52	17} x 24	2384	107½ ems
5-Column Folio	20 x 26	111/6 x 18	1784	67 ems
6-Column Folio	22 x 30	13% x 20	1944	$80\frac{1}{2}$ ems
7-Column Folio	24 x 35	15% x 22	2184	94 ems
8-Column Folio	26 x 40	17 18 x 24	23 ⁸ 4	$107\frac{1}{2}$ ems
9-Column Folio	28 x 44	$20\frac{1}{6} \times 26$	25%	121 ems

^{*} Length of column rules for first page determined by size of headings, or say about two inches shorter than full length

HAMILTON ON LEGAL RIGHTS

FTER all our doubts and our suspicions and speculations on the subject of government we must returnat last to an important truth, that when we have formed a constitution upon free principles, when we have given a proper

balance to the many different branches of administration, fixed the representation upon pure and equal principles, we may with safety furnish it with all the powers necessary to answer in the most ample manner the purposes of government. The great desiderata are a free representation and mutual checks. When these are obtained all our apprehensions of the extent of powers are unjust and imaginary. One branch of the legislature is to be elected by the people, by the same people who choose state representatives. Its members are to hold their office two years and then return to their constituents. Here the people govern. Here they act by their representatives. You have also a senate, constituted by your state legislatures, by men in whom you place the highest confidence, and forming another representative branch. Then again you have an executive magistrate created by the form of an executive magistrate created by the form of an election which merits universal admiration. In the form of this government and in the mode of legislation you find all the checks

to the blood of the murdered patriots who have gone before, that my conduct has been through all this peril and through all my purposes governed only by the convictions which I have uttered, and by no other view than that of the emancipation of my country from the superinhuman oppression under which she has so long and too patiently travailed; and that I confidently and assuredly hope that wild and chimerical as it may appear, there is still union and strength in Ireland to accomplish this noblest enterprise. Of this I speak with the confidence of intimate knowledge, and with the consolation that appertains to that confidence. Think not, my Lords, I say this for the petty gratification of giving you a transitory uneasiness; a man who never yet raised his voice to assert a lie will not hazard his character with posterity by asserting a falsehood on a subject so important to his country, and on an occasion like this. Yes, my Lords, a man who does not wish to have his epitaph written until his country is liberated will not leave a weapon in the power of enry, nor a pretence to impeach

CHARACTER AND EXTENT OF ALL CIVILIZATIONS DURING THE FABULOUS PERIOD OF GRECIAN HISTORY

HE world of fable, far back in the shadowy past of Grecian history, opens with a variety of strange legends of gods and goddesses who were anterior, as well as superior to the race of mortals. Chaos, Earth, Ocean and Heaven, Night, Sleep,

Dreams, and Time, personified, as well as Jupiter. Apollo, Neptune, Vulcan, Juno, Venus, and Minerva, are represented by the Grecian muse as marrying and intermarrying, and begetting sons and daughters, some, of god-like natures, and oth-

ers, mingling forms hu agency, and in a state of until destroyed, impris to obedience, by the ov of Jupiter, who finally over gods and men. G and still authenticated a to his gods, and which tive history of his race primitive history, exte a period of at least a th quent to the supposed f Argos, it is impossible furnishing a series of n names and events, res fictitious creations: an deeply seated in the na ings of the Greeks, a the moderns have as

philosophers they earl respectful and curious analysis, which has continued to divide the opinions of the learned to the present day. By some, the principle of semi-his-torical interpretation has been assumed; and by others the allegorical. The semi-historical inter-pretation, leaving out of the fabulous legend whatever is miraculous, highly colored, or extravagant, retains only a series of credible incidents: of which all that can be asserted is, that they may or may not be true—they may be matters of fact, or they may be plausible fiction. The allegorical interpretation represents the poetic legends as conveying to the early Greeks, religious, physical, and historical knowledge, under the veil of symbols and allegories. Doubtless both modes of interpretation are partially correct, and will apply to particular cases; but the semi-historical is nevert to the property of the semi-historical is nevert to the semi-historical is never to the semi-historical in the semi-historical is never to be a semi-historical in the semi-historical in t pretation represents the poetic legends as conve er to be adopted unless some collateral evidence

The propensity of the Greeks to personify natural powers and agents may be regarded both as the basis of their religion and their legendary history. And when Earth, Ocean, and Heaven personified are placed at the beginning of celestial beings it is not wonderful that rivers, fountains and other natural objects viewed as only rational existences should form the connecting link with humanity. Thus by a figure of speech, the tributary streams and fountains may be spoken of as the sons and daughters of Ocean; and when the latter was converted into a god, it required no great effort of the Greek imagination to select from his numerous progeny here and there one, like Inachus, whose

THE GREEK REVOLUTION

IN the year of 1481, Greece, the early and favored seat of art, science and literature, was conquered by the Turks after a fierce and bloody contest that lasted more than forty years. The Venetians, however, were not disposed to allow its new masters quiet possession of the country; and during the sixteenth and seventeenth centuries it was the theatre of most obstinate wars between them and the Turks that continued till 1718, when the Turks were confirmed in their conquest by treaty. Although the Turks and Greeks never became a single nation and the strained relation of conquerors and conquered never ceased, yet the Turkish rule was quietly submitted to until the year 1821, when, according to previous arrangements, on the 7th of March Alexander Ypsilanti, a Greek, and then major-general in the Russian army, proclaimed from Moldavia the independence of Greece at the same time giving assurance to his countrymen of the aid of Russia in the approaching contest. But the Russian emperor declined to inter-

of the plain of Argos was dry and barren. The word danos signifies dry.—whence perhaps the deriviation of the word Danai, often applied to the deriviation of the word Danai, often applied to the Greeks, meaning the people of the thirsty land of Argos. The personification of their name thus became a hero, Danaus. Again,—springs are the daughters of the earth, as they are called by the Arabs; the nymphs of the springs are therefore daughters of Danaus, that is, of the thirsty land; and, as a confirmation, in some degree, of this view of the legend, the names of four of the daughters of Danaus were the names of springs. One of the most important and widely disseminated of the classic legends of antiquity is that of the hero-god Hercules. At first view nothing can be more monstrous, more at variance with every principle of chronology, and more replete with contradic-tions than the barren legend of the adventures

a fire no king can smother, where British flint and Boston steel have clashed against each other. Old charters shrivel in its track, His Worship's bench has crumbled, it climbs and clasps the union-jack, its blazoned pomp is humbled, the flags go down on land and sea like corn before the reapers. So burned the fire that brewed the tea that Boston served her keepers. The waves that wrought a century's wreck have rolled o'er whig and tory; the Mohawks on the Dartmouth's deck still live in song and story; the waters in the rebel bay have kept the tea-leaf savor; our old North-Enders in their spray still taste a Hyson flavor; and Freedom's teacup still o'erflows with ever fresh libations, to cheat

of slumber all her foes and cheer akening nations! So happy while he tea is poured, so blest while ons are stirring, what martyr can pare with thee, the mother, wife or daughter, that night, instead f best Bohea, condemned to milk nd water! Ah, little dreams the iet dame who plies with rock and pindle the patient flax, how great ame yon little spark shall kindle. e lurid morning shall reveal a fire king can smother, where British int and Boston steel have clashed

against each other! Old charters shrivel in its track, and His Worship's bench has crumbled, it climbs and clasps the union-jack, its blazoned pomp is humbled, the flags go down on land and sea like corn before the reapers; so burned the fire that brewed the tea that Boston served her keepers. The waves that wrought a century's wreck have rolled o'er whig and tory; the Mohawks on the Dartmouth's deck still live in song and story; the waters in the rebel bay have kept the tea-leaf savor; our old North-Enders in their spray still taste a Hyson flavor; and Freedom's teacup still o'erflows with ever fresh libations, to cheat of slumber all her foes and cheer the wakening nations!

HOME GEOGRAPHY

25

How these Needs are Met.—The first hundred pages of this volume attempt to supply a foundation by treating first, such common things as soil, hills, valleys, industries, climate, and the government, which are part of every child's environment; and secondly other features, as the mountains, rivers, lakes, and ocean, which, though absent from many localities, are still very necessary as a preparation for later study. Definitions, however, are not relied upon for giving the child this extra knowledge but detailed descriptions and discussions instead. This by no means involves neglect of the child's environment from the time the unfamiliar matter is introduced.

Relationship to Mankind.—According to the definition of geography—which treats of the relations between man and the earth—a hill or a lake is worthy of mention only because it bears a relation to us, the men upon the earth; considered by itself it is not a part of geography. Each chapter which takes up one of the above subjects, either closes with the bearing of the given topic upon mankind or it deals with the human relationship throughout.

Earth as a Whole.—The most difficult portion of our task has been that which presents the earth as a whole. That a bird's-eye view should be given at a very early

period in the child's instruction is not bad. but it is not so easy in a limited space to support the principal facts with a sufficient detail to produce very bright pictures. The

things commonly included in the study, such for instance as the latitude and longitude, should be omitted. They have also found that many other minor subjects usually presented are comparatively irrelevant to the geographic

TEN POINT, OPENED WITH TWO POINT LEADS

every time experience alone, however, cannot offer a complete basis for the later study of geography, because no one locality presents all the features reguired. From this it happens that

gave as a foundation. Such conceptions are certainly necessary in the early part of geography; but mere definitions fail to produce vivid, ac-curate pictures. The average pupil the best books have contained some | who has pursued geography for a

TEN POINT NORWOOD ROMAN, SET SOLID

PRELUDE TO VOICES OF THE NIGHT

HENRY WADSWORTH LONGFELLOW

LEASANT it was, when woods were green, and winds were soft and low, to lie amid some sylvan scene, where, the long drooping boughs between, shadows dark and sunlight sheen alternate come and go; or where the denser grove receives no sunlight from above, but the dark foliage interweaves in one un-

broken roof of leaves, underneath whose sloping eaves the shadows hardly move. Beneath some patriarchal tree I lay upon the ground; his hoary arms uplifted he, and all the broad leaves over me clapped their little hands in glee, with one continuous sound, — a slumberous sound, a sound that brings the feelings of a dream, as of innumerable wings, as, when a bell no longer swings, faint the hollow murmur rings o'er meadow, lake, and stream. And dreams of that which cannot die, bright visions, came to me, as lapped in thought I used to lie, and gaze into the summer sky, where the sailing clouds went by, like ships upon the sea; dreams that the soul of youth engage ere Fancy has been quelled, old legends of the monkish page, traditions of the saint and sage, tales that have the rime of age, and chronicles of eld. And, loving still these quaint old themes, e'en in the city's throng I feel the freshness of the streams, that, crossed by shades and sunny gleams, water the green land of dreams, the holy land of song. Therefore, at Pentecost, which brings the Spring, clothed like a bride, when nestling buds unfold their wings, and bishop's caps have golden rings, musing upon many things, I sought the woodlands wide. The green trees whispered low and mild; it was a sound of joy! They were my playmates when a child, and rocked me in their arms so wild! Still they looked at me and smiled, as if I were a boy, and ever whispered, mild and low, "Come, be a child once more!" And waved their long arms to and fro, and beckoned

The progress of literature and the arts during the sixteenth century was greatly favored by the spirit of inquiry fostered by the Reformation, a spirit that extended far beyond religion, and pervaded, more or less, every form and feature of society. The literature of this period begins to be distinguished by the first dawnings of a bold, bad spirit of doubt, examination and originality. However, in the seventeenth century, when the

Correspondence School of Printing

Prospectus 1906

here is pleasure in printing for those who merely do the work. But to those who delve into its mysteries, there's inspiration Its difficulties are not exactly what they once were, but every little trouble overcome, and every bit of technique mastered adds to the fascination

And it is because we want them to enjoy a full measure of typographic perfection that we wish to get in closer touch with printers, so that we may carry them, step by step, through the various branches of the art, until they are fully capable in producing perfect work, from the artistic, mechanical and the technical standpoints With this end in view we have established the Correspondence School of Printing

Fortunately there is no study which can be more readily pursued by mail than printing. Forms can be sent by freight, proofs can be safely sent by mail at slight expense, and work can be easily and inexpensively submitted to our instructors for criticism, a trained corps of which are engaged for this special purpose

Our course consists of a thorough instruction through correspondence in

Getting the Work
Where, when and from whom

Getting Out the Work
How: with and without

Getting the Money
Attachments, and otherwise

The text-book, of course, which is included in the tuition price, is a handsome cloth-bound volume and is called "The Simple Life"

The Correspondence School of Printing is open to all upon payment of seventy-five cents, which price simply covers cost of book and a portion of postage and stationery

CREATING THE

THE CREDIT OF Art which perpetuates the achievements and histories of all the arts

and sciences has been most obstinately contested, cities having advanced several rival claims to the honor of the discovery.

Nevertheless this should not cause

6 Point 24 A \$1 00 48 a \$1 00 \$2 00 EXTRAORDINARY SURPRISE IF WE CONSIDER THAT THE INVENTOR OF NEW art, unprotected by law, would very naturally attempt the concealment of its processes for his own use and advantage. After due consideration, we agree with Isaiah Thomas in the opinion that the probabilities point to Laurentius as the first discoverer of the art of printing. He lived

8 Point 20 A \$1 00 48 a \$1 25 \$2 25 AT HAARLEM, WAS A MAN OF PROPERTY, AND APPEARS TO

AVE been engaged in printing books from wood blocks or plates, known to antiquaries as Block Books, in which the reading matter was illustrated by crude pictures. Fragments of works printed by him are still in existence. It was only natural that his thoughts should be led to the production of single types as a means of cheapening and facilitating his work. These were first made of wood and afterwards of tin. The date of his invention of separate types is given as about the year 1429. Many other dates have been stated,

10 Point 18 A \$1 15 40 a \$1 40 \$2 55 RANGING FROM ABOUT 1422 TO 1436. A SMALL PRIMER, IN OUR MIND, shows all the marks of the first attempt of an experimenter

in a new art. The necessity for employing men to assist in prosecuting the art led to the divulgement of the secret. Among these men, it is supposed, was John Gutenberg, Senior, who, after learning all the processes, returned to Mentz, his native place, and communicated the secret to his

12 Point 16 A \$1 25 37 a \$1 50 \$2 75 NEPHEW. A VERY INGENIOUS ARTIST OF STRASBURG, IT IS

In evidence that the latter, in connection with two partners, spent a considerable amount of money in some private experiments. These appear to have occupied several years, from 1436 to 1439, when a legal contest arose as to the rights

14 Point

14 A \$1 50 26 a \$1 50 \$3 00

OF ONE PARTNER WHOSE ZEALOUS

NERGIES had caused his death. The experiments were then renewed, and as

he needed money, Gutenberg procured an introduction to John Fust, a capitalist and money-lender, who seems to have been struck with the importance of the work, and who advanced a considerable sum

Proclamation

In accordance with ancient customs, sent down to posterity by illustrious forefathers, Thursday, the 10th day of November, has been set apart as a day of Thanksgiving.

Now, therefore, American Type Hounders Company hereby solemnly proclaims that, in order to morthily meet the demands of its customers, its storehouses have been filled to bursting with the essentials to procure money for the feast.

On that day of days may the members of its great and growing family of printers unite in rendering thanks, eat, drink and be merry, and enjoy the festival royally.

Given at each salesroom throughout the United States.

LETTERS ARE the manuscript from

fifth century to about

the close of the twelfth, when what are called Gothic letters, afterwards Old English, came into gradual use

These were in continued use

6 Point 22 A \$0 90 44 a \$1 10 \$2 00 THESE WERE SUPERSEDED BY THE ROMAN CHARACTER OF PRINTING BLACK letters were used in printing down to 1465, when Sweinheim & Pannartz, in Subiaco near Rome, who produced a volume entitled Lactantius in a character approaching almost the actual forms of our modern types, and also made an improved set of modern

20 A \$1 00 40 a \$1 25 \$2 25 8 Point CHARACTER AND HE PRINTED ABOUT FORTY VOLUMES THE

FIVE years following. About the year 1469 John of Spires, in Venice, made wonderful advance in improving the form of Roman character and printed the Natural History of Pliny: the execution of this work is very remarkable. But Nicholas Jenson may very fairly be considered the father of the Roman letter now in vogue. He printed in Venice eight works in the year 1470, the first of which Eusebii Praeparatio Novorum, in types which were cut by him, more perfect in form than those 10 Point 16 A \$1 10 35 a \$1 40 \$2 50 ALDO MANUCCIO, BORN IN THE CITY OF BASSANO, SUCCEEDED

NICHOLAS JENSON at the noted city of Venice and turned to a good account the latter's admirable fonts of type. He also made many advances in the art of printing, the most notable of which is the invention of the style of type now known as Italic. It was said to be founded on the handwriting of the famous Petrarch, whom it closely imitates

15 A \$1 15 34 a \$1 60 \$2 75 12 Point ITALIC WAS LARGELY USED TO DISTINGUISH SUCH PART

Of a book as might be considered appendages, as Prefaces, Introductions and Annotations, etc., all of which were formerly printed in this character. It was very appropriately used to distinguish the head or the subject

Meriontype Series in Circular Work

HESE beautiful letters were made originally for the Ladies' Home Journal by the American Type Founders Co., from drawings by Wm. Martin Johnson. The requirements called for a composite modernization of popular oldstyle faces, retaining all of their desirable features, while eliminating those proven undesirable. It was further stipulated that the Meriontype letters must be interusable with the letters of the Bulfinch, or sister series. With the single exception of this last, the fulfilment of the requirements is plainly evident. The feature of interuse is the more valuable simply because of its

evident. The feature of interuse is the more valuable simply because of its being nonevident. And yet the two faces are in no sense identical. There has been sent to printers about 50,000 copies of Meriontype specimens and a like number of Bulfinch specimens. Over 1,000,000 copies of Meriontype and Bulfinch specimens are sent out each month in the Ladies' Home Journal, for which these types were specifically cast. Examine any issue of the Ladies' Home Journal for a beautiful, practical showing of Meriontype and Bulfinch, handsomely arranged and printed, and you will appreciate their many merits

GROVERS SPRING EUROPEAN TRIPS

Cost, Including Every Expense \$1260

This Company has completed arrange ments for a series of Around the Globe trips or cruises, by the superb steamers Jules Verne and Princess Maud, and a detailed description of these ships, as well as outlines of the trips from start to finish, can be had on application to Agents of the Company. The itinerary of these cruises embraces every known country in the civilized world, while there are many side trips provided for, thus making a complete circuit of the globe

SIX DAYS IN LONDON FORTNIGHT IN ROME

These Around the Globe cruises afford an unusual opportunity for instructors and men of affairs to gain practical information of life and customs of foreign lands and also furnish many exciting incidents that should impress the travelers' minds with charming and delightful memories

Regular Monthly Sailings are made from New Haven to places of interest along the Mediterranean Sea, affording ample time for sight-seeing at all principal points in Europe and the Orient. Numerous enjoyable side trips are provided for in this service. This is one of the most delightful cruises in the series, and is an excellent trip for those desiring to tour both the Continents. All the noted ports in the various groups of islands in South America are visited, including a stop at San Salvador. Length of voyage, 90 days. Number of miles traveled by water, 18,970

REPUTATION IS MORE READILY MADE BY THE
USE OF NEW AND ATTRACTIVE TYPE DESIGNS

Than by any attempted new use of old faces. Reputation is of value in the printing business as it means the obtaining of important work at non-competitive prices. The type which is now new and is becoming exceedingly popular is

which is now new, and is becoming exceedingly popular is the Tabard Series. The use of this type in conjunction with the Tabard Borders ensures a most effective departure from the beaten tracks. Many of the larger printing houses throughout the country are now recognizing the importance of having all the latest types, borders and ornaments to meet an increasing demand from a discriminating patronage for the latest and beat things in printing fashions. The American Type Founders Company produces each year more original type or border designs than all other foundries.

DECORATING THE HOME AND MAKING THINGS BEAUTIFUL

It is the frame, the setting and the background, call it what you will, that creates the atmosphere of the home. To be distinct, it is the walls, floors and windows, and the manner in which they are treated that brings comfort and refinement orthe reverse. The harmony of color, beauty of proportion and consist-ency of furnishing; these are the things that give an indefinable air to a home; a charm, the reason for which we don't stop to analyze, but the absence of which, people of good taste very quickly detect. To have a beautiful and comfortable home of one's own ought to be the ambition of every sensible individual of mature age: and how to make that home as beautiful as one's purse will permit is an art in which every one should be interested. House decoration is an art that requires study. No matter how good your taste or your judgment: no matter how keen your eye for color or your brain to plan you cannot keep fully informed as to what is going on in the world of manufactures. There There is where the decorator is needed.

Concerning Mythology

EAVEN prosper all our good purposes, and give virtue to put them in execution! Be not offended at my well-meant wish: one of your former favorites, whose fellow all antiquity you are sure had never produced, says an old thing prettily. At the birth of Venus, or Beauty, the Gods held a grand

feast; to which among all the other deities came Plenty, the son of Foresight; and, as is usual on such occasions, Poverty came likewise a-begging, and hung on about the door. Towards the end of the entertainment, Plenty being intoxicated with nectar, for there was yet no wine, went into the garden of Jove, and oppressed with the celestial liquor sunk down in sleep. Poverty spied him in this plight. Cupid, in first place, like his mother, is perpetually in want: and far from being beautiful or blooming, as most people imagine, he is eager, ravenous and rough; wandering about barefoot, without house or habitation; sleeping before doors, or by the wayside under the open sky, and constantly accompanied with

NOTE Could any body, do you imagine, take it into his head after reading this allusion, that the author of it actually believed the little fluttering thing he has so exginitely described to be a real divine person, and would worship him accordingly as a God? One should think not: especially as this very parable has been taken for an argument of his unbelief of the whole train of his national divinities, whom he reverenced in obedience to the laws of his country, and professed himself incapable of explaining their natures and mystical generation. Or, on the other hand, would it not be as absert to say, that it had no meaning at all? It must be a strange turn of mind that could lead to either: for to believe it literally, or to condemn it for want of ingenuity, are engally preposterous.

to the ingenious Physiognomist who tells us That the chief indications of men's dispositions are to be found in their countenances and center particularly in their looks, even their very souls appearing through their eyes to an intelligent spectator, as through the gates and avenues of the mind: and that a set, simple look, for example, little moist eyes, moving eye-brows and softened features, are signs of a man being contemplative, thoughtful and given to learning, and particularly the belles-lettres. Again, that a dark, humid eye, open and frequently fixed, is a sign of thought and perception; but if it likewise looks mild and benign, it further betokens worth and ingenuity; for such, says he, was the eye and looks of the wise and worthy Socrates. Perhaps you will hold yourself a better judge of the following aspects, which he describes much to the same purpose. Byes says he, standing frequently open, without winking, looking gentle and humane, swimming in a transparent fluid, show the person to be contemplative, a lover of knowledge,

QUANTITIES OF SNOW HAD FALLEN DURING THE NIGHT TIME, BUT IT LAY LIGHT AND UNDRIFTED

WE went as far as the train would carry us to the camp in the very heart of the woods. Here the choppers numbered about fifty. They were not making a clean sweep of the forest, but only taking out the spruce and pine, so that they left woodland behind, though thinned and devastated. A well-worn road led back from Hardington's camp into the woods and I followed it for about half a mile until I found the choppers who were busily engaged in getting the many large trees that had been cut trimmed up and ready to be hauled out to the train and taken down to the immense sawmills in Bangor

Considerable snow had fallen during the day, and it lay light and undrifted but did not materially stop the progress of the horses, although they panted heavily in ascending some of the very steep hills few of the passengers had cared to ride outside when they were traveling through the woodland

THE POOR PRINTING

IS A GREAT BENEFIT

to the chap who does good printing, for all work is either good or bad, by comparison, and the greater the comparison, the more extreme the goodness or the badness. The goodness of printing is not altogether dependent upon the material employed, but when that material is poor the product will come pretty near being the same. Good material and modern machinery as supplied by American Type Founders Company costs no more than other kinds

Tis up

to you

as the type that cannot be made to look badly costs no more than that which it is most

exceeding difficult to make look good! And, again, type that is in itself effective can be made much more effective by skillful handling. Printing produced from such type is good anyway, and classes you among the good printers! So much assumed (and it is assured), it would not seem improbable that a classification among the modern printers was obtainable. The Lining Elzevir Gothic is a great coverer; it covers a multitude of different classes of printing: book work, job work, newspaper work, in all of which it can be utilized with good results. It will also be observed that it is built for hard work

AMERICAN TYPE FOUNDERS COMPANY

MODERN PRINTING MATERIAL FOR MODERN PRINTERS

affect every organ and function and bring about such a low physical condition that it is the predisposing cause of most of the evil diseases afflicting humanity; catarrh, dyspepsia, rheumatism, and a long train of ailments that come under the head of general debility. It is the

source of scrofula, boils, itch, eczema, eruptions, responsible for white-swelling, hip-diseases and many other malformations

AMERICAN TYPE FOUNDERS COMPANY

TYPE STYLES

R. U. A. Printer,
Located Anywhere.
Dear Sir:-

The American Type Founders Company is the leading merchant in Printing Machinery and Printer's Supplies, and as such its policy is to offer only such manufactures as are standard and of superior value to the printer. To give the longest and most satisfactory service in proportion to the selling price of an article is the best evidence of superior value, and by this standard the Machinery and Materials which it handles have been selected.

As the productions of the American Type Founders Company are the admitted standard of excellence throughout the world, due regard for the reputation of its own productions will not permit it to recommend anything that is not the best procurable in its class.

In the line of type faces to enable the printer to handle orders for imitation typewritten letters, the American Type Founders Company is the acknowledged leader. In this American Line Type Book will be found specimens of such type faces, matching the work of leading makes of typewriting machines. A specialty has also been made of Reproducing Typewriter faces, to meet the constantly increasing demand for facsimile letters in reduced size.

AMERICAN TYPE FOUNDERS COMPANY.

AMERICAN TYPE FOUNDERS COMPANY

AMERICAN TYPE STYLES LEAD THE WORLD SELLING HOUSES LOCATED IN

To the Appreciative Printer,
Here and Elsewhere.
Dear Sir:-

Lining Smith-Premier Typewriter No. 2 is a close reproduction of work done on the machine, and this face will therefore commend itself to the Printer who secures orders for imitation typewritten letters requiring this particular face.

There is a constantly increasing demand for the printing of imitation typewritten letters, and in all the leading cities wide-awake printers are taking advantage of this and increasing their facilities for doing this work.

Imitation Typewriter Inks--Purple, Blue, Black, Green and Red--are shown in the Specimen Book of Printing Inks recently issued by the American Type Founders Company. If you have not a copy of this, write the nearest Selling House.

Fac-simile letters are more extensively used in business each year, and the printer who develops this specialty is wise in his day. The accurately reproduced typewriter faces offered by the American Type Founders Company, in such liberal variety, are proving a great help to the craft.

A foundry, principally for German type, was established at Germantown, Pennsylvania, about the year 1735, by Christopher Saur, or Sower, a printer, who executed in German the first quarto Bible printed in America, as well as other valuable books in the German language. Three editions of the Bible were printed—viz., in the years 1743, 1763 and 1776, the latter two by his son. In 1739 Saur published a newspaper in Germantown.

An abortive attempt was made about 1768 to set up a foundry at Boston by a Mr. Mitchelson from Scotland, and another in Connecticut in 1679 by Abel Buel. In 1775, Dr. Franklin brought from Europe to Philadelphia the materials for a foundry; but little use of them was made.

John Baine, a type founder of Edinburgh, sent a relative to this country with tools for a foundry at the close of the Revolutionary war, and soon after came over himself. They carried on the business till 1790, when Mr. Baine died, and his kinsman returned to Scotland.

A Dutch founder, Adam G. Mappa, settled at New York about 1787, and cast Dutch and German faces, as well as Roman styles and several Oriental alphabets. Want of capital prevented his success, and many of

18 A \$1 15 65 a \$2 35 \$3 50 Justifiers in 1 and 5 lb. fonts at 52 cts. per lb.

Mr. Typograph, how are you, sir? Glad to see you. How is business with you? Plenty to do, and customers paying up? You are so prompt in paying us that we have no doubt you have a noble set of customers. You wish to add to your stock our new things? All right, sir. You have a fine office already, but you want to keep up with the times and give your patrons the best the type founder can invent. That's the way, sir. The man on the lookout sees the sun the earliest. Mr. Faithful, show our new things to Mr. Typograph, and take his order.

You say, Mr. Typograph, that you have never gone over a type foundry? We shall be happy to show you everything. This way, sir. This is the metal house. These piles of dull lead, these casks of sparkling antimony, this copper, and this tin go to form the grand amalgam of which type is made. The worthy and kind-hearted man who is stirring at the kettle, unites, in bonds

10 Point

15 A \$1 20 52 a \$2 30 \$3 50 Justifiers in 1 and 5 lb, fonts at 46 cts. per lb.

To cast off manuscript with accuracy and precision is a task which requires great attention and mature deliberation. The trouble and difficulty are much increased when the copy is not only irregularly written (which is generally the case), but also abounds with interlineations, erasures and variations in the size of paper. At times, so numerous are the alterations and additions as to baffle the skill and judgment of the most experienced calculators of copy. Such an imperfect and slovenly mode of sending works to the press cannot be too strongly censured.

American Type Founders Company

Maker of All Leading Faces TYPEWRITER TYPE

Leader in Type Styles

To the Advertising Printer,

Looking for Profit.

Dear Sir: This is a specimen of our new 6 Point American Typewriter, which has been cut to meet the requirements for a small size Typewriter face for use in reproducing typewritten letters where the space is limited. There is a constantly increasing demand for printing of this character on the part of large manufacturers and merchants who are desirous of reproducing for advertising purposes fac-simile copies, in reduced form, of business correspondence.

The 6 Point American Typewriter is put up in job fonts of usable size, and the fonts of Caps and Lower Case are put up separately (in accordance with our usual custom), and consequently printers can order additional fonts of Lower Case or Caps as may be required in order to strengthen their font for a special purpose.

Many offices are developing an almost independent business along these lines of Imitation Typewritten Letters and the reproduction of fac-simile letters in reduced form, and find it extremely profitable. Would not a personal canvass among the leading manufacturers and merchants in your own locality prove exceedingly requestrive to you? But a small outlay is needed for a supply of Typewriter Type in order to enable you to successfully enter this field.

The American Type Founders Company makes a very complete line of Typewriter Type in faces which match the work of leading machines. And these faces have been cut for use in printing through silk (which gives the closest imitation of a regular typewritten letter), and also the regular faces, which do not require any special appliances but are designed for printing direct with the ordinary printing ink.

Then there is the Ribbon-Face Typewriter (specimens of which will be found on page 88b) also used for printing in the regular way, without any silk attachment and which gives a marvelous reproduction of the typewritten effect, making it difficult to distinguish the result from the work of a regular typewriting machine. Better results are obtained with the Ribbon-Face Typewriter Type by using the Record Ink prepared especially for use with this type and sold by all Selling Houses of the Company.

Instructions for use of New Model Typewriter faces, designed for printing through silk, are given on preceding pages. We can supply all requirements for necessary material, also typewriter ribbons exactly matching the shade and color of ink used in printing the body of the letter, these ribbons being designed for use on the machines in filling in the names and addresses.

Justifiers in 1 and 5 lb. fonts at 64 cts. per lb.

AMERICAN Type Founders Company EVERYWHERE

Mr. Printerman,

Everywhere.

Dear Sir :-

This face of 10 Point American Typewriter is extensively used by successful printers in the production of Imitation Typewritten Letters by the process of printing through silk. We furnish the regular Process Inks and the Typewriter Ribbons to match for this work. Also adapted for use as a regular typewriter face in the ordinary way.

Fac-simile letters are more extensively used in business each year, and the printer who develops this specialty is wise in his day. The accurately reproduced typewriter faces offered by the American Type Founders Company, in such liberal variety, are proving a great help to the craft.

One of the best faces for fac-simile work is our American Typewriter, 10 point body, of which this is a sample, each color printed direct from type, on a platen press, the same as any other printing would be done. Used also for printing through silk.

Ten Point American Typewriter may be obtained from the nearest house of the American Type Founders Company. Printers are invited to study the merits and possibilities of this face—a most desirable size for the facsimile letters needed by professional men, clubs, libraries and similar sources of new customers.

TYPE

TO THE MASTER PRINTER:

In All Lands.

Dear Sir:-

The American Type Founders Company expends more each year than all other type founders in the world in producing new types and showing them attractively. With its immense business and great facilities it can afford to do this as no other founder can.

It will cost no more to buy American type than it will to buy inferior designs or imitations. We are sending you continuously beautiful Specimens showing our new types, borders and ornaments. Not only in this rapidly enlarging our business, but if our material is used effectively it will largely increase your business.

Your customers can be induced to order a vastly increased amount of printing if you show them how they can increase their trade by having you furnish them with up-to-date styles in printing.

The experiment is worth your trial; it will pay you a big percent. on your investment--many times the legal rate.

Our interest is your interest, and your interest is our interest. If you order some of our latest type, borders and ornaments now, you will get profitable results.

<u>የ</u>ዋዋዋዋዋዋዋዋዋዋዋ

OT listed with the few are the printing offices that contain what might truthfully be called Miscellaneous Collections of Accidental Initials. In a few instances the letter required is found to meet the requirements. Much better is this Missal Series

************* ARK that, Series! Every letter and in seven sizes made just like any other type and is cast on the square of its body, filling same with-out any shoulder. Used with any face in book or job work

TARRAR BARARARA

HOWN in combination with Cloister Blath, Chekenham Oldayle, and this, the Meriontype. The Missai Initial Series is fully as useful in the modern printing office as any requisite that has served to build up the modern office. In short, Missai Initials are Modern Requisites

Dissal Initials

Telps Orinter

Bulfinch Attractors

A series of pictures for attracting the eye and for exciting interest. Usable as illustrations in connection with catchy phrases, a million or more of which are applicable

Chap-Book Directors

A series of indexes, or fists, in every required size and of several striking patterns. In the field which they are intended to cover, they are decidedly "it"

Clemish Borders

Usable in many classes of work, but are particularly adapted to ecclesiastical printing, show cards, catalogue covers, etc. Made in three sizes and five patterns

Mandsome Type Faces

Look through this book, and one cannot but wonder why printers are not more successful, for the secrets of success are herein disclosed

Cloister Black

The First Empire Founding of Babylon the primal great government of human origin was the Baby lonian empire. One hundred and fifteen years after the flood, Nim rod, son of Cush and great-grand son of Noah, entered into the land of Shinar on the River Euphrates surrounded the great tower Babel with walls and settled therein with his associates and followers, thus founding a city which was named Ba-bel-on or Babylon, first city in the world's history. After found ing of Babylon he went north into the country of Assyria and found ed a city on the bank of the Tigris which he called Nineveh, in honor of his son Ninus. I Nimrod is rep resented as "mighty hunter before the Lord," and is supposed to have engaged in arduous work of hunt ing with two great objects in view

Book of St. Luke

Continuation of the Sixth Chapter

- 22 Blessed are ye, when men shall hate you, and when they shall separate you from their company, and shall reproach you, and cast out your name as evil, for the Son of man's sake.
- 23 Rejoice ye in that day, and leap for joy: for, behold, your reward is great in heaben: for in the like manner did their fathers unto the prophets.
- 24 But woe unto you that are rich! for ye have received your consolation.
- 25 Woe unto you that are full! for ye shall hunger. Woe unto you that laugh now! for ye shall mourn and weep.
- 26 Woe unto you, when all men shall speak well of you! for so did their fathers to the false prophets.
- 27 But I say unto you which hear, Love your enemies, do good to them which hate you.
- 28 Bless them that curse you, and pray for them which despitefully use you.
- 29 And unto him that smiteth thee on the one cheek offer also the other; and him that taketh away thy cloak forbid not to take thy coat also.

- 30 Give to every manthat asketh of thee; and of him that taketh away thy goods ask them not again.
- 31 And as ye would that men should do to you, do ye also to them likewise.
- 32 For if ye love them which love you, what thank have ye? for sinners also love those that love them.
- 33 And if ye do good to them which do good to you, what thank have ye? for sinners also do even the same.
- 34 And if ye lend to them of whom ye hope to receive, what thank have ye? for sinners also lend to sinners, to receive as much again.
- 35 But love ye your enemies, and do good, and lend, hoping for nothing again; and your reward shall be great, and ye shall be the children of the Highest: for he is kind unto the unthankful and to the evil.
- 36 Be pe therefore merciful, as pour Pather also is merciful.
- 37 Judge not, and ye shall not be judged: condemn not, and ye shall not be condemned: forgive, and ye shall be forgiven.

hin ware in a product of hard are. The aim is not only to produce beautiful form, vec-oration and color, but by the high temperature reached to give to the Beab glaze a texture and a quality nelvom cound outnive the aucient Chinene potn. Dull pellown, bluen, browns, greens, pinks, graps and blacks, in many shades and barie-ties of effect, represent the widest range in color. Human, Hower and animal forms are used in Decoration. Bele beliebe it better to bring out a limited edition of a beautiful and carefully thought out benign, varying in each piece the color and glaze effect, than to neek and execute hasting a new venign for each piece. A extalogue, for which we are often anked, would be unaxin-factory, for each piece in taken up and the price made according to the individual value. Shin description will also give an iven of what we are voing in tiles suitable for fireplaces and interior Decorations.

OR years these Tudor Black let= ters bave been in conspicuous service in nearly every print= ing office in the land; tbey are today more popular than before. Their areat leaibility and their graceful and dignified sbapes make them preferred in all places where the less easily read old Black Letter would be un= satisfactory. Tudor Black is a standard fashion in type, and all printers wbo use it will unbesitatingly testify to its service= ableness. The small expense of a big font makes of the series a peculiarly useful one

A HAPPY FACE IS A FACE THAT GIVES JOY, AND THE CHELTENHAM—SO APT, SO FITTING—IS THIS KIND

T is undoubtedly the most popular type face

that has been brought out in recent years. Judging by the satisfaction with which it was received the design was a most fortunate one, and it came at an opportune time measured by the demand which immediately sprang up. Scarcely had the American Type Founders Company finished the fourteen sizes in the Cheltenham Oldstyle series when requests came for an Italic series to go with it. The present series of Cheltenham Italic was the result. Its introduction met with an immediate success, and orders came in from the largest publishers and job printing offices, until now it is hardly possible to pick up a publication of any merit without a showing of the complete series of both the Cheltenham Oldstyle and the Cheltenham Italic being prominently displayed therein. still further demand necessitated designing the other Cheltenhams shown on following pages. 'In fact, many among the most prominent advertisers in the country have requested that this face be the one used to display their matter as it so fittingly challenges the eye of the reading public. The distinguished character of the Cheltenham family is so pronounced that the first glance reveals a design of decidedly unusual character that shows qualities never before attained in any other type face. It is in a class by itself. cutting the other Cheltenhams to complement the Cheltenham Oldstule the same lines that gave distinction to the first series were followed, and all have been as satisfactory as the original one. The Cheltenham family has been the type sen-

sation of the year, and their necessity in every properly equipped printing plant is quite apparent

The Largest Type Family Ever Brought Out

-and it is still growing

Cheltenham Family

HE Cheltenham Family is notable in the Printing World—the largest and most complete series embodying the family idea ever brought out. Wherever type is used to convey a message, there you will find the Cheltenham in favor. ¶ Cheltenham Oldstyle was the original member of the family, and was

instantly adopted as the favorite here and introduced into foreign foundries under special arrangements.

¶ Very shortly Miss Cheltenham Italic was presented, and her dainty form and graceful outline appealed to the eye of all.

¶ Next came the lusty twins, Master Cheltenham Bold and Miss Cheltenham Bold Italic, and their strength made direct appeal to discriminating publishers and large advertisers.

¶ Master Cheltenham Bold Condensed was the next member, and a candidate for printorial honors which met with the same reception accorded his two predecessors.

¶ Now comes his Tom-Boy sister, Miss Cheltenham Bold Condensed Italic, as like Sir Bold Condensed as two peas in a pod. And what a team for Commercial Printing and all forms of Advertising Display—two winners!

¶ And Sir Cheltenham Wide—how like the founder of the Family—a trifle extended in the Lower Case features, to fit this member for usefulness where the requirements so often demand a more extended face than the regular Cheltenham. The Caps of Cheltenham Oldstyle are used with this letter.

Miss Cheltenham Bold Outline—who may withstand the winsome features of this later addition to the Family-useful, distinctive and altogether adapted for either plain or two-color printing! The Outline registers with the Cheltenham Bold and has been cut for use with that face as a two-color letter.

THE FLORENTINE BOLD

The Most Useful Series Ever Made

Nothing that has as yet been designed for the printerman fills such a variety of purposes as the Florentine Bold series; it is alike useful to the newspaper and job man. As an adtype it has no equal, while for newspaper heads it is well nigh indispensable. Its usefulness in the job room has been clearly shown herein

CATTLE PERISH

Rivers Over Their Banks From Disastrous Cloudburst

A heavy rain has fallen over many Northern states and considerable damage has been done. The Brazos River at Byran is rising at the rate of a foot an hour. With the rains along the lower river last night and today, the expectation is that the river will go over its banks at noon tomorrow below Byran and indications appear now that the flood will exceed that of 1899, the highest known. At points below Byran the river is rising fast. About half of Harisburg is today under water

TYPE DESIGN AN IMPORTANT PACTOR

There ComeTimes When Every Man in Business Stops and does a little of good hard thinking

Lining Florentine Oldstyle No. 502

IANY old historians contend that the artofprintingwas introduced and first prac ticed in England by Cax ton, who, by his travels abroad and residence of many years in other countries, in the affairs of trade, had an oppor tunity of informing him self of the method and process of the art. By the encouragement of the Abbot of Westmin ster, first set a press in the Abbey, and began to print books from it after the year 1471. But the appearance of a book bear**in**g an earlier date took from Caxton the glory of being the first to introduce printing in England.

HELEN OF TYRE

What phantom is this that appears
Through the purple mist of the vears,
Itself but a mist like these?
A woman of cloud and of fire;
It is she: It is Helen of Tyre,
The town in the midst of the seas.
O Tyre! in thy crowded streets
The phantom appears and retreats,
And the Israelites that sell
Thy illies and ilons of brass,
Look up as they see her pass,
And murmur "Jezebel!"

Then another phantom is seen
At her side, in a gray gabordine,
With beard that floats to his waist;
It is Simon Magus, the Seer;
He speaks, and she pauses to hear
The word he utters in haste,

He says: "From this evil fame,
From this life of sorrow and shame,
I will take and make thee mine;
Thou hast been Queen Candace,
And Helen of Troy, and shalt be
The intelligence Dwine!"

Oh, sweet as the breath of morn,
To the fallen and forlom
Are whispered words of praise,
For the famished heart believes
The falsehood that tempts and deceives,
And the promise that betrays.

Failure Impossible

If design, workmanship, price—and last, but not by any means least—the type faces are up-to-date. The successful printer of today is the one who is ever on the lookout for new methods of attracting the attention of prospective customers, and once having them, by prompt and efficient service holding them. Obsolete type should be discarded, as it only takes up valuable space, and its place can easily be filled by a carefully selected assortment of appropriate series of American Line Type made only by

ADVERTISING THAT ADVERTISES

is the sort desired by persons seeking publicity for their wares. When buying anything you go to the place which has a reputation of affording the best. Anyone can buy space and fill it. But everybody cannot buy space with discrimination.

Advertising agents are primarily for this purpose, and those agencies are the most dependable which have the largest clientele of successful advertisers.

In This Respect We Lead

We make plans, write advertisements, booklets and follow-up letters free of all charge for those whose advertising we place, and for others at reasonable rates

per to which the had as a helpful scuss the general of flowers briefly several historical which ultimately rwin's revelation d as the mystery long been hidden th the forms and in the same style have presented it our common wild has a peculiarity t evolved devices rose-fertilization Prior to this time the flower was as in the wilderness aintest whispers he was one of the ey have bloomed r color and more ictates of science

brought us their message. Demoralizing as it certainly was to humanity's former ideals, philosophic, theologic and poetic, it bore the spirit of an absolute conviction and must be heard as it will convince you. What a contrast this winged botany of our day is to that of a hundred years ago! The flower, no longer is the non-committal, structural, botanical specimen only. It is no longer the example of mere arbitrary independent creation, reverently and solely referred to as the one orthodox delight of man. The blossom whose unhappy fate was bemoaned by the sad poet because forsooth it must needs to blush unseen or waste its glad sweetness on the desert air, is found alone in the musty hortus siccus of a blind and deluded past. From the status of arbitrary creations

The Care of BEES

In the Middle West

Written and Illustrated by WILLIAM H. DARKINS

1906

The Agricultural Publishing Co.
BOSTON NEW YORK CHICAGO

18 Point Bewick Border No. 68

Century Expanded Italic

In a recent number of the Technical Journal, an article by Charles W. White says: "Any printer with an informed mind and an artistic taste must have rejected a goodly portion of the faces shown in any of the specimen books, and been abundantly justified in doing so. The faces that have disappeared belong to a period in the history of American printing which it is more agreeable to remember little of. It was the time of the extremely common, in types and printing. There was little originality displayed by the type founders, who were content with producing an occasional new face of doubtful merit, and who kept all the old faces firmly fixed in their speci-

men books. But thi we are now observi The new spirit can art it is destined to beginning to be wo rapid growing elim for things immeas of the last two or th The power of typog better understood a circumstances that organization in the yielding so cogently perception of the ri

CURFEW

Solemnly, mournfully, Dealing its dole, The curfew bell Is beginning to toll.

Cover the embers,
And put out the light;
Toil comes with the morning,
And rest with the night.

Dark grow the windows, And quenched is the fire, Sound fades into silence, All footsteps retire.

Twentieth Century 19

Century Expanded Italic

THIS is an American Line Type L pre-eminent for printing Newspapers, Catalogues, Brochures and other advertising literature. Easily read, attractive to the eye, and possessing individuality which makes it its favor is the absence of hair lines. which will appeal forcibly to the buying printer on account of increased durability and wearing qualities. ■ The Century Expanded was cut on the Benton Punch Cutting Machine. the product of which is the closest approach possible to absolute accuracy. The counters are deeper, and the bevels are truer, and are invariably of uniform slope. This makes it possible to preserve the character of the face even after the type has had long use, which is always impossible in hand cut type or that produced by ordinary methods.

Meriontype Series

Can't ^{be} Beat

There can be none better than "best," and the best type is American. Don't think for a minute that the good work is beyond you. In proper material is the secret of profit in production. Ads like these are put together exactly as a modern building is constructed. We design the parts so they can be easily assembled to form modern structures as per the whim of the typotect. That's all there is to it: a iudicious selection of material like this

American Type Founders Co.

It's up

to you to put in your winter coal while prices are down. From this on the tendency will be upward!

FURNITURE

Early Autumn Sale

The increasing demand for plain, simple furniture obliges us to make the manufacture of goods a part of our business. People who love the early New England Styles for their simplicity will find in our warerooms a few reproductions and many suggestions. Most of our present stock is made of oak, and can be stained any color to match interior decorations, or it can be had from us in the unfinished state to be stained to suit purchaser

Household Furniture

CHINA CABINET Solid Oak, colored or finished to sult the purchaser; leaded glass door. Worth double the price we \$28 ask for it. Price for this sale....

SIDEBOARD Solid Oak, 48 Inches long, any color finish. Hand-carved trimmings and velvet-lined drawer for silver.

Durable and a beauty. Price \$26.75

BUREAUS This Bureau will add to our reputation for good values. It has four roomy easy running drawers, and large French plate mirror, which is adjustable to any angle. Strongly made. Price... \$20

DINING TABLES Solid Oak, quartersawed, finished top, with pedestal \$18 base; extend 6 feet. Price \$18

REFRIGERATORS This is the greatest value ever offered in the city. Strongly built throughout. Length, 24 ins., depth 13 ins., height 39 ins.; adjustable shelves and all fixtures removable. Woodwork finished in rich, attractive golden oak; trimmed with solid brass hardware. Price \$6.50

For Library or Den

Miscellaneous Pieces

UMBRELLA STAND Solid Oak, any color finish; 15 holes, zinc pan; \$8.25 very durable. Price.....

DRESSING TABLE Solid Oak, color of finish to suit; size of top 32 ins.; \$9 size of glass 16x20 ins. Price....

TO ART LOVERS

KEEPING posted regarding what is being done by the leading makers of Europe and America, we are enabled to exhibit something new every day. A visit to our stores will convince you that we have the most varied stock to be found in this country of Art Goods, General Decorations and so forth. The beauty of display is only one reason that should tempt you here. Wide range of prices to suit the desires of all our purchasers alike is a consideration that you should not lose sight of; and whether the price be high or low, the buyer always receives full value for his money. The goods we handle are always high grade and artistic, and it is our aim and policy to satisfy all

Booklets and Fine Catalogs

EFORE long—before the "rush" season in all large printing concerns begins—you will want to figure on something in the fine booklet or catalog line. On a kind of service to which so much importance attaches, you ought to be willing to differentiate slightly in favor of a house with thirty years of unbroken advertising success. Through the combined efforts of special artists, special writers, and experts in typesetting, we can lift any business into the world of publicity

OUR ADVICE COSTS NOTHING

and we will, upon request, furnish dummies and estimates of cost of Booklets, Folders, Circulars, Art Catalogs, and all other advertising specialties

NOTICE TO PROSPECTIVE CUSTOMERS

All drawings, designs, sketches, written matter, advertising plans and estimate work drawn up by us are submitted subject to your approval

THE DESIGNER

HIS RELATIONSHIP TO THE PRINTER

ESIGNING and manufacturing of type, to fully meet present day requirements, demand more than artistic study and skill. The type founder, to be successful, must not only thoroughly understand all the needs of the printers, but must anticipate them. To do this intelligently, he must

be well informed as to what is going on in all branches of the business and in all parts of the country. That is the position which is so prominently occupied by the

AMERICAN TYPE FOUNDERS CO.

DESIGNER OF ROYCROFT AND OTHER FACES

8 Point Roycroft Border

Printing Types

And Material of All Kinds

The American Type Founders Company is the most extensive of the world's dealers in printshop machinery and material. Its salesrooms are located in the largest city of every business district of importance in the United States, and it also has special dealers distributed throughout the principal printing centres of the universe. There is absolutely nothing that goes into the equipment of a modern plant it cannot furnish. It makes a specialty of cylinder and job presses and paper cutters, at liberal rates.

Exhibit of Poodles

If former exhibits have been a criterion by which to judge, we may justly expect an unusual number of visitors at our tenth annual showing of full-blooded Poodles @ Every well bred dog has its own points of individuality, noticeably distinguished by some trait in its character @ These points of difference make an exhibit of special interest to intending purchasers @ It will be surprising if even the most fastidious dog-fancier does not leave our exhibit in the proud possession of a poodle of historical pedigree with peculiarities and complexion to match the tastes and characteristics of the purchaser 2 2 2

Announcement Arts and Crafts School of Albion

The Arts and Crafts School of Albion has been organized for the purpose of giving to as many as possible of the Boys of Albion an opportunity for instruction in handicraft, and to foster an interest in artistic and beautiful handwork based upon the principles of good design.

In addition to the educational value

of the work to the student, when his own work shall meet with the approval of the instructor he will reap some pecuniary benefit for himself therefrom, besides helping to make the school more self-supporting

Electricity in Your House

Means Real Economy

THERE is not only HOW LITTLE IT COSTS, and the consequent saving in expense to be considered, but the saving in health, the saving in time, the addition to the comforts of life, the accentuation of the ease of living in a real modern way, inexpensively; these are not only considerations but conditions that present themselves to the economical house-keeper. Electricity that supplies LIGHT in your home will run a revolving fan—operate a machine or heat an iron without dirt or trouble in your sewing-room—conveniently heat a chafing dish or boil coffee; LIGHT, HEAT and POWER supplied from one source.

In this connection housewives will be interested in the display of Electrical Cooking Utensils now being exhibited in the basement of our store and in use in all the best hotels

> MATERIAL REDUCTION in rates for Electric Current renders the use of these conveniences ECONOMICAL

P E \boldsymbol{R} HR

The Uncertain Period of Grecian **History**

Extending from the close of the Irojan war to the first of the war with Persia, 1183 to 490 B. C. – 693 years

♥HE immediate consequences of the Trojan war, as represented by Greek historians, Were scarcely less disastrous to the victors than to the vanquished. The return of the Grecian heroes to their own country is represented by Homer and other early Writers to have been full of tragical adventures, While their long absence had encouraged usurpers to seize many of their thrones; and hence arose fierce wars and internal commotions, all of Which greatly retarded the progress of Grecian civilization.

Among these petty revolutions, however, no events of general interest occurred until about sixty years after the fall of Troy, When the people from Epirus, passing across the mountain chain of Pindus, descended into the rich plains Which lie along the banks of the Peneus, and finally conquered the country, to Which they gave the name Thessaly; driving away most of the inhabitants, and reducing those who remained to the condition of serfs or agricultural slaves

[103]

^{1.} The country of Epirus, comprised in the present Turkish province of Albania, was at the north-western extremity of Greece, lying along the coast of the Adriatic Sea, or Gulf of Venice, and bounded on the north by Macedonia, and on the east by Macedonia and Thessaly. The inhabitants in early times were probably Pelasgic, but they can hardly be considered ever to have belonged to the Hellenic race of Grecians proper. Epirus is principally distinguished in Grecian history as the country of the celebrated Pyrrhus. The earliest oracle of Greece was that of Dodona in Epirus but its exact locality is unknown. There was another oracle of the same name in Thessaly. Map \$(0, 1.

2. Pindus is the name of the mountain chain which separated Thessaly from Epirus. Map \$(0, 1.

3. Peneus, the principal river of Thessaly, rises in the Pindus mountains, and flowing in a course generally east, passes through the vale of Tempe, and empties its waters into the Thermaic Gulf, now the gulf of Salonica, a branch of the olegean Sea, or Archipelago. Map \$(0, 1.

The Berst Piano Is the Best

Why should you delay over the purchase of a piano when you can have one on easy payments from us? We let you select any instrument in our warerooms that pleases you best and you can have it on very easy terms. A promise to pay as little as Ten Dollars when taken and Five Dollars monthly will suffice

Ten Dollars Cash Is All We Ask

Let us send you our booklet "Facts About the Berst Piano." This booklet has been rightly named, as you will agree after perusal. The essential facts of the Berst Piano construction are given and in addition there are hundreds of names of recent purchasers. We will mail this booklet and price-list on request

Porcelains and Gut Glass

Domestic and Imported

Porcelains sold by this house are conceded by best judges of porcelain ware as the finest produced in the world, and our present showing of Porcelains and Glass was made expressly for us by famous manufacturers, both at home and abroad. We also have a separate department devoted expressly to the needs of hotels, boarding houses and steamships in which we carry large stocks of Tableware at economic prices, and the men in charge give all their time to this branch of the trade

Jap Fleet Went into Position South of Formosa

DEFEATED THE RUSSIANS

Martial Law Prevails in Island, Women and Children Removed to Safety by Military Executive

It is believed that part of the Japanese fleet is now taking up a position south of Formosa, and that Admiral Togo's plan is to engage with the Russians there. The Japanese get orders from this city at night time. Martial law, which was first declared at Tamsui, Island of Formosa, and subsequently made general throughout the Island, has been followed by the selection of a military governor and pillaging of stores has been stopped

RAVEN CIGAR

A Good Smoke

A Long Smoke

SMOKE TALK

STRONG, clear Havana cigar will do very well on a state occasion or for a late dinner especially if you can lie abed next morning, but for regular smoking, real pleasure and enjoyment, also the steady nerves required in the general business man, there is but one cigar that hits it off to the letter, that is the now celebrated

AMERICAN BEST

The exceilence attained in the American Line is unquestionably highly appreciated by printers generally. It has made possible the easy alignment of type of one size with that of any other. The American Point Line System has also been introduced into Foundries across the water. Order a font of American Point Leads to simplify alignment. They do the trick without any waste. That a saving of much time is gained by the use of point line type is proven by the fact that nearly ail good printing offices immediately adopted it

ALTERNATE GOTHICS

THIS FAMILY OF GOTHICS CONSISTS OF THREE DISTINCT THICKNESSES OF FACE

Being the most practical Condensed Gothics ever produced by a Type Foundry. The cut of these three series is perfect in every detail; the gradation admits of substituting different widths to fill a line

GOTHICS ARE ESSENTIAL TO EVERY MODERN OFFICE

With this fact in view the American Type Founders Company has given particular attention to perfecting the many fine features of this most important series of Alternate Gothics

HE constant development in all advertising typography causes printers and patrons of printers to realize the possibilities and satisfaction of purely original and artistic typesetting. One factor the most responsible for bringing about this very desir-

able condition is the American Type Founders Company, a concern that is unremitting in its efforts to educate printers to appreciate the value of producing the highest grade of typography. Its methods of doing this are most practical, thereby setting the example, and by making special styles of type showing original ideas. This letter is its own seller

To Attract Attention

In the majority of advertising matter it is necessary to go a little out of the way to attract much attention. In other words, the business represented must toot its horn loud enough to insure attention before it attains a hearing

--- American Printer

 \mathbb{Q}

A good, snappy illustration on a new type design will furnish the requisite wind to insure a proper tooting of the horn. It is material of this kind that is the exclusive product of the American Type Founders Co. Such material is shown in this Type Book

CONTRACT FOR BUILDING WARSHIPS

Delaware Builders Make Business Visit Abroad to Complete Details For Enormous Naval Armament

Charles M. Swinton and Silas Young will sail for Russia within the next few weeks, where they hope to close negotiations with the Russian Ministry for the construction of ten battleships and their accessories, together with other naval armament, at a total cost of \$100,000,000.

Mr. Swinton admitted yesterday that Mr. Young and himself would leave for St. Petersburg to discuss and probably conclude negotiations with the Russian government. These negotiations have been in progress for several weeks. It was stated, however, that the propositions which Mr. Swinton made on behalf

of the Martinburg Steel Company have not been closed. It was known among the large shipbuilders of the world that Russia proposes to begin immediately the reconstruction of its navy and tentative propositions have been given by several English and German concerns to the Russian government, but when the

ARBITRATION REQUEST MADE

Remarkable Petition Sent to Senators and Congressmen from Great Britain

A stimulus to the movement for final settlement of international disputes by arbitration has been given by the presentation to each United States Senator and Congressman of a uniquely printed copy of a monster petition from British workingmen favoring arbitration. The memorial is signed by thousands of representatives of industrial and provident organizations having a membership of over three and one-half million citizens.

NEW OFFICERS RESTRAINED

Court Order Reinstates Officials Kicked Out in the Interest of Reform

The Compact Series, cast American point line, point body and point set. This is primarily a letter for the newspaper, its width of body making possible strong display of headings and advertisements within the narrow confines of the newspaper columns. Beyond this, however, Compact Series has a value in every job

office; in fact, this is one of the good, strong, type faces that will have its daily use in every first-class printing office. Originated and made by the American Type Founders Company, and in stock at all its houses. As a type for display headings, Compact Series is of pre-eminent value and all newspapers should have it

NEW MONEY FOR OLD AT SUB-TREASURY

KIND UNCLE SAM HAS EXPRESSED THERE \$3,000,000 FOR CHRISTMAS PRESENTS

A Christmas gift in cash, whether to your wife or your bootblack, is received with greater appreciation when the banknotes are crisp or the coin new and shining.

Uncle Sam, who is a sort of Santa Claus, knows this, so he has sent \$3,000,000 in freshly-engraved yellow and greenbacks and newly-coined gold pieces to the Wall street Sub-Treasury.

"New money for old" is now the Aladdin-like cry there. But no one can get more than \$300 in new money without paying a small premium—the express charges on it from the mints to the Sub-Treasury.

Uncle Sam, who loves all his children, demands this premium so that any fellow will have a chance to get a bright \$5 gold piece and put it in baby's bank.

MADISON LAKES

Four limpid lakes, — four Naiades
Or sylvan deities are these,
In flowing robes of azure dressed;
Four lovely handmaids, that uphold
Their shining mirrors, rimmed with gold,
To the fair city in the West.

By day the coursers of the sun Drink of these waters as they run Their swift diurnal round on high; By night the constellations glow Far down the hollow depths below And glimmer in another sky.

Fair lakes, serene and full of light,
Fair town, arrayed in robes of white,
How visionary ye appear!
All like a floating landscape seems
In cloud-land or a land of dreams,
Bathed in a golden atmosphere!

ANNOUNCEMENT

THAT DESIGN IN A TYPE FACE IS THE THING TO LOOK FOR IS AGAIN DEMONSTRATED IN THIS DISPLAY OF THE COPPERPLATE GOTHICS. NOTE THE EFFECT OF COPPER-PLATE ENGRAVING IN THE CARDS AND ANNOUNCEMENTS. THE JOHN HENRY AND THE BOWER FOUNDRY LETTER HEADS SET IN THE STYLE USED BY LITHOGRAPHERS ARE VERY GOOD EXAMPLES OF THE AMOUNT OF HARMONIOUS DETAIL OFTEN DESIRED. BUT IMPOSSIBLE TO OBTAIN WITHOUT THE USE OF THESE SERIES. ATTENTION IS CALLED PARTICULARLY TO THE FACT THAT THE HEAVY AND LIGHT ARE CAST THE SAME SET, MAKING EMPHASIS EASY. THE 6 AND 12 POINT FONTS LINE AT THE BOTTOM WITHOUT THE USE OF LEADS.

CHILDREN'S AMUSEMENT

Yourself and family are invited to help make merry at an entertainment tendered the children, on the lawn of our residence, Monday afternoon, August eighteenth, nineteen hundred six. There will be plenty of music

and a programme of sports arranged, which will be followed by a toy balloon ascension.

A good time for the little ones.

The Universal Love and Knowing Appreciation of

Music

Only Sensual Gratification in Which Mankind May Indulge to Excess Without Injury to Moral or Religious Feelings

Music ennobles those who study it, as well as those who hear. It entertains and fascinates both the young and old. Mankind loves and admires it, even worshiping those who produce it. Food, raiment, shelter, then music; who can contest Music's right to the fourth place as a human necessity?

A FEW REMARKS ON PRINTING WORTH READING

ALLING to mind a story I heard told not long ago by a prominent photographer, I will relate the

same one to you. He said: "When I was quite new at the business I always used to take the greatest pains to get every picture to please me, and very often the customer would say, 'It's not a bit like me.' Now I put the plates through in the least possible time and results are fifty percent better."

DOESN'T it often seem as though foremen of some printing shops resemble the picture taker? Hours of time, multitudinous explanations, lots and lots of gray matter are spent upon a job which the customer in very many instances rejects. It is fairly safe to assert that the simplest and most direct method of getting effects will, in nine cases out of ten, please the customer, as well as be productive of the least unpleasantness.

GREETING TO OUR FRIENDS

Quarter of a century we have kept in close touch with the wants of the public. This careful and continued watch of the interests of members of this community has given us intimate knowledge of their requirements in matters of general and personal supplies and also in the more elaborate articles of texture for raiment. Therefore, we are in a most favorable position to fully and intelligently cater to their needs to a mutual satisfaction

A Popular History of the Monasterian Church of America By M. Niles Focobeson, Ph. D. Author of Life in the Days of Old; Extract Notes of Letters on Mythology; The Politicians of the Tomorrow; Does Religion Satisfy the Soul's Spirit? Etc.

THE PUBLISHERS desire to call your attention to the above work they now have in preparation, and the following pages, which will give an outline of the History. This volume will, in every respect, be a most valuable contribution to Monasterian History. No expense has been spared by the publishers in the mechanical execution of the book. The first edition will be limited to only five hundred copies, printed on fine paper, illustrated with portraits of well known men, including Benjamin Gillmore, John Dimon, George Henderson, Benjamin Kellogg, Henry George Buckingham, Frank Cobb, James Kane, Harry Sinclair, and others. Each copy will be as represented, and the binding will be dignified and handsome.

Your advance subscription is solicited for this volume before February 16, 1906. The price to advance subscribers, sending in their orders before that date, will be \$3.50 by express prepaid.

Orders will be entered as soon as received. Subscription blank enclosed. The book will be published by April 16, 1906. Sold only direct from the publishers.

STRATHMORE TYPE SERIES

HE Strathmore type face was designed by a well-known Eastern artist who has had much to do with the work on editions de luxe brought out in recent years by some of our greatest publishing houses. In his

endeavor to strike upon some original style of letter he was compelled to make diligent search through many large libraries. By chance he was given access to one of the greatest private libraries in New York City, and after much deliberation partly adopted a style considerably used by Spanish sculptors and artists hundreds of years ago, then considered paramount in all things per-That the artist has modified the original taining to art. style to one that meets the requirements of the printer of today goes without saying, and we feel a confidence in prophesying that the Strathmore will be included among our most prominent type faces. The Series will comprise fourteen sizes—from six to seventy-two point and will be ready for the market at an early date. The several ornaments that are shown with this series will also be classed among the best recently introduced to the ever progressive printer. 96

Strathmore Ornaments

STRATHMORE SERIES

Will be cut from 6 to 72 point at an early date. Without a doubt it will be found a useful letter by all offices desiring a distinct original type.

PRINTERS SHOULD BE WARY IN SELECTING THEIR TYPES

PRINTER, when choosing type, should not only attend to the cut of the letter, but should as well observe if its shank is perfectly true, and that it lines or ranges with accuracy, and is of an equal height. Then the quality of the material of which it is composed and the finish of the letter itself

demand particular attention. The ease with which type faces of an inferior grade may be made through the facilities afforded of multiplying matrices by the electrotype process instead of cutting direct has also led to the use of poor metal and to the sale of types without due regard to nicety of finish and exactness of body and standing. ¶ It is important that types

should have a deep fac with strong, beveled sh bases or foundations u the ceriphs or hairline and that the letters sh have a deep nick, whic should be different fro other fonts of like bord in the same house.

A Manuccio, born at Bas succeeded Jenson at V and turned to good acc the latter's admirable fonts of type. He also made many advances i the art of printing, the

ROMAN letters were employed in MSS. from the fifth to about the close of the twelfth century, when what are called Gothic letters (and afterwards Old English) came gradually into use; these continued for several centuries, when, in most countries, they were superseded by the Roman characters. All printing was in black letter down to 1465, when Sweinheim & Pannarrz, in Subiaco near Rome, produced a volume, which they entitled Lactantius, in characters approaching to the actual forms of our modern types. In 1467, they made improved characters and printed about

most notable of which is the invention of the style of type now known as Italic. It was first used in an octavo edition of Viril issued by him in 1501, and Pope Leo X. gave him a letter of privilege, entitling him to the sole use of the type he had invented. It is said to have been founded on the handwriting of Petrarch, which it closely resembles. ¶ Italic was largely employed to distinguish such parts of a book

BIG RANSOM WANTED

Men of Wealth Caught in Forest and Taken to Great Britain

Gave Million Roubles to Captors for Immediate Release But Are Held Prisoners Beyond Reach of Police and Friends

The Leader says the police have asked assistance to trace two rich personages well known in Roscow social circles, who have been kidnapped and are being held for ransom by Anarchists. A draft for 1,000,000 roubles, drawn by one of the prisoners and indorsed by the other, was cashed by a banker in St. Paulusville.

EXPRESS RUNS INTO OPEN DRAW

Many Passengers Drowned in Disastrous Wreck Homesville River Railroad Bridge

Divers at noon went to the bottom of the river at the scene of the railroad wreck and found a full carload of dead men, women and children, who had been drowned like rats in a trap. The dead victims have been sent to their homes.

OUR ANNIVERSARY GREETING

For more than a quarter of a century we have kept in close touch with the Dry Goods wants of the public. This careful and long continued watch of the interests of the members of the community has given us an intimate knowledge of their needs. Therefore, we are in a favorable position to fully and intelligently cater not only to their requirements in the matter of general and personal supplies, but also to the more elaborate and special articles of texture for Women's raiment.

OBJECT LESSONS

HE Printers Art School of Correspondence, of Maine, is riding no high horse in its serious efforts in behalf of that art preservative, Printing. The printed specimens liberally distributed by the Art School in its regular course to all printerdom are practical displays of the highest styles, and to printers are

Invaluable Lessons in Modern Type Setting

The utmost care is taken that all leaflets, folders, booklets, catalogs etc., sent from its Artistic Lesson Department may be eloquent and truthful Object Lessons in the art of type arrangement. These ingenious and harmonious groupings of cold blooded type have greatly stimulated the desire to improve, and have caused the results of the student compositor to grow more beautiful and dignified, and also more fruitful of pecuniary results

Point Face Series

Regular Fonts DO NOT contain Miters, which are sold separately in fonts and sets. See Tables D and E, page 676.

18 Point No. 12418

18 Point Rule

Rule larger than 12 point is not called for in regular fonts in sufficient quantities to make it advisable to carry regular scheme fonts in stock. It is sold by the piece according to prices in Tables H and I on page 675.

As a basis for figuring we give below schemes for fonts of 18 point rule, weighing approximately 3, 5 and 10 pounds.

3 POUND FONT

1 to 4 ems by one-half ems—4 pieces each.
5 to 14 ems by ems—2 pieces each.
The above pieces (see Tables H and I on page 675), amount to \$4.44.

5 POUND FONT

1 to 4 ems by one-half ems—4 pieces each.
5 to 10 ems by ems—3 pieces each.
11 to 18 ems by ems—2 pieces each.
The above pieces (see Tables H and I on page 6751, amount to \$7.05

10 POUND FONT

1 to 4 ems by one-half ems—4 pieces each.
5 to 18 ems by ems—3 pieces each.
19 to 25 ems by ems—2 pieces each.
The above pieces (see Tables H and I on page 675), amount to \$13.21.

Miters (18 point), 2½ ems pica long inside, would amount to 72 cents per set and 5 em miters \$1.04 per set, figured from Table H (using outside measure) and the charge for mitering in Table F.

Brass Round Corners for all sizes of Rule shown on opposite page.
Brass Brazed Corners shown on pages 650 to 652. For prices
of Labor-Saving Fonts of Rule see page 674

4 Point No. 1244

ALL REGULAR FONTS ARE PUT UP WITHOUT MITERS. ROUND CORNERS OR MITERS ARE SOLD SEPARATELY IN FONTS AND SETS

10 Point No. 12410

Brass Round Corners for all sizes of Rule shown on pages 648-649. Brass Brazed Corners shown on pages 650 to 652. Prices of Labor-Saving Fonts on page 674

Regular Fonts DO NOT contain Miters, which are sold separately in fonts and sets

See Tables D and E on page 676

American Line Brass Leaders

American Line Leaders are made in three styles. Style 101, a fine dot; style 103, an open dot or short hyphen; style 105, a regular hyphen, which offers a selection varied enough to meet the requirements of all printing offices.

When ordering American Line Leaders give body and style desired.

When Ordering leaders to line with any type not on American Line be sure and send sample type H and m and state style of leaders desired.

Sorts

Sorts are sold per 100 pieces at the following prices. For other bodies and lengths see Table H, on page 675.

Ems.	1	11/2	2 2½		3	3!≤	4
6 Pt. 8 Pt. 10 Pt. 12 Pt.	2 00	2 40	\$1 80 2 40 2 80 3 10	3 10	3 40	3 80	4 10

Fonts of Short Pieces

An equal number of pieces of each length 1 to 4 ems by ½ em, figured at prices in Table H, on page 675. Weighing approximately 1 pound.

each length	Per Font
15	\$2 10
11	2 00
9	1 90
7	1 70
	15 11 9 7

Labor-Saving Fonts

These prices are for Regular Scheme Fonts. In the 5-pound fonts the longest piece is 15 ems and in the 10-pound fonts 20 ems, cut by half ems pica up to 4 ems and even ems pica above 4 ems.

Sorts and special scheme fonts are cut to order and sold at "price per piece" listed in Tables H and I. All bodies other than those listed are cut to order only and sold at "price per piece" listed in tables H and I, on page 675.

Quantity Discounts on Cut Rule

The prices in Tables H and I are subject to the following quantity discounts in addition to regular discounts, if order for rule of one body and face ordered at one time equals or exceeds (exclusive of notching charges):

\$10 00	The quantity discount is	5 per cent.	\$ 50 00	The quantity discount is	15 per cent.
\$20 00	The quantity discount is	10 per cent.	\$100 00	The quantity discount is	20 per cent.

This discount to be deducted before the regular discount on brass rule. Notching charges are NOT subject to the Quantity discount, but are subject to the regular discount.

Brass Head Rules

The following prices are for any Single, Double, Parallel or Triple Rule shown in this book. Reg sizes using 13 em column and 6 point column rule. For other bodies and lengths, see Table I on page

Mrs Mary Walker 31 Oct 06	Theo.Roosevelt 4 Apr 06
Mr James J. Corbett 3Jan 08	Miss B. Hesselburg 3 Dec 06
Rev Abe Slungky 30 Nov 05	Dr Dora Bloomer 12 May 08

Every character is cast on en-quad set, and only en-quads and 4-to-em spaces are used for spacing. By setting sticks to a multiple of 10 Point, spacing and justification become mere child's play; in fact, this type is self-spacing. Although the face is large, on examination it will be found that Time-Saving Mail List Type is quite as condensed on the average as ordinary Mail List Type. Price same as 10 Point Roman.

Election Signs

For the various States using the Australian ballot. Additional signs will be made from time to time to conform with the changes in the election laws of the different States. If recent changes have been made in the election laws of your State send for specimen sheet which will contain all new signs and emblems

United States Signal Flags

Explanation of Weather Signals

Clear or Fair Weather—WHITE, SQUARE FLAG. Print No. 1 in black. Displayed alone, indicates fair weather, stationary temperature; displayed with No. 4 above it, indicates fair weather, warmer; displayed with No. 4 below it, indicates fair weather, colder.

Rain or Snow—BLUE, SQUARE FLAG. Use No. 2, or print No. 6 in blue over No. 1 in black. Displayed alone indicates rain or snow, stationary temperature; displayed with No. 4 above it, indicates rain or snow, warmer; displayed with No. 4 below it, indicates rain or snow, colder.

Local Rain—WHITE AND BLUE, SQUARE FLAG. Use No. 3, or print No. 7 in blue over lower half of No. 1 in black. Displayed alone, indicates local rain, stationary temperature; displayed with No. 4 above it, indicates local rain, warmer; displayed with No. 4 below it, indicates local rain, colder.

Temperature Signal—BLACK, TRIANGULAR FLAG. PLAG. Print No. 4 in black. Displayed in conjunction with other signals, as above described.

Cold Wave—WHITE, SQUARE FLAG, BLACK CENTER, Print No. 5 in black, Displayed alone indicates temperature will fall 20° or more, to a minimum of 32° or less. When displayed with No. 1, indicates fair weather, cold wave.

Explanation of Wind Signals

Storm—RED, SQUARE FLAG, BLACK CENTER. Print No. 10 in red over No. 5 in black. When displayed, indicates that storm of marked violence is expected. Hurricane—Indicated by two storm flags displayed one above the other.

Cautionary—RED, SQUARE FLAG, WHITE CENTER. Print No. 10 in red over No. 1 in black. When displayed, indicates that the winds expected will not be so severe. Well-found, seaworthy vessels can meet them without danger.

Easterly Winds—RED PENNANT. Print No. 9 in red over No. 8 in black. When displayed above either Cautionary or Storm Flags, indicates northeasterly winds: when below, southeasterly; when alone, that special information of storms is to be obtained by calling on Signal Officer in charge.

Westerly Winds—WHITE PENNANT. Print No. 8 in black. Displayed above either Cautionary or Storm Flags, indicates northwesterly winds; below, southwesterly.

Weather Indicators

Engraving Blanks

The Numbers indicate the size in Points—thus, No. 7218 is 72x18 Points.

The Flemish Border

Originated and Cast by American Type Founders Co.

For One and Two Colors

Usable at all seasons of the year, and in multiform classes of printed matter. Particularly adapted to all ecclesiastic work, striking advertisements, show cards covers, etc. Merit Cards for Sabbath Schools will become peculiarly attractive to little children if Flemish Borders in two colors are used in their construction. It will be remarked that while the prices quoted are

5771A. \$1 00 Two Colors \$1 50

exceptionally low, the font quantities are so liberal as to more than supply the requirements of any ordinary job

Bewick Borders

In the use of Decorative Material, made in the form of individual border units, the compositor is brought next door to the designer. With such movable units a booklet cover can be designed which will prove quite as effective as could be secured through use of a specially engraved design and at much less cost, and with the added advantage that in this form the material is available for still further combinations in other work.

Individual Border Units or Embellishers in this form are subject to an almost endless variety of arrangement suitable for cover designs, leaflets or other forms of advertising display, when the buyer of printing desires a distinctive design.

Chaucer Borders

There is an originality and distinctiveness in border characters or embellishers of the Chaucer designs which impart to printing all of the flavors of an engraved design. They are an immediate and pronounced departure from the ordinary product of the type foundry, and the universality with which these have been adopted the country over indicates the introduction of a new style of typography. The result cannot fail to be a marked increase in the use of all forms of printed matter for trade extension

Pabst Borders

The majority of type display is for the purpose of commercial advertising, the demands for which are continually increasing, and the requirement on the part of the buyers of printing is for modes of expression which shall catch the eye. The American Type Founders Company has been quick to appreciate this coming demand, and this American Line Type Book makes available a wealth of Decorative Material which the wide-awake printer will be quick to turn to practical advantage in the extension of his business. Never before have printers been offered such distinctive type faces with border designs which harmonize and which bear so plainly the earmarks of having been designed for a specific purpose

Laurel Ornaments

These Ornaments are cast in a cored type mould, with as little shoulder as possible on the inside of the wreaths, so that type lines may be set close up. A great variety of designs may be quickly and easily produced with these inexpensive Ornaments

Characters of 18 Point Laurel Ornaments

The characters of 6 Point and of 12 Point are practically similar to these

Chap-Book Guidons

The Artist Printers

[and just a few
who are not artists]
might become prosperous
printers [which is much
more desirable] if they
would avail themselves
of type faces like

The Tabard

an exceptionally well adapted series for the developing of ideas that are removed from the commonplace

Tabard type and Chap-Book Guidons work out very happily in the particular printer's own literature

Chap-Book Directors

are made in four eye-catching styles, comprising nine sizes each: 24, 30, 36, 42, 48, 60, 72, 96 and 120 Point

Per font of eight pairs (sixteen characters) \$0 50

Just Consider

Whether or no 'tis best to take advantage of the improvements that are offered as the type founding science daily progresses. Is not the status of the printing art governed thereby?

American Type Founders Co.

No. 17. 72 Point 25c.

A series of pictures for attracting the eye and arousing the interest, thereby increasing the value of printed matter. They are intended to illustrate catchy phrases (a million or more of which are applicable), a few of which are printed. Cast like type, in two sizes, 72 and 96 Point. Great aids to the printer

Attention is invited to the new design of this furniture. The strain-bearing braces have been increased in number and placed in the best possible positions, increasing the strength while not increasing the weight.

Railroad, or Reversible Metal Furniture

This Labor-Saving Reversible Furniture is the strongest and also the most accurate. It is made on the Point System of Bodies, and is useful for blanking out and making up forms and for general imposition.

			ch Fon									

On the succeeding pages are shown specimens of the standard faces in Wood Type as well as additional designs which are entirely new in wood letter. This selection has been made with reference to securing the best possible results in the production of fine poster printing.

Any style can be furnished in any size desired, and in the following table we give prices for all sizes up to 100 lines pica. Complete Specimen Book will be sent upon application.

By reference to the Revised Price List and the Scale of Fonts it will be found an easy matter to determine the price of any style of Wood Type in any desired size. First determine the kind of font desired—whether caps only, or caps and figures, or caps, lower case and figures. Then determine the size of font desired, whether 3A's, 4A's or 5A's. When this is determined you will have the total number of characters in the font. See in what class the particular style is listed and find the price per letter. By multiplying the total number of pieces by the price per letter you obtain the list price.

REVISED PRICE LIST PER LETTER

The prices for all sizes of each style of type shown in this book can be found in this Revised Price List. The left-hand column gives the size of type, or lines pica. The letters L, M, N, etc., at the top of table, give the class to which the letter belongs, and the figures in the different columns give the price per letter. The sizes of fonts are given on this page in the Scale of Fonts.

Always state whether CAPS alone are wanted, or CAPS and FIGURES, or CAPS, LOWER CASE and FIGURES, or CAPS and LOWER CASE, and how large a font or number of A's.

Give full directions for shipping, unless it is desired to leave the matter to us, in which case we will ship the cheapest way, freight or express.

Wood Type is priced by the letter, and sold in various sized fonts, as under. Font orders are

subject to a liberal discount; small sort orders are subject to a smaller discount than is allowed on fonts. 3 A cap font contains 75 letters; 3 a lower-case font contains 65 letters; 4 A cap font contains 106 letters; 4 a lower-case font contains 90 letters; 5 A cap font contains 120 letters; 5 a lower-case font contains 104 letters. Figures are put up separately, 26 in each font.

Lignumvitæ	1½ × 2½ inches 0 30	Lignumvitæ 3½×5½ inches 078

Boston Rubber Safety Mallets

This mallet is made of good quality solid rubber over an iron core. The rubber is sufficiently thick and strong to prevent injury to type forms or stones. Does not crack or peel from iron core. Size $2 \times 2\frac{1}{2}$ inches.

Price each

Rawhide Bound Mallets

The most durable, finest finished, and handsomest made. Positively will not split. The spring of the hide-facing cushions the blow and prevents jarring the muscles.

Hamilton Newspaper Files

Made of cherry, finished in oil, with brass fastenings and polished steel thumb-screws. The method of opening and closing this file is novel and simple. The clasp end of file has a flat-headed thumbscrew (see cut) which is passed through a slot and by giving the screw a quarter turn the file is securely locked. When the head is turned parallel with the file it opens instantly.

The following sizes are made

Price List of Cases

For illustrations of Cases see following pages

Shows at AA how the three-ply bottoms are set into the front and side rails, so that the case slides on the rails instead of on the case bottoms.

Our Cases all have patent "New-Departure" threeply bottoms, which prevent splitting, warping and shrinking. These bottoms are set into the side and front rails (see AA) so that the case slides on the side rails. As the grain of the side rails and of the cross-runs in stands and cabinets run the same way, the cases slide much easier and with considerable less wear and tear.

Patent Clasp Cases

These cases are of unusual strength owing to the use of a brass clasp over the corner of each box and a long pin which is driven through center of each clasp and clinched, holding the partitions firmly to the bottom of the case. This feature in combination with our New Departure case bottoms, makes these cases the strongest and most durable, especially for body type in newspaper offices.

Adjustable Lead and Slug Case No. 2

Russell Tabular Case

Hamilton Blank Case

Neshota Rule Case

Adjustable Lead and Slug Cases

These cases have slotted rails at the front and take in adjustable strips. The arrangement is such that the case can be divided into various compartments, the variation being by single Picas. This will enable the printer to lay out this case to accommodateleads and slugs all of one length or varying by Picas, such as 4, 5, 6, 7, 8, etc., or any other arrangement desired.

The No. 1 is made without a center bar, as shown. The No. 2 has a center bar running the long way, which is also slotted on both sides.

No. 1 single depth			\$ 1	50
No. 1 double depth			2	50
No. 2 single depth			1	75
No. 2 double depth			2	75

Fourteen full-length division strips accompany each No. 1 case, and twenty-five half length divisions strips accompany each No. 2

Russell Tabular Case

This is specially designed for tabular work; has boxes for all tabular work; has boxes for all special characters as marked, and will save at least twenty per cent of the compositor's time on table work. On the left-hand side are twenty-eight compartments for the odd characters and diacritical marks, also twenty-one boxes at the front for brass rule and brass leaders. On the right-hand side leaders. On the right-hand side of the case are twenty-four boxes of equal size for piece fractions, and six large boxes at the front for quads and leaders. In the center of the case, at the front, are very large boxes for the main figures, spaces and quads, also small boxes for the thin spaces and points; at the back are fourteen boxes of medium size for the main fractions. This case can be adapted with profit to a variety of uses.

Price \$1 80

Hamilton Blank Case

Neshota Rule Case

Regular Full Size 3214x165%

This Case is arranged with compartments for all lengths from 1 to 50 picas long, varying by single picas, and also separate compartments for ½ em lengths from 1½ to 9½ picas inclusive. There are also compartments at the upper right-hand corner for right and left miters from 2½ to 6 ems. Six extra compartments on right-hand end for odd pieces, ornaments etc.

Quarter Cases

Carpenter Quarter Case

This Case is most useful in tabular and other intricate work. It is intended to set on the ends of the lower cases in the center between two lower cases, but not interfering with the same. It rests on top of the cases and the lugs on the back end hold the case from slipping off at the front. It also has a lip at the front which enables other small cases to be put on top of this case and remain in place without danger of slipping off. It has double spaces for fives and ciphers, the figures most used. It has compartments for justifying material and special sorts.

Carpenter Quarter Case Price \$0.75

Digitized by Google

Individual Lead or Rule Case

In this a compositor may keep his much-valued 12-to-Pica and other thicknesses of leads for justifying purposes, his pickups of dashes, rule, etc. The case can be kept in his drawer or on his galley rest. It has boxes from 1 to 91/2 ems (varying by ens) from 10 to 20 ems (varying by ems) and from 20 to 24 ems (varying by two ems). It is also useful for holding a small font of laborsaving brass rule. Size 7x71/2 inches over all.

Eight of these cases just fill an ordinary blank case.

. \$0 75

Harris Rule Case No. 0 or Individual Lead or Rule Case

Harris Rule Case No. 1

Harris Rule Cases

No. 1 Harris Rule Case holds two complete fonts of Labor-Saving Rule, each weighing 8 pounds, or 16 pounds in all. Each half of this case holds eighteen pieces each length from 1 to 8½ ems (varying by ens) and eighteen pieces each from 9 to 18 ems (varying by ens) and nine pieces each 19, 20, 21, 22, 24, 26 and 28 ems, besides right and left miters.

Harris Rule Case No. 2

No. 2 Harris Rule Case holds one complete font of 16 pounds weight or less. It has compartments for thirty-six pieces each from 1 to 9 ems long (varying by ens), eighteen pieces each from 10 to 24 ems long (varying by ens), and eighteen pieces each of 26, 28, 30, 32, 34 and 36 ems long, besides boxes for right and left mitters. A large proportion of small lengths allowed for.

Harris Rule Case No. 3

Nos. 3 and 4 Harris Rule Cases are designed to be used together to hold a font of rule suitable for a large office, weighing 32 pounds or less. Two and in some cases four boxes are used to hold the most-used sizes. Each case has its proportion of the small sizes, so that if it is desired to carry one case to a compositor's stand for use in rule work, the other is available in its rugular place with a good working font. These cases have compartments for seventy-two pieces each from 1 to 9 ems long (varying by ens), thirty-six pieces each from 10 to 24 ems long (varying by ems) and eighteen pieces each from 25 to 36 ems long (varying by ems) and boxes for right and left mitters.

Harris Rule Case No. 4

In Harris Rule Cases the rule cannot fall flat—must always stay on end. Generous provision is made for the smaller sizes—the most valuable sizes in a labor-saving font. The cases may be used in sets or separately, as Nos. 1 and 2 are complete in themselves. Four of them fit into a Full-Sized Blank Case.

Harris Border Case No. 5

Made the same size as the Harris Rule Cases. To meet requirments of border and ornament fonts, the short partitions are movable; but, being closely fitted, they will remain where placed. Size of small boxes can thus be readily adjusted.

One-Quarter Size Harris Rule Cases

Wisconsin Combination "Quarter" Cases

Shows four "Quarter" Cases in a Full-size Blank Case. Price \$3 00

"Quarter" Cases supply a means of keeping signs, borders, accents and split fractions where they can be found. They can be placed on a cap case, on a stand, or on the stone, convenient to hand of compositor. In setting mathematical work, foreign languages, dictionaries and special catalogues, these "Quarter" Cases will prove invaluable. We show a few schemes for laying signs, fractions, etc., but various other uses will suggest themselves.

All Right Space and Quad Case

Quarter Size

A most useful addition to the family of Quarter Size Cases. It has compartments for ½ point thin copper spaces, one point thin brass spaces; also compartments for 3, 4, 5 and 6 em spaces, em quads. and 2 and 3 em quads. Compartments are proportioned in size to correctly take the amount of each size as put up by the typefounders. Each case will hold a 10-lb font of spaces and quads of any size, as put up by the typefounders, without over-filling the case.

All Right Space and Quad Case \$0 75

Metal Furniture Cabinet

This is a double-faced rack, designed to hold a large font of metal furniture, and, as it is filled from both sides, only one-half the capacity is shown in the above illustration. The cabinet has two compartments (one on each side) for each length and width. Each compartment holds sixteen pieces, arranged in two tiers, stacked eight pieces high, giving a total capacity of over 300 pounds of metal furniture. Each compartment is numbered, as shown in the cut. The size of the Metal Furniture Cabinet is 131/2 inches wide, 10 inches deep, and 4 feet 10 inches high, outside dimension.

Price \$12 00

One-Quarter Size Cases

Has compartments for brass rule from 1 to 36 ems Pica, and from 1½ to 9½ ems Pica, with places for miters. Size outside, 7% ×15½ inches. Four fit in a full-size blank case. For full-size Rule Case see page 1009.

One-Half Size Case

Sanspareil Rule Case. Two just fill a Blank Case \$1 50

Perfection Rule Case

A Quarter-size Case

This is another first-class quarter-size Brass Rule Case. It has two compartments for all lengths from 1 to 2 Picas, and one compartment for lengths from 18 to 36 Picas. The variations are by half Picas from 1 to 10 and by full Picas from 10 to 36. Four of these Cases will fit into an ordinary Blank Case.

Perfection Rule Case each \$0 90

Special Cases

Bettis Space and Quad Case

Bettis Lead and Slug Case No. 1

The Bettis Space and Quad Case is made to fit top of regular stand 72 in. long, 18 in. wide, 6 in. deep at front, 2½ in. deep at back. The use of this case will enable all spaces and quads for job fonts to be kept in a single case. Price each \$10 00

Bettis Lead and Slug Case No. 1 has compart-ments for leads and slugs from 4 to 28 ems Pica long, from 4 to 28 ems Pica long, varying by ems, omitting the 27-em length. This case is 72 in. long, 18 in. wide, and 1½ in. deep inside. Designed to fit the top of a regular case stand and covers the space usually occupied by two regular full-size type cases.

Price each \$4 00

Bettis Lead and Slug Case No. 2

Bettis Lead and Slug Case No. 2 has compart-Case No. 2 has compartments for leads and slugs from 30 to 60 ems long, one compartment foreach of the following sizes: 30, 32, 34, 36, 38, 40, 42, 45, 50 and 60 ems Pica. The case is 72 in. long, 18 in. wide and 1½ in. deep inside. Designed to fit the top of a regular case stand, and covers the ansec usually. covers the space usually occupied by two regular occupied by two full-size type case

Price each \$4 00

Bettis Lead and Slug Case No. 3

This Case, like the Bettis Lead and Slug Cases No. 1 and 2, is 18 inches wide by 72 inches long, outside measure. The inside depth is 1½ The inside depth is 1½ inches. It has compartments for lengths from 3 to 48 Picas, varying by single Picas, with accommodation also for accommodation also for ½-em lengths from 3½ ems to 3½ ems inclu-sive. This will prove a most convenient Case and hold a great quan-tity of lengths in con-venient form. Weight not crated 19 pounds. Price \$5 00

Jones Metal Furniture Case

Size 18x72 inches

This case is constructed of wood with a thick three ply bottom, firmly fastened to the edges and also to the center bar. Being 2½ inches deep on the inside, it will hold a great quantity of metal, and it is strongly constructed with this in view.

It has compartments as follows:

- 3 compartments for 4 line metal furniture 4 compartments for 5 line metal furniture 5 compartments for 6 line metal furniture
- 6 compartments for 8 line metal furniture
- 7 compartments for 10 line metal furniture 7 compartments for 15 line metal furniture
- 7 compartments for 20 line metal furniture
- 7 compartments for 25 line metal furniture
- 1 compartment for 30 line metal furniture
- 1 compartment for 50 line metal furniture 1 large blank space for odd sizes.
- Weight not crated, 30 lbs. Size 18x72 inches

The Hamilton and May Leader Boxes on a Case

Leader Boxes

Here are two styles of Leader Boxes. The Hamilton Box is flat and can be carried about the office and set on any flat surface. If placed on a case it covers some of the type boxes, as shown in the illustration. The May Box is adjusted to the back part of the case and covers part of the lower-case box only when adjusted to a lower case, as shown in the illustration.

May's Leader Box

Both of these Leader Boxes are very handy de-vices, and each is very useful for certain purposes. For the job man the Hamilton Box is probably the best, as it can be used anywhere about the office,

about the office, carried to the job bank or used on a stone. For the type compositor the May's Box is undoubtedly the best, as it does not cover the type boxes when in use and is placed in a certain position and kept there. Leader boxes should be provided for every size job type in the office. Size of Hamilton Box, 5 × 8 × 1% inches. Size of May's Box, 4½ × 6½ × 1½ inches. Hamilton Leader Box, per dozen May's Patent Leader Box, per dozen \$2 50; each \$0 25 5 00; each 0 50

Labor-Saving Lead Racks

M.

í;

Two-tier Wisconsin Lead Rack ; 4 to $12\frac{1}{2}$ by ens 13 to 60 by ems

Four-tier Wisconsin Lead Rack; 4 to 121/2 by ens 13 to 60 by ems twice

Eureka Lead Rack, capacity 180 pounds

The Eureka Lead Rack is substantially constructed in two sections, each section holding lengths from 4 to 28 ems, varying by single ems. One section may be used for leads and the other for slugs. The partitions in this Rack are placed on an incline to prevent the leads and slugs from falling. These partitions are also inclined backwards, so that the material cannot be easily thrown from the case by a slight jar. Size of Rack 14½ × 28½ inches. Compartments are 5½ inches wide inside. Eureka Lead Rack

Takes leads from 4 to 12½ ems (varying by ens) and from 13 to 60 ems (varying by ems) the length being stamped over each compartment. Compartments are eight inches high. Capacity 750 pounds of leads and slugs.

Has two compartments each for all sizes in the two-tier rack, and is similar in design and construction. Capacity 1500 pounds of leads and slugs.

The Boston Lead Rack is made in four sections, which are sold separately if desired. The different lengths which go in each section are stamped over each compartment, as shown in cut. A line gauge for determining lengths is attached to each section. The four sections accommodate lengths from 4 to 7, varying by ens. and from 7 to 60, varying by ems. The front of each section measures $8\frac{1}{2} \times 17\frac{1}{2}$ inches. Compartments are $6\frac{7}{2}$ inches high.

New York Space-Saving Case Stands

New York Double Stand

New York Quadruple Stand (see end view below)

These are space-saving, rent-reducing stands. Two New York Double Stands, holding sixty cases in racks and four pairs cases on top, occupy eighteen square feet of floor space, as against thirty square feet occupied by two ordinary double stands, holding at most forty-eight cases in racks and four pairs cases on top—a saving of twelve square feet. Two Double City Stands occupy a floor space of twenty-five square feet against seventeen feet occupied by one Quadruple New York Stand—a saving of eight square feet. This saving is obtained by making the racks correspond to size of cases exactly, bringing forward the cap cases so that they do not overhang at the back of stand (as they do on ordinary stands) and extending the lower cases several inches into the alley.

End view of New York Window and Quad-ruple Stands

Other Points of Superiority

The lower cases project into the alley several inches, affording the compositor ample leg room, and allowing him to get closer to the type. The angle of the lower case is just right for rapid type setting. The upper case is raised above the lower, and brought forward closer to the compositor's hand, while not obstructing the figure boxes of the lower case. The cases are held on strong iron brackets, securely screwed to a hard-wood top, which is perfectly smooth, and very useful for storing tied-up matter or for other purposes.

The Window Stand is a rearrangement of the Double Stand, so that it occupies a square area, and is very suitable for placing opposite a window.

Polhemus Case Stands

Back View of Double Polhemus Stand

These are convenient time-saving Stands for job offices.

The compositor handling straight matter stands behind the job cases and works without interruption from those who are using the job cases. He can empty his stick without leaving the stand on a galley kept under the lower case, as the top cases are held on Hamilton's Patent Tilting Brackets. The top of the stand is a flat hardwood board on which tiedup matter may be stored conveniently. Over the job cases there is a hardwood bank or galley top for keeping live and dead matter. Between the case racks on the No. 3 Stand there is a galley cabinet (cost \$8.00). The Double Stand holds 24 cases and 2 pairs on top.

Case Rack for Twenty Full-size Cases

Oviatt Iron Case Stand and Galley Rack

Oviatt Iron Case Stand and Galley Rack

Has the largest capacity of any stand made to hold cases with ordinary fronts. It is made throughout of heavy angle iron with steel runs and will stand more abuse than any other case stand or rack. The heavy iron frame sits flush on the floor and is amply braced at the corner of each tier of cases and galley rack. The frame is strongly riveted and the corners reinforced. The steel runs are extra strong and are firmly riveted to the angle iron frame.

The complete stand provides working spaces for four compositors, besides giving case room on the two unoccupied ends for 40 full size or Rooker cases and 40 single column 16-inch galleys, with the option of increasing this case room by the addition of 40 quarter cases for the storage of sorts, accents, brass rule, etc.

The brackets on top are made flush with the heavy wooden top. When desired, the brackets on top may be made to overhang the stand proper at no additional cost.

When made to hold 80 Rooker cases, 40 quarter cases and 40 single column 16-inch galleys, the stand has a floor space of $49 \cdot 65 \frac{1}{2}$ inches. By omitting the quarter cases the galley rack may be arranged to hold 40 double column 16-inch galleys. If the galley rack is omitted the floor space of the stand is reduced to $41 \cdot 65 \frac{1}{2}$ inches over all.

Prices given are for Stands only without cases or galleys.

Eagle Double Case Stand

Eagle Angle Iron Steel Run Case Stand with Paneled Sides

For ease, comfort, convenience and economy of floor space the Eagle Double Case Stand is a success, the superior of any case stand manufactured. It was built to satisfy the demand of city printers for a stand which would take the maximum number of ordinary front cases.

It is built of either angle iron or wood as desired, has steel runs, with or without paneled sides and back, and has a case stop attachment to prevent the cases running through to the front of the stand.

When built of wood the best kiln dried hardwood is used throughout and the parts are firmly bolted together. It is built flush with the floor, thus preventing the accumulation of dirt or anything else underneath the stand. The iron brackets on top project over the front of the stand $8\frac{1}{2}$ inches and provide sufficient knee room for the compositor to work freely either standing or sitting. Two pairs of brackets are provided. A dumping bank running the full length of the stand is placed in the rear.

The stand holds 42 full-size cases having ordinary fronts, 19 in each tier and four additional cases on top. Finished in antique oak and varnished, and when paneled sides and backs are provided, it is to all intents and purposes a cabinet and is almost dust proof.

When made of angle iron the entire frame is firmly riveted together, thus providing an almost indestructible piece of furniture which will withstand indefinitely any weight that can be crowded into the cases. When panels are desired they are inserted into the iron frame and are firmly fastened. They are of hardwood finished in antique oak and varnished. All iron work which shows on the exterior is finished in black enamel.

When Eagle Case Stands are made in wood they can be shipped knocked-down, but when made of angle iron they cannot be knocked-down.

We have made quite a number of these stands in angle iron with paneled sides and back to take cabinet front cases. This construction allows provision for 54 cases in the racks and two pairs of cases on top. We will be pleased to quote prices on this combination on application.

Wisconsin Hard-Wood Cabinets

With New Departure Cases

Twenty-Cases Wisconsin Cabinet with Flat Top, showing Double Case Bracket, Style A, attached to top, for holding two pairs of cases See page 1047 for prices of Double Case Brackets Style A

Twenty-Case Wisconsin Cabinet with Galley Top and Copy Drawer

Style A

Although made of hard wood, these Cabinets are sold at the same prices as ordinary cheap-looking stained cabinets. Three-quarter and full-size cabinets are furnished with California job cases which are preferable to italic cases, as they afford more room for the caps. The bottoms are made flush with the floor, to prevent dirt from getting underneath. The sides are double paneled and very tastefully moulded. Double Case Brackets put on top of flat-top cabinets, make a convenient stand for compositors.

Wisconsin Cabinets

With Steel Runs and New Departure Cases

When rents are high and space is limited these cabinets are especially recommended. They save twenty-five per cent in space in the smaller sizes, and by using the high cabinets containing forty, fifty and sixty cases the saving is enormous. Space is utilized in the upper part of these high cabinets that was not occupied before. The same result is obtained by using high cabinets that is obtained in the modern skyscraper office building.

Every Case is easily accessible, because the ones at the top of the high cabinets can be taken out and brought down to the proper level for type setting.

Double Case Brackets Style A (see cut of	on page 1047) pe	r pair		1 25

Nos. 2, 8 and 14 are correct height to use with Patent Tilting Brackets, in same manner as on Polhemus Cabinets shown on page 1026.

The fifty-case and sixty-case Cabinets are furnished in one or two tiers, as desired. Brass Label Holders attached to any Cabinet at an additional price of five cents per case list.

Wisconsin Window Cabinet

All Hard Wood

Specially designed for placing in front of a window, as it does not obstruct the light, of which the cases on top get the full benefit. Two men may work undisturbed at the sides, while the job cases in front are convenient for other men. The top is flat, and useful for holding tied-up type.

These cabinets have the patent tilting bracket and galley rest, which enables a compositor to empty his stick without leaving the cabinet by simply tilting his lower case, as shown in the cut, thus exposing the galley. Weight crated about 375 pounds. Width 35% inches; height 44 inches; depth 20% inches.

Patent Tilting Case Bracket

Used on Wisconsin Window and Polhemus Cabinets

B B (outline) shows bracket holding case in position for setting. Shaded cut shows bracket tilted up, allowing compositor to empty on galley below lower case, which is more clearly shown in cut of Wisconsin Window Cabinet printed above. These brackets are also supplied with all Polhemus Cabinets.

lnk and Roller Cabinets

A very necessary article of printing-office furniture. The use of it will result in a saving of ink and rollers, which will speedily pay for the cost of the cabinet.

- No. 1, with shelf for ink, shelf for brayer and ink slab, and brackets to hold 6 eighth and 6 quarto rollers \$ 6 50

Polhemus Cabinets

All Hard Wood

The object of the Polhemus Cabinet is to save time and space. Time is lost on the ordinary cabinets by stationing the compositor in front of twenty cases, all frequently in use by other men, who, when setting or distributing from them, keep the man at the cabinet idle. On the Polhemus Cabinets the job cases are unobstructed, and the compositor stands at the back, where he cannot be interrupted. If he is setting solid matter he can empty his sticks, without walking a step, on a galley kept under his lower case, as the cases are held by the Patent Tilting Bracket and Galley Rest. Illustrated in cut below.

Every inch of space on the Polhemus Cabinets is utilized to advantage. The galley top or bank is a most useful addition. The space between the cases is used as a sort or a galley cabinet. The top is flat, and tied-up matter may be kept on it, as the iron case brackets admit of easy access to the space under the cases and galley top. The brackets which hold the cases project into the alley eight inches, giving the compositor plenty of knee-room, while saving floor-space.

Prices of Polhemus Cabinets

With Wood Runs

Front view of Triple Polhemus Cabinet, showing Jobbing Cases, Sort Drawers and Galley Top or Bank

Polhemus Cabinets With Steel Runs

All Hard Wood

These Cabinets are similar to the Polhemus Cabinets, illustrated on these pages, except that the use of steel runs instead of wood runs increases their case-holding capacity without changing floor space or height.

No. 6 Double Polhemus Cabinet, complete with 50 full-size California job cases in two tiers, 2 pairs of full-size news cases on top, a galley top, and 2 pairs of Hamilton patent tilting brackets (no sort drawers or galley cabinet). Weight about 700 pounds

No. 7 Single Polhemus Cabinet, complete with 25 full-size California job cases in one tier, 1 pair of full-size news cases on top, a galley top, and 1 pair of Hamilton patent tilting brackets. Weight about 325 pounds

Choice of Cases

Unless otherwise specified, cabinets will be shipped with assortment of cases as indicated above. Triple, regular job or italic, cap or lower cases, can be furnished, if desired, at the same prices. If rule, border or script cases are ordered, the difference in cost of cases will be added to list price. Cabinets are constructed of ash, with antique oak finish.

95 00

Porter Patent Extension-Front Steel-Run Cabinets

The sides of these Cabinets are extended four inches beyond the fronts of the cases. These extensions serve the printer in two ways: (1) A case near the top of a cabinet may be taken from its rack and placed in a more convenient position for setting from, and will be held by the extensions without with-drawing another case. This cannot be done on any other cabinet. (2) The extensions permit cases to be drawn out further from racks than is possible in other cabinets, making it easier to set out of the rear boxes. In addition, these cabinets have all the best points of other cabinets, such as steel runs, New-Departure cases, hard wood throughout, and are stronger than any other cabinets. The extension sides make it practicable to use high cabinets, containing more cases in a tier than can be advised where ordinary cabinets are used.

No. 7 Porter Steel-Run Double Tier Cabinet

Brass Label Holders

Systematic printers should order their Cabinets fitted with Brass Label Holders. By displaying on the case fronts samples of the type contained in a cabinet much loss of time is avoided. These Brass Label Holders are attached to cases at 5 cents per case, list.

60 Case Cabinet .															. 99	351/2	22

As to Construction—No other Cabinet equals this in points of solidity and carrying capacity. The runs are flat pieces of steel, which are placed between strips of wood as shown above, and a steel rod is run from top to bottom of the Cabinet through the steel runs and intervening wooden strips and then firmly locked with steel pins.

The wooden strips between the pieces of steel are firmly fastened to the side rails of the Cabinet. This method of construction practically consolidates the whole side of the Cabinet, including steel runs, intervening wooden strips, side rails and panels into one piece, and there is no possibility of the Cabinet becoming wrecked or giving out at any point under any strain that can be applied to it while in use.

A Great Saving in Space is attained by using the Steel Runs, which allow the Cases to be placed more compactly in the Cabinet. The capacity of the type cases for holding type is not reduced in the least, as regular Cases are used.

All these Cabinets have paneled ends with moulded edges, and are made of ash finished in antique oak. Being dust-proof, like all our Cabinets, these Steel Run Cabinets insure the preservation of the delicate type faces and thereby increase the profits of the printing office.

Porter Extension-Front Steel-Run Cabinets

In addition to having steel runs the Porter Cabinet is built with extension front, allowing any case to be drawn out and placed at a convenient height without necessity of using another case as a rest. The depth of the extension front is four inches. These cabinets are regularly fitted with California job cases, but if desired, other styles can be substituted to order. The use of Brass Label Holders on the case fronts will save much time and be found a great convenience.

Brass Label Holders are attached to Cases at 5 cents per Case, list

The Case Runs in Porter Cabinets are flat pieces of steel fitted between strips of wood and firmly locked together by steel rods passing through all. No chance for anything to work loose or rickety. With this style of construction and with New Departure Cases, a man can stand on the outer edge of a case fully drawn so that the back tier of type compartments are accessible. This is a most severe test and no other style of construction will withstand it.

The Extension Front enables the compositor to draw any case well out beyond the others, and makes the back tier of type boxes as accessible as any boxes in the case. It also permits the top or bottom cases to be drawn out and placed at the proper height for setting purposes without partly drawing another case to be used as a rest.

All these Cabinets are fitted with the Patented New Departure Cases. The merits of these Cases are now well known. They ride upon the side rails only, and the bottoms do not come in contact with the case runs.

New Departure Type Cabinets

Filled With New Departure Type Cases, the Latest, Most Compact and Economical of
Modern Type Cabinet Construction

In these days when most modern printing offices are fast outgrowing their present quarters, it is essential that economy of space receive the greatest consideration. A short time ago it was not thought possible to make Type Cabinets with more than 18 Cases in a single tier and have the Cabinets the right height for type-setting purposes. Even this was a great advance over the old style Case Stand which accommodated but eight or twelve Cases in a single tier.

We now present our New Departure Cabinets. These Cabinets which possess all the advantages of other Cabinets have the remarkable feature of combining from 25 to 33 Cases within the height of 43 inches, the correct height for a Flat Top Cabinet with Cases and Brackets on top for type-setting.

This represents a gain in one jump of 33% per cent in Case capacity over the best Steel Run Construction heretofore offered printers.

Sectional View of New Departure Type Cabinet Showing Flat Steel Runs

This result has been made possible by the use of our Flat Steel Runs which we illustrate. These Runs are thin pieces of steel of great strength, fitted into saw-kerfs in the sides of the Cabinet and held in place by means of lips on the ends of the Runs so that such Runs cannot possibly get out of place or become loose. These Flat Steel Runs were originated and perfected by us more than ten years ago and have been in continual use in our Steel Run Stands since that time. They have given such universal satisfaction that we have decided to incorporate them in a line of modern Steel Run Cabinets, feeling sure that the printers will appreciate this new departure and will be quick to take advantage of the large saving in case capacity. We have found that the cost of constructing these Cabinets is somewhat less than the regular steel run construction, therefore our prices on these Cabinets are somewhat lower than other Cabinets. We can, however, guarantee that in points of strength and beauty these Cabinets are not surpassed by any other Cabinets of our manufacture.

Where compactness is essential in order to save space we unqualifiedly recommend these Cabinets to our customers, believing they will give perfect satisfaction.

These Cabinets are constructed of hardwood finished in antique oak, the ends are tastefully paneled and moulded and the fronts ornamented and fitted with bronze pulls. The cases are of our best new departure pattern covered with paper on the inside; the paper absorbs the moisture and prevents it from entering the bottom.

Brass Label Holders attached to Cabinets at an additional price of 5 cents per case, list. All the Cabinets listed above with six exceptions contain Cases of standard depths, 1% inches outside the front, and such cases require no further description. The six special Cabinets we describe more particularly on this and the following page.

No. 51 contains 33 Two-third Cases, size $16\% \times 21\%$ inches outside measure. These Cases have a uniform depth of one inch outside the front and are deep enough for all medium and small sizes of metal type without doubling fonts. Height of Cabinet 43 inches, which is convenient for type-setting purposes when cases and brackets are placed on top.

No. 57 contains 33 Three-quarter size Cases, size $16\% \times 26\%$ outside measure. These Cases have a uniform depth of one inch outside the front and are deep enough for all medium and small sizes of metal type without doubling fonts. Height of Cabinet 43 inches which is convenient for type setting purposes when cases and brackets are placed on top.

Special sizes made to order at proportionate prices

All the above prices and descriptions are for Flat Top Cabinets. Add to the prices given for single tier Cabinets \$3.00 and for double tier Cabinets \$6.00 if wanted with Galley Tops.

No. 63 contains 33 Full-size Cases, size 16% × 32½ inches outside measure. These Cabinets have a uniform depth of one inch outside the front and are deep enough for all medium and small sizes of metal type without doubling fonts. Height of Cabinet 43 inches, correct for type-setting purposes.

No. 64 contains 28 Full-size Cases, size 16% × 32½ inches outside measure. These Cases are of four different depths; five Cases are % inch deep; ten Cases are one inch deep; ten Cases are standard, 1% inches deep and three Cases are extra deep being 1% inches, all measured outside the front. Height of Cabinet 43 inches, convenient for type-setting purposes when cases and brackets are placed on top.

No 69 is a two tier Cabinet containing 66 Full-size Cases size 18% × 32½ outside measure. There are

43 inches, convenient for type-setting purposes when cases and brackets are placed on top.

No. 69 is a two tier Cabinet containing 66 Full-size Cases, size 16% × 32½ outside measure. There are
33 cases in each tier, all these cases have a uniform depth of one inch outside the front and are deep
enough for all medium and small sizes of metal type without doubling fonts. Height of Cabinet 43 inches,
convenient for type-setting purposes when cases and brackets are placed on top.

No. 70 is a two tier Cabinet containing 56 Full-size Cases, size 16% × 32½ inches outside measure.

There being 28 Cases in each tier of four different depths; five Cases are ¼ inch deep; ten Cases are one
inch deep, ten Cases are standard 1% inches deep and three Cases are extra deep being 1% inches deep,
all measured outside the front. Height of Cabinet 43 inches, convenient for type-setting purposes.

All of the six special Cabinets mentioned above have a uniform height of 43 inches which is the con-

all measures outside the front. Height of Cabinet 43 inches, convenient for type-setting purposes.

All of the six special Cabinets mentioned above have a uniform height of 43 inches which is the correct height for type-setting purposes. These Cabinets represent an achievement in type case construction never before attained. Heretofore the most compact Cabinets have only contained 25 Cases in the height of 45 inches; here we have Cabinets containing 33 Cases all within a height of 43 inches and all of the Cases deep enough for practical purposes except for the very largest fonts of metal type. In the two Cabinets, No 64 and 70, containing Cases of four different depths, we have a result of 28 Cases within 43 inches and some of these cases are unusually deep thus accommodating the very largest sizes of metal type.

Proof Reader's Desk

A new article of printing office furniture which will be found useful in any printing office and indispensable in all large offices, where much proof reading is done. It is strongly and substantially built of

hardwood and nicely finished, of neat appearance, and conveniently arranged after ideas furnished by proof readers on some of the large daily papers.

There is a 12 inch back with retaining ends to prevent papers from falling off. In the center there is a 22 inch writing bed on a slope. This bed is 14 inches from front to back, with a 4 inch flat face at the back for inkstands, etc. This writing bed is hinged and can be raised. Underneath it papers can be conveniently kept and secured under lock.

In the table, underneath the writing bed, is a drawer, 22 inches in width, 17 inches deep.

At the end of the writing bed are two 7 inch spaces to accommodate copy spindles. Copy hooks are arranged on the back and ends, and a pen rack is also placed on the back, over the writing bed.

Roll-Front Case Racks

An entirely new feature in case racks. There has been a constant demand for a case rack that would take the old cases and utilize them in the form of a cabinet. Many printers have desired to do away with the ordinary case racks and substitute a cabinet, and thus increase the life of the type by keeping it free from dust; but on account of the expense involved and the fact that their old cases could not be sold or utilized, they have hesitated in making the needed improvement. This new case rack solves the problem. These Roll-Front Case Racks are equal to cabinets in every way, and they really are cabinets and not case racks in the ordinary sense of the term. They are fitted with steel runs, and they are thoroughly up-to-date. The roll front is fitted with the finest brass desk lock. A single lock secures the entire tier of cases. These racks are made of ash, finished in antique oak, same as regular high-grade cabinets.

Case Pulls 5 cents each

Handy Sort Cabinets

These cabinets are fitted with serviceable sort drawers which should supplant all of the cigar box and tin can arrangements. The drawers are 8×20 inches over all and 2% inches deep. The cabinets are very strong, made of hard wood and remarkably low-priced. The drawers, which are also for sale separately, have movable partitions and may be adjusted to the special requirements of any printing office. All drawers have strong bronze drawer-pulls, whether sold in cabinets or separately.

A picture of the drawer is shown below. Drawers are sold separately if required.

Sort Cabinets made to order to fit any space or to any dimensions at proportionate prices.

Twentieth-Century Unit Type Cabinet

One Unit, with Top and Base. Height 18% inches

With the use of Unit Cabinets additions can be made from time to time to meet requirements and provide for additional faces of type. No matter how many Units are built into a section the whole always presents the appearance of a complete cabinet. Each Unit has a total height of 12% inches. The base and top each add 3 inches to the height. There are five different depths of cases, the shallowest having an outside depth of one-half inch, allowing ample room for most 6, 8 and 10 point fonts of type. The bottom case in each Unit is of an extra depth, which will be found useful for holding fonts of 60 and 72 point and larger sizes of type. The top or cap pieces are made in style A and Style B. Style A is a plain cap piece, 3 inches high. Style B cap piece is also 3 inches high, but the space inside the cap is utilized by a blank drawer 30 inches long by 18 inches wide and 2 inches deep, inside measure. The moulding in front forms the front of the drawer, which is filled with small wooden sort boxes 3 × 3 inches in size—six rows in depth and ten rows in width, making a total of sixty sort boxes, 19-16 inches deep inside.

Prices of Unit Type Cabinets with Full Size California Job Cases

In ordering care should be taken to specify cap and base pieces as they are not included with order for Units unless specially mentioned.

Unit A, 10 cases various depths																					. 1	17	50
Unit B, 8 cases, 7 of regular depth																							
Unit C, 8 blank cases for electrotypes

The style Unit A has 10 cases of five different depths. The three top cases have an outside depth of % inch; the next two, % inch; the next one, 1 inch; the next three, 1% inch, which is our regular case, and the bottom case has an outside depth of 1% inches. This case is convenient for large poster fonts.

The style Unit B has 8 cases, 7 of which are of the standard depth as put in all our regular cabinets. The top case is shallower and has an outside depth of 1 inch.

Wood-Type Cabinets

Very substantially constructed of hard wood. The cases are slotted on the sides, and have movable strips which may be adjusted to Picas. The cases in the Mammoth Cabinet (23 × 44 inches) have a center bar, and cases in the Regular Cabinet (23 × 32 inches) have no center bar.

These Cabinets afford the most economical method of keeping wood type. The top of Cabinet is available for use in laying out lines. They save the time lost in climbing to shelves, and the wood type is kept clean and is less liable to warp.

Occupies 9 square feet of floor space and affords 140 square feet for storage

Wood-Type Case Racks

Rowen Border and Type Cabinets

No. 2 Rowen Border Cabinet with Six Drawers

These Cabinets supply the long-felt need of a proper receptacle for borders, keeping them in compact shape and preserving the face.

The cases in these Cabinets are 10 × 12 inches inside, and are tilted sufficiently to keep the type on its feet. The borders or type are held between movable division strips, which are 18 points wide, while the slots into which these strips fit are set 6 points apart, so that they can be adjusted to hold 6, 12, 18, 24, 30, 36, 42, 48, 54, 60 or 72 point bodies, while such irregular and seldom-used bodies as 7 and 9 point may be carried in the 12-point drawers, or special strips may be procured for them. For script type a quantity of metal pinch springs is furnished with each cabinet, for inserting between the different letters in

a font, so that if all the letters "d" are removed, the pinch spring holds the letters "e" on their feet. The advantages of keeping delicate scripts in cases where the faces of the letters are not subject to friction and scratching will be apparent to all.

Each case will hold 30 feet of 6 point, or 24 feet of 12 point, or 20 feet of 18 point, or 17 feet of 24 point, or 15 feet of 30 point, or 13 feet of 36 point borders.

Nos. 6, 12 and 18 Cabinets containing 60 Cases

Indexed Electrotype Cabinets

Fitted with the special case illustrated below, each furnished with strong adjustable slotted partitions, each case numbered in front, and each section in the case designated by initial label, for which a secure holder is provided. The cuts in each lengthwise section are separated and held in place by shallow crosswise slats. An Index Book is furnished with each cabinet is which the cuts are indexed as follows:

ORIG	HMAL	CUT		1	LLEC	TRO	YPE	
88.W4.88	9401100	B171510	NAME OF CUT	98745	1467108		T15/8	
12	D	3	Bicycle	31	В	1	2	3

13	В	8	Sewing Machine	35	В	1	2	3
12	D	4	Factory Plant	30	C	7		9

These Cabinets meet in every respect the requirements of not only printers but of all manufacturing concerns that use cuts largely. Printers will do a favor to their customers of this class by calling their attention to these new Cabinets. They are substantially and handsomely made of ash, finished in antique oak. The cases slide on steel runs, so that they take up the least possible space.

Case furnished in Indexed Electrotype Cabinets

Note that every cut is in a distinct compartment, and that as many sections and divisions of sections can be made as are desired. The plan of the index printed above refers to the case shown here.

Prices of Indexed Electrotype Cabinets

The fifty-case and sixty-case Cabinets are furnished in one or two tiers as desired

Special Notice.—The above prices include the cabinets fitted with a full equipment of division slats, including five of the slotted section divisions for each drawer in the two-third size cases, and six for each drawer in the three-quarter and full-size cases; also with a large assortment of cross divisions, in various lengths. Each drawer is fitted with a metal number plate, as shown in the illustrations on this page. One index book is furnished with each cabinet.

Flat-Top Sixteen-Case Electro Cabinet

Electro and Cut Cabinets

These Cabinets are filled with blank cases and are made of polished ash with bronze case pulls. The cases have extension backs. In addition to the ordinary use of the printer, these Cabinets can be recommended to advertisers for keeping their wood cuts, etc., for keeping samples of hardware, confectionery, fancy stationery, for seeds, and for many other purposes.

All sizes can be supplied with galley tops at an advance of \$3.00 on flat-top prices, but galley tops are not recommended except on 20-case cabinets.

See page 1024 for prices of Steel Run Cabinets with Blank Cases. Also page 1028 for prices of Porter Extension-Front Cabinets with Blank Cases.

Handy Letter Board Cabinets

For the storage and safe keeping of job work these cabinets are unrivaled. Their cost will be saved in a few months by the prevention of pi. They occupy a floor space of 16×19 inches, with letter boards of 12×15 inches inside, and are made of hard wood throughout, in a solid and substantial manner. Boards are closed at sides and back and are rabbeted in front to receive galleys. They are well-named "Handy." For job work within their size, these small boards are much superior to the larger boards usually put under imposing tables, as it is a back-breaking job to get a form from the large boards when they are full of type.

It is distinctly an economy to place dead and live forms in such a receptable as this, rather than to incumber useful space on an imposing stone, the type on which is always liable to damage. The protection they afford from dust is also worthy of consideration.

With 10 boards						. \$10 50
With 12 boards						. 12 00
With 16 boards						15.00

Other sizes made to order at proportionate prices

Handy Letter Board Cabinet with Sixteen Boards

Hard-Wood Letter Boards

Made of selected stock, smooth and true, with closed sides and backs, rabbeted in front to allow matter to slide on galleys easily. These boards have projecting backs so that they can be pulled out of the racks to the full extent of their inside measurements.

No. 3	32¼ × 20½ inches outside, fits full-size stands or racks	1 70	

Three-tier Galley Cabinet with Galley Top to hold Sixty-six Galleys

Galley Cabinets

Made of thoroughly seasoned Hard Wood in the most substantial manner

One-tier Flat-top Galley Cabinet to hold Twenty Galleys

Extra with

Particular attention is directed to the galley cabinets of larger capacity. They are very desirable in large offices and are designed to carry an immense weight of type safely. All these cabinets are made of hard wood. All flat-top cabinets are made same style as the one-tier cabinet illustrated above. All galley-top cabinets same as the three-tier cabinet shown on this page.

The galley-top cabinets are of much stronger construction than the flat-top, and may be ordered with with or without galley top, as desired, at the same prices.

			N	o. Plates	Weight	Price

Specimen Cabinets

For Holding Specimens of Job Printing

Made in ash. These Cabinets are handsomely constructed and will be an ornament to any office.

The drawers have movable partitions and are made in two depths-2½ inches and 5 inches. The No. 1 Cabinet is the proper height for placing letter-copying

The methodical classification and preservation of specimens in a cabinet enables customers to decide on what they want quickly and in many cases suggests other requirements. Let the people see what you sell and they will become buyers.

Dorsey Combination Pressroom Cabinet

Patent applied for

Plate glass top for mixing inks. Just below is a compartment for holding inks, oil cans, etc. Next below is a tool drawer 31/4 inches deep. Below the tool drawer is a V-shaped opening into which spoiled sheets and anything else of a waste-basket nature may be thrown, falling into a deep drawer below, that pulls from the rear side of the cabinet for emptying. In the lower part of the cabinet, protected by drop doors on spring hinges, there is a metal-lined rag compartment. The cabinet is mounted on castors and can be pushed about pressroom as required. Has been thoroughly perfected and tested by the best printers before being placed on the market and has received unqualified endorsement. Size of top 211/4 × 23 inches. Height to top of glass 40 inches. Shipping weight 150 pounds.

Dorsey Compositor's Working Cabinet

Patent applied for

This cabinet is the same height as the ordinary news stand. Sloping top for galley rest is the same size as the ordinary lower case. At upper edge of the slope there is a flat surface or shelf eight inches wide for copy, cuts, furniture, leads, slugs, etc. Galley rack or holder at side takes one job galley 15½ × 22 inches, one 12½ × 18 inches, and two regulation column galleys. Two drawers at top, each having two compartments. Below these are five letter boards for standing type. In the bottom there is a large open space for general storage purposes. A piece of composing room furniture that printers will like and several of them placed about large composing rooms will make it possible for compositors to expedite their work.

This cabinet occupies but little room and can be placed at the end of a regular case stand or type cabinet. The sloping top affords a good place for the compositor to lay out his work. Shipping weight 300 pounds.

Dorsey Compositor's Working Cabinet \$36 00

Bookbinders' Cabinets

Made of hard wood, with bronzed pulls on each case. The cases are made in exactly the same style as printers' cases. These cabinets occupy a space of 20 × 20 inches, and may be put on or under a bench. "A place for everything and everything in its place" is a rule bookbinders should live up to and these cabinets enable them to do so.

Manitowish Type Cabinet

Manitowish Type Cabinet

The Features Embraced in this Cabinet are as follows:

Sort Cabinet—A series of six Sort Drawers which run through the Cabinet and can be drawn from either side; each drawer divided into 16 compartments of equal size; each compartment will hold 5 pounds of type; each drawer 80 pounds, making the capacity of the six Sort Drawers 480 pounds.

Galley Cabinet—Two separate compartments, each compartment fitted with eight pairs of detachable Galley Brackets, giving storage to 16 Double Column Galleys. Spring roll curtains, Yale locks.

Manitowish Type Cabinet

Galley Drawers—A series of six Tilted Galley Drawers immediately above the Sort Drawers in the center of the Cabinet. These Galley Drawers run through the Cabinet and can be drawn from either side. Compositors can dump type into these Galleys while working at the Cases and the Galleys can be withdrawn from the Cabinet and carried about the office as required. These inclined Galley Drawers are furnished full brass lined or all wood with heavy bottoms as desired.

Galley Boards—The usual Galley Boards accompany the Tilting Brackets and are fitted under the lower Cases. Each board will hold a Double Column Galley. There is also a Galley Board for holding a Quarter Size Rule Case or other Quarter Size Case between the two Lower Cases, as illustrated.

Galley Dump—This Dump is of an improved pattern with a blank working space at each end. The central part is arranged into a Lead and Slug Bank with a division bar through the center. This Lead and Slug Bank is fitted with adjustable divisions and the rim and center divisions are slotted by variations of single picas so that the Bank can be arranged for lengths as required and changed at will.

Brackets—Two pairs of Patent Tilting Brackets support the News Cases and there are 16 pairs of detachable Galley Brackets. There are three special iron Brackets which support the full length Bank.

Manitowish Type Cabinet—Continued

Cases-In the body of the Cabinet there are 60 Full Size California Job Cases all coming within the height of 41 inches from the floor to the flat top-something unprecedented in Type Cabinet construction. There are 30 cases in each tier and like the Unit Cabinet these cases are arranged in three series of ten cases each. The cases are of varying depths same as the Unit Cabinet, as follows:

- 3 top Cases of each series have an outside depth of % inch.
- 2 Cases have a depth (outside) of ¾ inch.
- 1 Case has an outside depth of 1 inch.
- 3 Cases have an outside depth of 1% inches.
- 1 Case has an outside depth of 1% inches.

The shallow cases are the most convenient for the laying of small sizes of type and the deep cases for large sizes. Large poster fonts can be conveniently laid in the 1% inches case in each series, of which there are six in the Cabinet. This arrangement of cases shows a gain of 25 per cent in case capacity over any other Steel Run construction made.

List Price and Condensed Description of Manitowish Type Cabinet

Occupies floor space 75 × 30% inches.

Height from floor to flat top 41 inches

Cabinet for Monotype Parts

This Cabinet contains two trays, holding six molds. The trays are divided so that it is impossible for one mold to touch or scar another. Two shelves are provided for wedges; each shelf divided into fifteen spaces. A place is thus provided for each wedge where it can be instantly found and where it cannot be marred or injured.

There are 28 spaces for Matrix Cases

There are four Sort Drawers. These Drawers are divided into thirty-seven grooves in which the Matrices are stood on end. A bar across the center of the Drawer divides it so that the Matrices, taken from the Matrix Case in changing, are put above the bar in the same groove from which the Matrices below the bar are taken to replace those in the Matrix Case

ne Matrix Case. Suitable holders are provided for all tools, as shown by the illustration, including wrenches, screw-drivers, pica gauges, etc. These are placed upon the door of the Cabinet, on metal pegs. Shipping weight 75 lbs.

Monotype Cabinet, complete \$22 00

Mail List Cabinet

This Cabinet is made to hold the entire Mail List outfit. The first space is a cupboard to hold mailing machine, roller, etc. The middle space will hold 30 galleys of either the Rukenbrod or Mustang pattern, or 15 regular wide brass mailing galleys. The third space contains 7 sort drawers. Iron brackets can be attached to this Cabinet to hold a pair of cases. The Cabinet is made of ash and finished in antique oak. It is a handsome piece of furniture, well and substantially made and will be found of great convenience and economical value. Shipping Weight 250 pounds.

. \$27 00 Iron Brackets for type cases, per pair .

The center division is the proper depth to take full length 30-inch Mustang Mailing Galleys.

Handy Galley Cabinet

This Cabinet with its accompanying small wooden galleys provides a cheap and convenient receptacle for the storage of an immense amount of matter. It can be put to a variety of uses such as the storage of sorts, script type, borders, ornaments, cuts and small forms of tied-up matter. The Cabinet is 60 inches high and 31 inches wide and 9 inches deep, outside dimensions. The galleys are arranged in 4 tiers, 29 galleys in each tier, or 116 galleys in the Cabinet. The shelves in the Cabinet are

THE GALLEY
Size 6 × 5% inches wide

pitched on a heavy incline so that type matter will stand on its feet without danger of being pied. The backs of the galleys are beveled on the outside as shown in the illustration to fit the incline of the shelves. These Cabinets and galleys are in extensive use among type founders for the storage of sorts. Experience has taught them that this is the most convenient and economical arrangement yet devised. Printers will find this a most excellent addition to the equipment of modern printing office furniture. Shipping weight, including galleys, 210 pounds.

Standing Galley with Letter Boards

No. 10 Standing Galley with 20 Letter Boards and Galley Racks

Specially Constructed and Designed for use in Offices Requiring Large Storage Room for Type Forms

The letter boards can be utilized for large and tied-up forms while the small matter and untied forms can be accommodated in the series of galley racks at one end that will take in 26 triple column brass lined galleys. Frame is substantially constructed to stand great weight. Letter Boards are made of hard wood with side rails mortised to bottoms as shown in the illustration. When top is brass lined it contains over 40 pounds of fine hard rolled sheet brass the whole top being covered and all division strips lined on both sides with strips of sheet brass fastened with screws placed at intervals of 2¼ inches. The zinc lined top contains over 50 pounds of heavy sheet zinc. Length over all 8 feet, depth 27 inches, height in front 36 inches, height at back 46 inches. Size of letter boards is 24 × 30½ inches inside.

Brackets

The New York Case Bracket is one of the best ever brought out. It was made originally in connection with the New York Stands shown on page 1018, and its use in connection with this stand proved a saving of 40 per cent in floor space occupied. The Bracket is so made that the upper case is raised above the lower and brought forward closer to the compositor's hand while not obstructing the figure boxes of the lower case.

Challenge Lamp Holder

A most convenient and safe attachment for holding a lamp over the compositor's case. It will be readily understood by reference to the cut that the fount holder A can be instantly raised from C to B, as shown by the dotted lines, to adapt the position of the light to suit the compositor. Small

thum screws at the top of B and C, with suitable recesses in A, retain the light perfectly stationary in any position.

Working Galley or Job Bank

16% × 3214 inches, same as Full Size Case

The entire surface including the main working space and the other compartments for sort boxes, rule cases, etc., is full brass lined with heavy sheet brass. All division strips are also brass lined on both sides. The brackets are of cast iron japanned, and fit into removable sockets which can be fastened to the end of a cabinet as shown, to the wall, or any convenient place.

Description—At the right is a compartment into which can be placed a quarter size rule case like the Harris Case shown. At the top is a space 4½×18 inches filled with 16 removable type or sort boxes with metal bottoms screwed to the rims. At the upper left hand corner is a space 4½×4½ with a heavy zinc cover. This space is for working tools like imposing rule, bodkin, etc. At the front is the main working space, size 9½×23 inches, with open end at the left fitted with a lip on open end to serve as a rest for brass galley. Type matter can be quickly and safely transferred from the galley to Working Bank. Weighs complete with sort boxes and brackets, 56 pounds.

Form Racks

The Form Rack illustrated herewith meets all the requirements for strength and space They are strong and substantially built, nicely finished of hardwood the same as our regular line of cabinets, and take up a surprisingly small amount of floor space considering the number of forms accommodated. The three bottom boards where the forms rest are covered with iron turned at the edges and firmly fastened as shown in the illustra tion. This prevents wear and tear which would otherwise occur when heavy forms are pushed into the racks. The use of these racks will clear up the office, allow more stone room and minimize the danger of pied forms.

Lower compartments in all Racks are 36 inches in the clear, middle compartments 24 inches and upper compartments 13½ inches.

Ideal Form Truck

Ideal Form Truck No. 2

This is an improved style of Form Truck, made with the trough for holding the chase hung below the center, making it very much easier to handle a large chase with a heavy form. The axle is made of steel, and consequently it is practically indestructible. The Ideal Form Truck will be found an indispensable adjunct to every well-equipped press room, and will prevent accidents which frequently happen in sliding chases along the floor. Made in two styles, with iron tire and with rubber tire.

Wrought Iron Horizontal Standing Galley

The Wrought Iron Standing Galleys with columns running horizontally (see cut) have iron racks and all-brass tops. The brass strips screwed on top are L-shaped making the partitions only a little wider than column width, but leaving enough room for the fingers to lift the type, thus reducing the width of the top, making it more convenient to reach the upper rows. The columns are made to any desired length and width. The cut on this page shows the No. 6 size, which is 12 feet long with iron racks for 32 full-size cases.

Cabinets for 56 Double Galleys, 1639 yards Reglet and 888 yards Furniture, cut labor saving from 12 picas to 216 picas long, 11 Letter-Boards, $24\frac{1}{2} \times 50$ inches, 6 Drawers for Metal Furniture, that run clear through to each side of frame. Shipping weight 2,800 pounds.

Wisconsin Imposing Stone Frame

Fitted With Blank Cases, Chase Racks and Drawers for Metal Furniture

Wisconsin Imposing Stone Frame. Size of Stone 36 × 60 inches

This will be found a most useful Imposing Stone, containing as it does racks for large sizes of chases, furnished with plain Blank Cases as shown in the illustration, or with Ixdexed Electrotype Cases.

On one side of this frame there are twenty-eight Cases, size inside 15x26 inches. These Cases are arranged in two tiers, fourteen Cases in each tier.

On the other side are Chase Racks, as follows:

9 Compartments,	size																			26	× 1	8
9 Compartments,	size																			14	× 1	8
9 Compartments.	size																		11	146	× 1	5

At the top are two Drawers running through the frame, and they can be drawn from either side. Size inside is 36½ x 21 inches and 4 inches deep. These are for Quoins, Tools, Furniture, etc.

The bottoms of Chase Racks are covered with heavy iron, turned at front edge and securely fastened, thus preventing injury to the frame by the iron chases when pushed into place.

The top of the stone is 38 inches above the floor. Shipping weight 1,100 pounds, including the stone.

Wisconsin Imposing Stone Frame. Size of Stone 36 × 60 inches

Utility Imposing Stone Frame

Utility Imposing Stone Frame. Size of Stone 26 × 44 inches

In the new Utility Imposing Stone Frame every inch of space is utilized to the best possible advantage. Notice the handy drawers at the top, accessible from both sides of the frame. Two of these are for the storage of metal furniture, the other two will accommodate quoins, tools, etc., needed by the make-up man.

Utility Imposing Stone Frame. Size of Stone 26 x 44 inches

One side of the frame is filled with a convenient assortment of Labor Saving Furniture ranging in width from 2 to 10 line, and in length from 12 to 60 picas. It also contains a double rack filled with non-pariel and pica Reglet ranging in length from 12 to 60 picas.

The other side of the frame contains eleven Letter Boards and eight Sort Drawers. Every printer knows how handy these are. Why pay rent for waste space under the stone? The Utility will prove a profitable investment to any printer in need of a medium size stone frame.

The Kaufman Imposing Stone Frame

Fitted with Letter-Boards, Sort Drawers, Galley Racks and Indexed Electrotype Cases

33 Letter-Boards in Back of Frame

Size of stone 40×80 inches. Sixteen Sort Drawers each having 10 compartments $3\times4\times3$ inches inside. Two top drawers, on ends, are $16\times40\%\times2\%$ inches, extending clear through the frame, opening from each side. Two small drawers in center for metal furniture, $16\times40\%\times1$ inch, opening from each side of frame. There are 11 letter-boards, $15\times23\%$ inches inside, and 22 letter boards 15×20 inches inside, all having back and side rails to keep the type in place. Galley Racks to hold 15 single and 45 double galleys. There are 18 special Indexed Electrotype Cases 20×20 inches inside, with long and short division strips. Cases have brass numbers and there is an indexed book for listing cuts. Shipping weight 1,750 pounds.

Coffins-When coffins only are desired they can be had in any size at 75 cents per running foot the long way.

A "coffin" is a hard wood frame which serves as a bed for the stone, protects its edges, and affords a rest for galleys when used for sliding off matter.

Iron Top Imposing Table

There is no imposing surface which can compare for durability and satisfactory service with the Iron Type Imposing Table. This will outlast marble or slate twenty times over and will always be in good condition. The iron imposing surface is made of 1% to 2 inch stock, the thickness of the stock depending upon the size of the surface. They are heavily braced underneath by strong webs running in both directions. The surface is planed perfectly flat and is free from sand and blow holes and other imperfections. The iron imposing surface is used without a coffin, thereby increasing the working space. Can be furnished with a brass covered top if desired.

Iron imposing surfaces of any size made to order at uniform price of 3 cents per square inch. They are usually made with a three-eighth inch rabbet on all sides, but this may be increased or decreased as desired. Surface as large as 60·120 inches can be supplied in one casting, but it is recommended that all sizes above 80 inches be made in two or more sections. When this is done the sections are accurately fitted together and held in their proper position by means of dowel pins, at no extra charge over the price of 3 cents per square inch.

Texas Imposing Stone

With Fifty-six Letter-Boards and Twenty Sort Drawers

Size of stone 40 × 80 inches and 2 inches thick. Height from floor to top of stone 421/2 inches

Sort Drawers—There are twenty drawers for sorts and each drawer is subdivided into twenty equal compartments. Each drawer is $2\frac{1}{2}$ inches deep, 14 inches wide and 40% inches long, inside measure. Each of the four hundred compartments is $3\frac{3}{4} \times 6\frac{3}{4}$ inches. Ten of these drawers are at each end of the frame and all run clear through and can be drawn from either side. Each drawer runs on twelve steel rollers, fitted into the runs on which the drawer rests, six on each side.

Letter Boards—In the center, arranged in four tiers (two tiers drawing from each side) are fifty-six hardwood letter boards, fourteen boards in each tier. They are 18½ by 19½ inches, inside measure. They are lipped in front to receive the galley and have raised rims at sides and back.

Dorsey Imposing Stone

Size of stone 40 × 80 inches and 2 inches thick. Height from floor to top of stone 411/2 inches

Drawers—Six small drawers and three large drawers. Three of the drawers reach clear through and the balance extend half way. The small drawers are % inch deep by 11½ inches wide, to hold metal furniture. The larger drawers are 3 inches deep by 22½ inches wide.

Chase Racks—At the bottom are 36 chase racks for 8×12 presses as shown in cut. On the opposite side are racks for 18 chases for 10×15 presses, and 18 racks for chases for 12×18 presses.

Furniture Racks—Hold 500 yards oil-soaked furniture cut into 1562 pieces—a larger assortment than is found in the Mammoth Furniture Case.

Reglet Rack—This Center rack is made to hold either cut reglet or steel furniture. Each compartment will hold 35 pieces of pica reglet of each of the following sizes: 12, 15, 18, 21, 24, 27, 30, 35, 36, 39, 42, 45, 48, 51, 54, 57 and 60 ems. There are four compartments for the 42-em size and two compartments each for the other sizes.

Economic Imposing Stone Frame

Economic Imposing Stone and Frame. Size of stone 24 × 36 inches

The new ECONOMIC Imposing Stone Frame illustrated here, is rightly named. By its use the make-up man can economize in both time and labor in making up the forms.

Notice the handy drawers at the top, accessible from both sides of the frame. Two of these are for the storage of Metal Furniture, the other will accommodate Quoins, Tools, etc., needed by the make-up man.

One side of the frame is filled with a convenient assortment of Labor Saving Furniture, ranging in width from 2 to 10 line, and in length from 12 to 60 picas.

The other side of the frame contains eleven Letter Boards. Every printer knows how handy these are for holding tied-up matter and cuts.

Why pay rent for waste space under the stone?

The Economic will prove a profitable investment to any printer in need of a medium size stone frame.

Movable Drying Racks

The frames of both these racks are of hard wood, bolted together and mounted on strong casters so that they can be easily moved when loaded. The shelves of the Chicago Rack are framed all around with hard wood, while those of the New York Rack are framed on ends only.

No. 1 New York Drying Rack

No. 6 Chicago Drying Rack

New York Drying Racks

No. 1 20 shelves each 24 × 36 inches No. 2 30 shelves each 24 × 36 inches	 \$19 00 23 00	No. 3 20 shelves each 28 × 42 inches No. 4 30 shelves each 28 × 42 inches		\$23 00 32 0	
					-
Extra shelves 24 × 36 inches, per doz.	 6 00	Extra shelves 28 × 42 inches, per doz.		. 90	o

The No. 1 rack (the cheapest) gives a drying area of 120 square feet, while actually using only six square feet of your costly floor space.

Chicago Drying Racks

No. 5 12 shelves each 2×2 feet \$19 00 Extra shelves 2×2 feet, per doz 6 00	No. 6 10 shelves each 2 × 3 feet
No. 7 10 shelves each 2½ × 4	feet \$26 00
Extra shelves each 2½ × 4 fe	et, per doz 12 00

This rack is the most substantial movable Drying Rack made. Although it has fewer shelves than a New York the extra space between the shelves is a distinct advantage as on small jobs the sheets can be handled without moving the shelf on which they are placed. When not in use the shelves may be put out of the way as shown in illustration.

Patent Steel Furniture

Has been in satisfactory use in the largest offices for years. Made of machinery steel on regular bodies, guaranteed accurate to point system and thoroughly reliable. Invaluable for use in color work and blank work as it eliminates the trouble arising from shrinkage due to changes in temperature, experienced in use of wood furniture. In blank work the steel furniture can be quickly thrown around the blank spaces instead of filling them in the ordinary way with wood or metal furniture. It pays for itself many times over in the time and trouble saved as well as in the accuracy secured over the use of ordinary material. Write for descriptive circular giving sizes and prices.

Cast Iron Furniture

Made light in weight but braced to withstand the maximum lock-up strain without deterioration. It cannot be "locked" out of shape, does not change size when heated and its use decreases the liability of spring in the form. Made in the regular standard laborsaving sizes and guaranteed accurate. Write for descriptive circular and prices.

Hamilton Patent Cutting Stick

Consists of a main body piece (A), made to fit the groove of your paper cutter. The body piece has a groove or recess in it which holds a small strip (B) one-quarter of an inch square. This removable strip is a cutting surface and is held in place by a steel clamp (D). The cutting strips being square can be used on four sides, giving the same service as the ordinary sticks.

See that B?

- A is the body piece made to fit groove in cutter.
- B is the cutting strip on which knife strikes. It is one-fourth inch square, and is just as effective as if it were one and one-quarter inches square, also cheaper and always fits.
- C is the steel clamp which holds the cutting strip and prevents warping.
- D is the screw which grips the clamp to the body piece.

How to Order

1—Give size square the main body piece is to be. Be particular on this point and see that groove in cutter is accurately measured. 2—Give length of stick. 3—State how far from front edge of stick the knife strikes. 4—State whether knife cuts from right to left or left to right. In ordering cutting strips give the exact length required. All strips are cut to a standard uniform gauge and are sure to fit.

John Thomson "Colt's Armory" Printing Presses

Sizes and Styles—The Quarto Medium is built in the Style One and Style Two constructions. The Style One is provided with two form rollers and the Style Two with three form rollers.

The Half Medium and the Half Super Royal are now built in the Style Two-A, Style Five-A and Style Six-A constructions.

Adaptations—The Quarto Medium Style One is a high-speed press. It can be operated quite as rapidly as the "disk" type of machine; can be made ready more quickly; has far more effective distribution, and will produce better results.

The Quarto Medium Style Two is better adapted, through its greater distribution, for halftone and color printing.

The Half Medium and the Half Super Royal in the Style Two-A construction are equal to the average requirements of high class printers.

The Half Medium and the Half Super Royal in the Style Five-A construction are much stronger machines than the Style Two. They are adapted for all that the Style Two is capable of doing and also for a much heavier range of work, especially in the way of halftone, chromotype and tint printing.

The Half Medium and the Half Super Royal in the Style Six-A construction are modifications of the Style Five, adapting them for nearly all that can be done on the Styles Two and Five and also for certain classes of embossing, book-cover stamping and the like, hot or cold.

^{**}Outside pinion-shaft support furnished only for Style 5A and 6A Presses, in half medium and half super-royal sizes.

Operation of Cutting and Scoring Presses

Operation of Cutting and Scoring Presses

The usual rate of operation in regular practice is from 20 to 30 impressions a minute, that is, 1200 to 1800 an hour; but 2100 and even 2400 an hour is not infrequent. In this connection, attention may be called to an important physical principle, too frequently overlooked, namely: that the pressure which may be obtained increases much more rapidly than the rate of operation. In other words, one relation is direct, and the other is as the square of the velocity. Thus, say, while an increase of operation from 1200 to 2400 impressions an hour would double the speed, or as 1 is to 2, this makes it possible to obtain four times the pressure between the bed and the platen, or as 1 is to 4. Hence, while it is not possible to overload the press at the lower safe speeds, that is because the fly-wheels will "stall" and not carry over, it is quite possible, due to the greatly increased momentum or kinetic energy, to do so at higher speeds. Therefore, the safer practice is to have all the heavy forms, which are intended to be fed at fast speed, first made ready at a lower speed. This establishes the pressure; and after that the only limit to the speed is the character of the job and the ability of the feeder. In fact, this is good practice for another reason, namely: it calls for more skill in the make-ready and increases the "life" of the die.

NOTE: - A new enlarged model "Colt's Armory" Crank Action Cutting and Scoring Press will shortly be ready for the market. Size 28 × 41 inches inside of chase.

John Thomson Press Company's "Colt's Armory" **Cutting and Scoring Presses**

The Style 5 Press differs from the Style 4 Press as follows: The frame is of an entirely new design and is about 4 inches higher; therefore does not require to be raised from the floor to bring it up to proper feeding height; actual dimensions of base are 42 × 48 inches as against 31 × 42 inches of the Style 4. It therefore covers considerably more floor space, which is an advantage, and especially so on weak or shaky floors. It weighs 4,370 pounds groes 3,365 net.

Size inside of regular cast-iron chase 20 × 30 inches. Special patent built-up steel chases size inside 20% × 32 inches, furnished to order price \$7 each net. Face of platen 20% × 32 inches. The standard adjustment between the bed and the face of the platen cutting plate is for "type high," 0.920 inch, cutting rule. Steel cutting plate ½ inch thick.

Floor space without feed tables, 54 × 62½ inches. Face of feed table, 18 × 28 inches. Floor space of table base, 18½ × 18½ inches. Space through which press will pass assembled 54 inches; wholly dismembered 42 inches. Center of pinion shaft to floor 24 inches. Face and diameter of loose and driving pulleys, 3% × 17% inches. A double belt is recommended width 3½ inches. The fly-wheels must revolve toward the feeder; they make 5½ revolutions to each impression.

Style 5 "Colt's Armory" Crank Action Cutting and Scoring Press . Steel Cutting Plates 20% × 32 inches, extra as wanted, each 8 00

Feed tables and standards, steel platen plate and six chases are furnished with the press,

Gally Universal Presses—Continued

Gally Universal Style No. 3

This style differs from Style No. 2 in that it is more powerful and more heavily built, and has been constructed with reference to handling the finest grades of commercial printing. It has heavier fly-wheel with outside floor support and extra wide driving pulleys for wide driving belt. This press will do successfully all kinds of regular printing-office embossing, and in its different combinations is adapted to hot or cold work. The following different combinations of special devices have been made adapting the No. 3 to different kinds of special work:

Gally Universal Style No. 3 Combination A

For letterpress printing of the highest grade, cold embossing, stamping, and all work that can be executed on a platen set to print at the height of type. List prices:

Quarto Medium	10 × 15 inches inside chase	\$450 00
Half Medium	13 × 19 inches inside chase	
Half Super-Royal	14 × 22 inches inside chase	650 00

Gally Universal Style No. 3 Combination B

For letterpress printing and (in addition to all work that can be done on Combination A) book-cover inlaying, and cutting and creasing. This combination is fitted with a movable ¼-inch steel platen plate and a movable ¼-inch brass platen plate, the latter for use in cutting and creasing. List prices:

Quarto Medium	10 × 15 inches inside chase	
Half Medium	13 × 19 inches inside chase	

Gally Universal Style No. 3 Combination C

For letterpress printing and hot embossing (in addition to all work that can be done on Combinations A and B). This combination is fitted with steam blank and pipe connections %-inch thick, movable %-inch steel plate on steam blank, a movable %-inch steel platen plate, a movable %-inch brass platen plate, one cast-iron .475-inch platen plate with tympan clamps attached. This combination is fitted for use with dies ¼-inch thick. List prices:

Half Medium	13 × 19 inches inside chase	. \$738 00
Half Super-Royal	14 × 22 inches inside chase	. 800 00

Gally Universal Style No. 3 Combination D

For letterpress printing, printing on wood (not exceeding one inch in thickness) and cold embossing. This combination is fitted with a %-inch movable platen blank and a %-inch movable steel platen plate, %-inch rubber plate. Cutting and creasing can be done on this combination by adding a %-inch brass platen plate. List prices:

Quarto Medium	10 × 15 inches inside chase	
Half Medium	13 × 19 inches inside chase	
Half Super-Royal	14 × 22 inches inside chase	. 679 00

Gally Universal Style No. 3 Combination E

For letterpress printing, printing on wood (not exceeding one inch in thickness) and hot embossing, and all work that can be done on Combination A, B and C. This combination is fitted with steam blank and pipe connections, %-inch movable cast-iron platen blank, one .405-inch movable cast-iron platen blank, %-inch steel platen plate, a movable steel plate on steam blank and a movable ¼-inch brass platen plate, %-inch rubber plate. List prices:

Half Medium	13 × 19 inches inside chase	. \$738 00

Gally Improved Universal Printing Press

Gally Universal Style No. 4

To meet the demand of those printers who require a larger press than the $14 \cdot 22$ inches; to publishers using ready prints, in small towns, for one-page work; blank-book makers and others, who do not have constant need for a cylinder press, we offer the Style No. 4 Universal. This press is built in one size only, 17×25 inches inside chase, on new lines and no expense has been spared in this new production, now offered to the trade for the first time.

The frame is of a solid, modern design and is proportionately heavier than the 14×22 inches; the bridge, fly-wheel, hook connection and cam lever are heavier; the cam-way in the large gear wheel is of an improved design, requiring a larger friction roller; the gear wheel has the steel section in the rim like the Style No. 2 and Style No. 3 Universals; the carriage ways are of a new design, the carriage slot being perpendicular its full length; an adjustable counterweight to balance the weight of the carriage, when carrying one, two, three or four form rollers is a new feature; this press has the long pinion shaft with the outside floor support like the Style No. 3 Universal and the new style double inking device without springs is a part of the regular equipment.

The following small parts are included: five steel chases, one roller mould (for which a set of cast rollers will be substituted, if preferred), six form roller stocks, four distributer roller stocks, two vibrator or ductor roller stocks, twelve roller wheels (six large and six small) two iron lateral distributers or changers, two feed tables and one set of wrenches. No treadle fixtures are supplied with this press. Each press is shipped with ink fountain and side power fixtures, including tight and loose pulleys, and the improved belt shifter and brake combined.

Gross weight complete, crated for domestic shipment, 3300 pounds. Floor space required including feed tables and stands in position, 40 inches from front to back and 60 inches sideways. Pulleys, 16 inches diameter with 3% inches face, carrying a 3½ inch belt; the fly-wheel makes eight (8) revolutions to each impression and the press will require about 1½ H. P. to operate it.

Gally Universal Paper-Box Cutting and Creasing Press

See "Paper-Box Making" note on this page

This is the only Cutting and Creasing Press on which the cutting form can be placed out of center without injury to the cutting rule or detriment to the work. Mr. Gally's latest patented improvement on these presses holds the platen to perfect register on an unbalanced form. This is a very important matter, as is fully understood by all those engaged in the manufacture of folding paper boxes and similar articles.

Making Folding Paper-Boxes

The process of making folding paper boxes is simple. The stock used is manila board, made specially for the purpose. A cutting and creasing press is the same as an ordinary printing press, except that it is larger, has to be stronger, and does not require an inking apparatus. The shape of a box having been decided on, a form is set up with steel cutting and brass creasing rules. He former to cut out waste margins and to make slits, and the latter to crease or score the lines on which the stock in the box must bend when set up for use. It is usual to cut and crease as many boxes at one time as can be cut out from a full-sized sheet. The box leaves the press flat. It is then folded once and glued on one edge, and delivered flat. Any printing required is done before cutting and creasing. Any good compositor will understand the process after reading above explanation and examining a folded paper box. The glueing is done by a machine of moderate cost.

Gally Universal Stamping Press

This is a very powerful press, built especially for stamping book covers, making signs and photo-mounts. The only fast-running press made that is sufficiently powerful to do this kind of work satisfactory. Speed at least 1800 impressions per hour.

1068

Gally Universal Embossing Press

These are the largest Embossing Presses made, and combine strength, power, speed and facility for handling work easily in a degree equaled by no other press. They are designed for extra heavy hot or cold process embossing, and book-cover stamping ("smashing"). Nothing better demonstrates the correctness of the mechanical principles on which Gally Universal Presses are built than their applicability to all degrees of power and strain. Every other type of platen press has its limitations—a point where it gets unwieldy and inefficient.

American Job Press Counter, price

The Peerless Job Press

Peerless Speed—Rapidity without noise or jar. Easy to feed as there is an absolute rest for that purpose. Easy to run by treadle. Quick makeready.

Peerless Comfort—All the impression screws in sight and easy to get at. The throw-off arrangement has a natural movement and is very handy. The gear-wheel is placed below the feeding level—an important advantage over the obstructing gear of Gordon presses. No obstructions to feed or delivery.

obstructions to feed or delivery.

Peerless Impression—Has a very powerful compound toggle movement with stalwart supporting side arms. The full force of the impression acts directly upon the center of the platen, making the Peerless platen strongest where all others are weakest. All movements are direct and do not depend on fast-wearing cam rollers and cam ways.

Peedless Strength and Drughliten.

Peerless Strength and Durability— Proved by the numerous Peerless presses which are in use for embossing and extra heavy work. No other disc press has been found able to stand this strain. The small amount of repair bills on presses put to these exceptional uses is further proof of their strain-bearing capacity.

Muller Patent Halftone Softening Hammers and Punches

Invaluable in pressrooms where halftone or process plates are used, as their use on the first job usually results in a saving which more than equals their first cost. Used for softening the harsh edges of vignetted cuts, whether original halftones, electrotypes, stereotypes or wood engravings. The Hammers are made with lines on each end to match any screen and the edges are softly tapped thus softening them as if by magic. Unlike a hand tooled edge, the effect of the Hammer is not noticeable on the printed page, but the vignetted edge or other lightened spot appears as if it were re-etched and not touched with a tool.

Stereotyping Machinery and Supplies

Estimates furnished on all kinds of Stereotype machinery for use in newspaper offices including Hand Matrix Roller for Cold Process Stereotyping, Steam Drying Table, Stereotype Furnaces for coal or gas, Automatic Locking Casting Boxes for 6, 7 and 8 column pages, Trimming Machine with connected Electric Motor. Write us for estimates.

Cranston Newspaper Press

Two-Roller with Rack and Cam Distribution

The castings of the box frame style are solid, not only giving the press a massive appearance, but the required resistance for heavy impressions in cut work and with full forms. The sizes are desirable ones for general book and newspaper work, taking a full-size newspaper form without crowding.

The press is fitted with air springs with extra long cylinders and adjustable plungers, tapeless delivery, with wheels adjustable to any size sheet; simplex slider motion—the simplest device known for regulating the motion of the sliders; brake, rack guard; iron feedr's stand; feed guides that are capable of finest adjustment; large size form rollers, register rack and segment; deep fountain, with cover, which will hold a large supply of ink; a simple adjustment for regulating the fountain roll, and rack and cam distribution.

The extrinser mettion is smooth and poisoless in operation.

The gripper motion is smooth and noiseless in operation.

The gripper motion is smooth and noiseless in operation.

The tracks have solid ends with oil reservoirs, which prevent any leakage of oil from the ends of the track. The track steels are heavy and dove-tailed into the casting. The track is supported under the impression by two heavy girt studs, which rest directly on the girt and hold the track firmly in place

impression by two heavy girt studs, which rest directly on the girt and hold the track firmly in place under the impression.

The bed has steel runners and is heavily webbed, and is additionally supported under the impression by two truck rollers which can be adjusted by means of eccentric bushings.

The fly cam is continuous. The fly is carefully balanced, is supplied with adjustable fingers, and can be removed in a moment from the press.

The middle tapeless delivery pulley is solid on one side, to permit of the use of a sheet slitter—which can be furnished, if desired. The tapeless delivery pulleys are removable instantly to any position on the shaft.

can be furnished, it desired. The tapeless univery puritys are temporary the shaft.

We have recently placed on this machine new fountain brackets, carrying the fountain high up above the form. This arrangement permits the raising of the steel distributer roller, so that the form rollers, which are of iron pipe, can be easily and quickly removed from the machine.

Each machine is furnished with hard packing, wrenches, two sets of roller stocks, one set of which is cast ready for immediate use, and a complete countershaft.

Cranston Improved Newspaper Press

With Back-up Motion

Cranston Improved Newspaper Press has all the features of the Cranston Newspaper Press, and in addition, it has a long register rack and segment and a back-up motion. The back-up motion is so arranged that it can be operated by foot pedal when the belt is on the loose pulley and the machine backed up at quarter speed. The back-up parts are all of iron and steel, and are substantially constructed on correct mechanical principles, and do not get out of repair. The new style back-up motion is an excellent feature of the machine and can be recommended.

Other Cylinder Presses

Styles and Sizes for all Purposes

For the best makes of Cylinder Presses, the printer may confidently rely upon the American Type Founders Company. We sell the leading two revolution and drum cylinder presses, in all styles and sizes. Our knowledge of Cylinder Presses, and our close relationship with the makers of such machinery, may be taken advantage of by printers everywhere by simply applying to our nearest house. We can promptly and adequately supply the Cylinder Press needs of any printer. Write us for prices, etc.

Whitlock Two Revolution Pony Press-Two Rollers

F. o. b. Factory

Built with front fly delivery as shown above or with carrier (printed-side-up) delivery

One of the most profitable investments for the up-to-date printer. It does a great deal of work formerly run on job presses. It is so constructed as to be alike available for the printing of half tones in black or three-color as well as blanks, headings, booklets, etc., etc. Embodied in its construction are the main features of our Four Roller Press. The Simple, Swift and Smooth Running Bed Motion, the Heavy Sole Plate, the Box Type Bed, the Closed Periphery Cylinder, the Tipping Fountain, the Trip and Backup motion, etc., combine to make it easily the Simplest, Swiftest, Smoothest Running, Most Durable, Most Convenient, Most Productive and hence the Most Profitable of all Pony Presses.

Manufactured in two sizes

Bed 2	27 × 31	Type 22 × 27	Sheet 24 × 29	Speed	3000 per hour
Bed 2	27 × 40	Type 22½ × 36	Sheet 25 × 38	Speed	2600 per hour

Each press is furnished with hard packing, slitter, counter, jogger, two sets of stocks (one set cast in lieu of moulds) press tools and steam fixtures (or large pulley and out-board bearing for direct belted motor.)

Whitlock High Speed Two Revolution Newspaper Press

F. o. b. Factory

Built only with Tapeless Rear Delivery

In this Press are incorporated all the essential features of our Four Roller Press. It has a Heavy Sole Plate, Four full length Tracks supported by the double arched Center Girder with Box Type Bed and Closed Periphery Cylinder, four Air Springs, Trip and Back-up Motion. The Two Roller Rack and Screw Distribution is ample and efficient. The Tapeless Rear Delivery permits of the ready attachment of direct connected Folding machine. The Press throughout is Simple, Convenient and Durable. It is the fastest Two Revolution Newspaper Press built. While guaranteed to run up to 2000 per hour on a good foundation, many users run it at 2300 to 2500 per hour. The best press unquestionably, for small dailies with circulation of from one to five thousand.

Made in one size only

Seven Column Quarto Bed 39 × 52 Sheet 36 × 50

Whitlock Two Revolution Four Roller Press

F. o. b. Factory

Built with front fly delivery as shown above or with carrier (printed-side-up) delivery

This Press is specially designed to do not only the finest halftone printing in black and three colors, but also to be equally efficient for the general work of the modern printing office, having special regard for the production of work of the finest quality in the largest quantity, at the least possible cost. Its various patented and modernised features have been in use long enough and tested severely enough to warrant the claim that the Whitlock is the Swiftest, Smoothest Running, Simplest, Most Durable and Most Efficient of all the two revolution presses.

The Bed Motion is Simple, Durable and Exact and permits of the operation of the machine at the very highest speed known to printing press mechanics, without jar.

Four Air Springs set in pairs at each end, take up the thrust of the bed. A simple lever quickly adjusts them (in pairs) for more or less air as speed or form requires.

All the Four-Roller presses are built with four full length steel-faced tracks in which run more than the usual number of steel friction rollers whose peculiar shape forms a perfect preventative to any side lash of the bed and besides which, in their travel, carry the oil so that the tracks are thoroughly lubricated.

The Box Type Bed has a bottom surface and not merely the usual cross ribbing. This fully doubles the strength of the Type Bed. It is besides scraped absolutely true—a time saver in making type forms ready.

The cylinder is much larger in diameter than is commonly used, thereby lessening considerably the wear on type and plates. Its periphery is closed-cast (no openings for grippers or blanket-clamp rod) thereby doubling its strength. This, with the heavy Sole Plate, the heavy Double Arched Girder, the four Full-length Tracks, and the Box Type Bed, contrive to make an impressional capacity unequalled by any other press.

The Fountain is not bolted fixedly to the frames but may be tipped to any angle. This forces the ink down on the fountain roller thereby preventing color from working light. It also saves ink waste.

All Ink Rollers are interchangeable, being of same diameter. Old Form Rollers can be used as Angle Rollers, thus saving roller expense.

The Angle Rollers are geared and driven in the same direction with the moving Ink Plate and at the same speed by a simple Rack and Gear Driving Mechanism—avoiding the use of belts and trains of gears.

The Fountain Ductor Roller deposits the ink, not on the Ink Plate, but upon the first Angle Roller, and makes more than one complete revolution before returning to the Fountain Roller, thus cutting up the ink more effectually than on any other two revolution machine.

The Hinged Roller Frame with Roller-Lifting device is so finely balanced that an easy swing of a lever lifts the top Riding and Vibrating Rollers from off the Form Rollers, the Form Rollers being lifted away from the form at the same time.

Trip and Back-up Motion, both, are on all our Presses. The Trip cannot be broken through improper timing. The Back-up operates by friction and acts instantly at highest speed without any damage to the press.

Concentration in construction is closely followed, Whitlock Presses being shorter, narrower and lower than any other two revolution machines,

Built in the following sizes

\mathbf{B} ed	46 × 65	Type	41 × 61	Sheet	43 × 63	Speed	1700 per hour
Bed	41 × 52	Type	36 × 48	Sheet	38 × 50	Speed	1860 per hour
Bed	35 × 47	Type	30 × 43	Sheet	32 × 45	Speed	2000 per hour
Bed	29 × 42	Туре	24 × 38	Sheet	26 × 40	Speed	2200 per hour

Each press is furnished with hard packing, slitter, counter, jogger, two sets of stocks, (one set cast in lieu of moulds) press tools and steam fixtures, (or large pulley and out-board bearing for direct belted motor.)

Diamond Cylinder Press

Designed especially for Country Newspapers, Low Priced yet fills all Requirements of the Country Office

Diamond Cylinder Power Press No. 14 Built also for Hand Power

The Power Diamond Cylinder is a very handsome machine constructed on correct mechanical principles. The power attachment consists of a driving shaft with fly wheel and pulleys, with pinion meshing into a large gear wheel to which is connected a lever operating a connecting arm pivoted on the frame; this arm has adjustable connections to the bed and gives a simple positive motion to the machinery. The machine is provided with a reliable throw-off, operated by the feeder's foot, thus leaving both hands free and preventing the spoiling of paper.

Design—The Diamond was designed to meet the demands of country newspapers for a reliable, low-priced press to run editions up to 3000 copies. In design, material, construction and workmanship, the highest standard is maintained.

Construction—The frame is strong and compact; the iron being put where it is needed and the appearance of the machine is fine and symmetrical.

Ink Distribution—The ink fountain is the celebrated Challenge Book Fountain, with screws conveniently placed to regulate the supply, furnishes the ink to a ductor roller which then carries it to a rider roller, and it in turn to a vibrating roller resting upon the two form rollers. These ink the form in both directions as it is carried back and forth in the bed of the press. Rollers can be easily and quickly removed.

Impression—The cylinder is heavy and unyielding under the impression strain: the journals at both ends run in anti-friction, oil retaining roller bearings, a single, simple screw and lock nut at each end of the cylinder adjusts the impression to a hair. The bed is heavy, finely machine finished, evenly balanced. The motion is made free and easy by bearing upon three anti-friction steel rollers on the line of impression, making it absolutely rigid.

Feed Board—The feed board is large and well finished. It has sockets to fit over supporting standards and can be removed instantly by simply lifting it off, and can be put back without any adjustment of any kind.

Sheet Delivery—The sheets are delivered by an apron ingeniously adjusted to bring the papers out as they are printed, and delivers them on a finely finished delivery table. This table can be removed to save floor space when not in use. All the movements are positive, and the grippers, the movement of the cylinder, the arrangement of the tympan and the various mechanisms are easy to operate and will work in a satisfactory way. Prices f. o. b. Factory

Number 4 Diamond Hand Power . . . \$350 00 Number 14 Diamond Steam Power . . . \$450 00

No. 4 Diamond Hand Power is a six-column folio; size of bed 24 × 32½ inches, and will print any size of smaller sheet without any special adjustments: floor space 40 × 43 inches, the delivery table extending 30 inches back of the frame; speed 700 to 900 impressions per hour; shipping weight 2100 pounds.

The hand power machine is a strictly one man machine. The operator stands on the crank side of the press, grasping the handle with his right hand, and feeding the papers to the guides with his left. That is all that is necessary, the press does the rest. The press when made, is ready for the power attachments, which can be added without sending the press to the factory and is instantly set up, ready to start. Outside of the power attachments, the hand and power machines are the same.

No. 14 Diamond Steam Power is a six-column folio: size of bed $24 \times 32 \frac{1}{2}$ inches; will print any smaller size sheet without any special adjustment; floor space 40×43 inches: the delivery table extending 30 inches back of the frame; speed 800 to 1200 impressions per hour; shipping weight 2500 pounds.

Brower Drum Cylinder Press

Made in one size only, bed 26 × 38 inches. Suitable for standard 7-column newspapers and job, book and poster printing that will go on 24 × 36 sheet

The above cut shows the new Brower Drum Cylinder Printing Press for which we are the exclusive selling agents. Every one familiar with cylinder presses will immediately recognize it as belonging to the old original Campbell type—the best all-around hand power cylinder press hitherto built.

That the Brower Drum Cylinder Press forms a class by itself and completely meets the wants of hundreds of offices will be seen in the following enumeration of its salient features, among which are several important new inventions, besides that of the new Brower bed-movement:

Tapeless delivery, sheet slitter, receding opening and closing gripper studs, hinged feed board, side feed-gauge holding-bar, feeder's stand, quickly detached fly, two tracks with bed rollers 2% inches wide, adjustable bed, hold-down gibs and guides, improved cylinder boxes and impression screws, patent adjustable bed rack shaft bearings, patent adjustable cam movement for actuating fountain roller, compression springs throughout, the strongest cross-stay in any press of its size, adjustable roller bearers, a first-class book ink fountain with full complement of knife adjusting thumb-screws, table distribution, 3%-inch form rollers, 2-inch fountain-ductor and plate rollers, all journals of extra length, all shafts of extra diameter, strongly braced cylinder and bed, and patent adjustable chase head bearing. In fact, in completeness and efficiency the Brower drum is the equal of presses that sell for more than double its price.

The new Brower Drum gives perfect register and a rigid and sharp impression. It runs lighter than any other drum press of its size, and is as nearly "fool proof" as a cylinder press can be made. By hand power it will print more sheets in a given time than any other drum cylinder press of like size; by motor power, without springs, it may be safely run at from 600 to 750 impressions per hour; and with springs it will print and deliver 1500 sheets per hour. It runs with practically no vibration and does not have to be bolted to the floor. The weight of the press when in position is over 4000 pounds.

Practically every metropolitan newspaper has adopted the 7-column page and the pronounced trend of country weeklies, semi-weeklies and dailies is to follow suit, as a page of that number of columns makes up more conveniently and handsomely than one of any other number. It is also the sized page that seems to be best liked by the public. A 7-column quarto drum press could not possibly be run by hand power and a motor power press of this size is huge, unwieldly, costly to run and costly to buy. But where 7-column quarto papers are desired the ready print houses furnish them folded once, thus fitting them for the Brower 7-column folio drum, the only hand power drum made today of any size.

The use of the Brower Drum will bring about many economies. Two pages may be set up and printed before the office becomes congested, as is usually the case on the day of publication. The last two pages can go to press very much later than if four had to be made up, locked up and made ready at one time. Consequently, local news, when printed on the Brower, can be brought down to within a few minutes of the time of issue. The chief economies lie in the greatly reduced first cost of the press and in supplying the very small amount of power required to run it.

When a 6-column or smaller paper is preferred the Brower 7-column press is as cheap a press and as small a press as it is desirable to print it on. A smaller drum press would not run any lighter, would not occupy materially less floor space, and its first cost would be about the same. It seems to be very evident therefore that the Brower 7-column drum will most fully meet the requirements of thoughtful country publishers.

This price includes either a large fly wheel for hand power, or (if specifically called for in original order) a small fly wheel and side power fixtures. These latter attachments provide for running the press by motor power up to 600 to 750 per hour. The small fly wheel is crowned and of the right diameter to belt direct from electric motors.

Attachments for Brower Drum Cylinder Press

on the interchangeable plan.

Equipment—Each press will be properly packed for shipment and each press will be provided with the following articles: Rubber blanket, sheet slitter, one set of composition rollers, one extra set of roller stocks, wrench and screw driver.

Ideal Hand Cylinder Press

My wife ran off 300 an hour on it the first day it was put up." * * * "With it our inexperiup."*** "With it our inexperienced pressman has made the following speed: 750 impressions in 75 minutes; 475 in one hour; 100 in 11 minutes. We run a regular lick of 100 every 15 minutes, or 400 per hour." "The press is so simple that the veriest novice can set it up, and so light-running that a boy may operate it with ease."

There are two inking cylinders (A) and (B), one of which (A) revolves by means of the hand crank, and while revolving it automatically vibrates. The inking roller (D) rests on the inking cylinders and receives its supply of distributed ink. When the roller (D) is pushed toward the form, the automatic sheet-steel drop-leaf ink table (C) descends on the bed of the press and the roller (D) passes easily on to the type form. When the roller returns, the ink table (C) resumes its perpendicular position automatically. The Ideal Inking Apparatus is not furnished with the Ideal Press unless specially ordered.

Army Press

This is the lowest-priced press on which a newspaper of small circulation can be printed. The cylinder is stationary but adjustable for impression by regulating screws at each end. The bed and form pass under the cylinder and an impression is taken at each forward and backward movement.

Each press is furnished with two chases, patent quoins and key, side and foot sticks. roller frame and cast roller, oiler and wrench.

To print one page 6-column folio $14\% \times 20\frac{1}{2}$ inches To print one page 7-column folio $16\% \times 22\%$ inches To print one page 8-column folio $19\frac{1}{4} \times 25\frac{1}{2}$ inches To print two pages 5-column folio $19\frac{1}{2} \times 25$ inches

Tribune Newspaper Folder

All Iron Frame Working Parts Steel and Iron All Movements Positive No Sprocket Chains or Lost Motion

The Tribune Folder is of the highest grade of construction and efficiency, without a superior for its purpose on the market, and sold at such moderate net prices as to make so-called "cheap" folders highly expensive in comparison—durability and reliability considered. It has no makeshift devices. It folds on the same principle as the high-grade book machines. The simplest folder made.

Made in one size only, 36×48 inches, which takes in any size sheet, whether folio or quarto, from 22×32 to 36×48 inches.

Paster and trimmer can be furnished at time of purchase or added afterward.

Made with three- and four-fold deliveries. Three-fold work is delivered in a receiving box while four-fold work is delivered in a packer as shown in illustration.

In the hands of a competent operator it will fold ordinary sixteen- and thirty-two-page work.

Weight about 900 pounds. Power required, about one-tenth of one horse-power. Speed 3000 folio or quarto sheets per hour.

Prices f. o. b. Factory

For a straight 3 or 4 fold machine, hand feed	450 00
Same with 8 page Paster and Trimmer	475 00
Fixtures for attaching to press, extra	75 00
Insetting Attachment inserts a two-page or four-page sheet or supplement between the fourth and fifth pages of a publication, folding either ten or twelve pages and pasting and trimming the entire publication, extra	150 00
Covering Attachment outsets two pages upon eight pages, making a ten-page publication; or outsets a four-page cover or supplement upon eight pages making a twelve-page publication. It pastes and trims. Extra	150 00

The price of this reliable and durable folder is little more than asked for inferior affairs which in the end prove most expensive and least satisfactory. Folder made to do perfect work for many years.

Eclipse Newspaper Folder

Built in a Square Cast Iron Frame

The Eclipse is a high-grade folder at a low price, perfectly constructed in every detail, fully warranted for five years and contains all the up-to-date improvements, including tight and loose drive pulleys, spring cushion roller boxes, steel-gauges, individual tape stands, non-stretchable tape, separate third and fourth fold delivery, the improved self sharpening trimmer and the drop roll feed. All machines are equipped without extra charge with automatic side register so that the paper is automatically straightened; even if it is not properly fed into the machine. The paster is oconstructed that it operates only when the paper passes under it thus making it impossible for the paste to get on the rollers. These machines are sent to any responsible publisher on 30 days trial and sold strictly on their merits. They will handle any size sheet from 22 × 30 to 36 × 48 and are built to handle 4, 6, 8, 10, 12, 16, 18 and 20 page newspaper work.

In addition to the above folder for regular newspaper work, the manufacturers also build the Eclipse Job and Periodical Folders. They are made in different combinations to handle the line of work indicated by the title. Quotations made on application. Send sample sheet with specifications of work to be done.

Galley Proof Presses

Chandler & Price Proof Press

Built in the most substantial manner, thoroughly braced with accurate bed and cylinder. The cylinder is much heavier than on the average proof press and consequently gives a much better impression.

With Iron Stand

No. 1	10 × 31 inches inside					\$30	00
No. 2	16 × 31 inches inside					40	00

Without Stand

	10 × 31 inches inside \$22 50
	16 × 31 inches inside 30 00
Each P	roof Press is furnished with blanket.

Challenge Proof Press

The circumference of the cylinder is the same measurement as the printing surface of the bed, the cylinder revolving once from stot ostop. The No. 1 cylinder weighs 85 pounds; other cylinders of proportionate weights. The cylinder is covered with finest quality felt blanket, and a brayer is furnished with each press excepting those without iron stand. Nos. 1 and 2 have shelf for paper underneath the cabinet.

Will be found convenient for proving large forms in job offices. The Reliance Job Galley Proof Press will take the place of the Washington hand press and better proofs can be taken in much less time. The bed is cross-ribbed and made strong and rigid. The circumference of the roller is greater than the tracks or printing surface, thereby preventing injury to type and avoiding defective proofs. The roller is covered with a felt blanket

and has polished steel handles.

Herald Self-Inking Proof Press

Designed for taking proofs of sheets of any size ranging from small commercial work to double page proofs of newspapers or periodicals. The Herald Self-Inking Press will take the place of three ordinary Proof Presses and it also does better work, in consequence of which, the necessity of taking press proofs is climinated.

Sizes and Prices

All Presses are furnished complete with cast rollers. When shipped to foreign countries, two roller moulds are furnished. Full illustrated directions are sent with each press. Each press will print matter 1½ inch narrower than width of bed.

Patent Automatic Self-Inking and Self-Feeding Proof Press

This machine is identical with the Herald Self-Inking Proof Press except that the paper is fed automatically from a roll. Made in six sizes, the five larger sizes being furnished with either single or double web. Each web acts independently so that only one is in use in case but one galley is to be proved.

Electric Proof Press

A Self-Inking Proof Press operated by an electric motor. The power required for an ordinary 16-candle power light is ample to run the press, although if desired it can be run by hand in place of by motor. Twenty-five proofs per minute can be easily taken, making it invaluable for use in large newspaper offices where saving of time is imperative.

Brown & Carver and Oswego Power Paper Cutters

Brown & Carver Automatic Clamp Power Paper Cutter Eleven sizes, 34 to 84 inches. Sizes and Prices on page 1086

Eleven sizes, 34 to 84 inches. Sizes and Prices on page 1086

Economy of operation is the first point to consider in purchasing a cutting machine. In the Brown & Carver and Oswego Cutters nothing has been spared to produce the most efficient cutting machine that can be built. Uniform accuracy and reliability are always embodied in these cutting machines. They give the greatest cutting output at lowest cost, quality considered. In adopting them for our special line of power cutters there is full confidence that we are offering printers, binders, box-makers and other tradesmen the best cutting machines now made. Sixty styles and sizes of Brown & Carver and Oswego Cutting Machines are made in the only exclusive cutting machine factory in the world. We sell all of them and can provide for the cutting needs of all, whether the requirements be simple or complicated. Write our nearest house for illustrated catalogue and net prices. Each Cutter is supplied with one knife, oiler and wrenches. No overhead fixtures or pulleys of any kind are included. Sizes, descriptions and list prices given on three next pages.

Brown & Carver and Oswego Power Paper Cutters

Brown & Carver Hand Clamp Power Paper Cutter Eleven sizes, 34 to 84 inches. Sizes and prices at bottom of page

Cuts work up to one-half inch wide and the knife rises six and one-half inches.

Table is grooved to prevent sheets wedging under gauge-or the table is plain if desired. It is several inches lower than before and is arranged for putting on two side extensions in front for handling work before and after cut.

The back gauge is in three parts regularly (or in two parts, or one part if desired) and when split, the section forms a side gauge so that work can be cut near the center of knife as well as at the side of The back gauge is close to the side gauge for small work. the machine.

The knife is bolted solidly to the bar and is instantly adjusted for level or wear by a turn of the connecting rods.

The direct crank motion to the knife bar never allows knife to fall short or to cut into the stick.

The clamp is balanced to run the entire distance up or down with one spin of the wheel. The clamp is provided with a flat removable plate for fine work, which otherwise might be marred by the clamp

Solid clamp and back gauge cutting up to 31/2 inches are furnished to order.

Pulleys furnished regularly on side shown in cut, but can be furnished on opposite side to order. The fast screw movement for back gauge with wheel divided to sixteenths is furnished regularly on cutters 34-inch to 74-inch.

Quick cable movement with indicator reading to sixteenths will be furnished instead of screw movement if desired without extra charge to order.

A treadle attachment is furnished (to order extra on 34-inch, 38-inch, 44-inch and 50-inch) for bringing the clamp down to work instantly without running clamp down by hand.

The 57-inch to 74-inch machines can be started from either side by the bar across front.

The power movement shown in Brown & Carver catalogue on 57-inch cutter for operating back gauge is furnished to special order only (extra). This labor-saving device moves the back gauge backgauge is turnished to special order only (extra). This isloor-saving device moves the back gauge backward or forward by power, a lever swung to the right or left controlling both the direction and the speed. Its indicator wheel reads the position of the back gauge to sixteenths, and if desired a micrometer pointer can be attached to read to less than thousandths.

riction clutch, cut gears, steel shafts, brass rule, case-hardened steel bolts, iron of a durable quality. All machines subjected to a running test before leaving the works. Illustrated catalogue free.

The Clamp on these machines may be operated as on the regular Hand Clamp Cutters or it may be brought down to the work quickly by treadle and will lock automatically on the work or return to the top as desired. A partial turn of the Hand Clamp Wheel will give full clamping pressure and a partial turn in reverse while foot is held on treadle will release the clamp so it will rise automatically to the top. These machines are furnished regularly with Cable Gauge Movement (screw movement if desired) and Pilot Hand Clamping Wheel (Round Rim Clamping Wheel if desired). Other equipment is the same as regular Hand Clamp Cutters.

Brown & Carver Power Cutters, Auto, Regular; Automatic Clamp and Foot Treadle

B. & C. Automatic Clamp

These machines pack, clamp and cut a pile automatically. The steel indicator band registers position of Back Gauge. The Clamp may be brought down by treadle to see exactly where knife is going to cut. These machines cut as accurately as the Brown & Carver Hand Clamp Cutters. The Automatic Clamp is independent of the knife and is powerful and reliable. The stroke is fast and clean. The mechanism is the simplest and there are few moving and wearing parts.

The table is grooved, plain if desired, front scored I inch lines with brass rule graduated to sixteenths of an inch, back graduated to sixteenths of an inch. Interlocking Clamp and Back Gauge cut work up to % inch. Removable Flat Plate for Clamp prevents clamp fingers indenting fine work. Back Gauge is in three parts. Cable Gauge Movement, Clamp rises 6 inches.

Oswego Power Cutters, Hand Clamp

Also arranged for Hand Drive

These are lively running, accurate Cutting Machines. The base is webbed directly under the clamping and cutting strain rendering the machine absolutely rigid. The Clamp rises 4% inches. The Clamp and Back Gauge interlock allowing work to be cut up to one-half inch. The Back Gauge is in troparts on 26-inch and 36-inch sizes, in three parts on 36-inch size. Screw movement for Back Gauge is furnished regularly, Cable movement furnished to order. The Hand Wheel is graduated to insure the movement of Back Gauge. The Table is plain (not grooved); front scored in ½ inch squares with brass rule graduated to sixteenths of an inch, back graduated to sixteenths of an inch. The handles on the clamping wheel render clamping easy. (Round Rim Clamping Wheel furnished if desired). The Friction Clutch is thrown out automatically after every cut and the knife stopped at the top by a positive brake.

Brown & Carver and Oswego Cutting Machines

Oswego 33-Inch Combination Hand and Power Drive Cutter

Oswego Combination

This machine has a mechanical device for changing speed and power. For Hand Power drive by shifting gear at right the speed can be decreased and power increased. Grooved Table furnished regularly (plain table to order); front scored 1-inch lines with brass rule graduated to sixteenths of an inch, back graduated to sixteenths of an inch. Clamp rises 4% inches. The Clamp and Back Gauge interlock allowing work to be cut up to ½ inch. Double clamp screws are operated by Pilot Hand. (Round Rim Hand Wheel if desired). Screw movement for Back Gauge is furnished regularly (Cable Movement to order). The Hand Wheel is graduated to measure the movement of Back Gauge. Shipping weight 2700 pounds

Price f. o. b. factory

Oswego Hand Wheel Drive Cutters

The driving mechanism of these machines is powerful and geared so the machine is easily driven by hand power. The Table is plain (not grooved): front scored in ½-inch squares with brass rule graduated to sixteenths of an inch. Extra long Back Side Gauge. Detachable Front Side Gauge can be adjusted in and out. The Clamp and Back Gauge interlock allowing work to be cut up to ½ inch. The Clamp rises 3½ inches. Back Gauge is in 2 parts, the split part is flush on one side forming another side gauge near the middle of machine. This allows the knife to be worn equally. Pilot Hand Clamping Wheel (Round Rim Hand Clamping Wheel if desired). Gauge Screw Movement. The Hand Wheel is graduated to measure the movements of Back Gauge.

Advance Power Paper Cutter

This well known and reliable cutter is made in the two useful sizes, 30 and 33 inches. It has the patent side frame protector which prevents paper trimmings from wedging between the knife and side frame, which is the cause of so many breaks. The throw off stops the knife at the highest point of the stroke automatically, can be thrown off and backed up at any point by hand. All cut gears. The clutch, clutch pinion, intermediate gear and intermediate pinion are cut out of solid steel. Easily squared back gauge. Side gauges back and front. Strong, well built and thoroughly reliable and fully guaranteed. Prices on skids, packed for shipment, f. o. b. Factory.

Sizes	Squares	Weight	Price					
30 inches	30 inches	1600 lbs	\$300 00					
33 inches	33 inches	1700 lbs	350 00					

Challenge Power Paper Cutter

The 36-inch Challenge Power Paper Cutter is a machine of fine proportions and great strength. It is entirely within control of the operator without moving from his position. The automatic throw off is positive; the knife bar is counterbalanced, doing away with all danger of the knife running down prematurely. The knife stops instantly at any point, up or down, when the clutch is thrown off. The clamp is geared at both ends and is quickly and easily operated by the hand wheel at the left of the cutter. By this arrangement, also, powerful clamping is secured. These cutters are provided with front and back and stationary side gauges; an extra reversible side gauge in front, interlocking back gauge and clamp; broad faced sections on clamp to prevent creasing stock; split back gauge; brass figured rule in bed, back and front; also hand wheel is provided for backing up the knife. Steel is used for all shafts, screws,

to prevent creasing suce, spin tack gauge, brass figured rule in bed, back and front; also hand wheel is provided for backing up the knife. Steel is used for all shafts, screws, studs, clutches and driving gears. Gibs and set screws in side frame take up wear of knife bar. Cut gears give an easy, noiseless motion. Patented side frame protector prevents paper shavings from wedging between knife and side frame which is the cause of so many breaks in paper cutters.

"Howard Gem" Lever Paper Cutter

Size		Squares	Price	
30-inch.		. 30 inches		\$175 00
32-inch .		. 32 inches		200 00

This is the Original "Howard Gem" Lever Cutter. It has been improved from time to time and is a popular lever cutter.

It is a very heavy, compact and rigid machine; powerful compound leverage makes it cut exceptionally smooth and easy. Clamp has large hand wheel and quick-acting screw. Knife cuts clean and true. It is provided with interlocking back gauge and clamp for cutting narrow widths. It is also supplied with the "easily squared" split back gauge and stationary side gauges back and front on both sides. Half-inch cutting sticks with eight cutting surfaces. Gibs and set screws in side frames to take up wear of knife bar. The lever is extra long and heavy, counterbalanced and adjustable to any desired position.

Peerless Gem Paper Cutters

Superior in every detail and in the leverage, cutting with greater ease to operator, and returning from cut with the least possible exertion, owing to the perfect balance. The frame is stronger, heavier and better braced; the knife thicker and deeper, insuring a truer cut and longer life; the lever is adjustable; the balance weight is now hung inside the frame, thus saving floor room. There are split back gauges, side gauges, and front and back enameled measuring gauges. Unexcelled in construction, materials used and finish.

Utility Paper Cutter with Iron Stand

With Iron Stand

Iron Stands are made for each size, and are recommended where bench room should be saved.

Clipper Paper Cutter

Designed for cutting small work, such as labels, circulars, etc. Has a patented reversible clamp, which cuts very narrow strips and leaves no marks on the paper. The lever is pulled forward to cut. Quality of construction is A1.

Cuts and squares 12 inches . . . \$40 00

Success **Card Cutter**

A well-made, reliable cutter, with movable side and front gauges. 12-inch knife.

Premium Card Cutter

This is the popular, general, all-round machine, with a twelve-inch blade, meeting the requirements of a medium-sized cutter. A distinctive advantage is secured by a peculiar arrangement of the joint, by means of which a sheet of any length may be cut. By the simple adoption of a spring overhead, connected by a cord attached to the handle, the cutter is adapted to rapid work where a great number of small pieces of uniform size are to be cut.

Premium Card Cutter \$10 00

Manufacturer's Cutter

Studio Cutter

Has a ten-inch blade but no front gauge. Intended for small and light work. Makes a good clean cut.

Studio Cutter \$3 00

Springfield Oval Cutter

For Cutting Circles, Ovals, Picture Mats, Glass, Photo Prints, Backing, Etc.

Cuts any circle up to 22 inch diameter and any oval up to 22×32 inches, with square or beveled, with scale for setting to size. Knife has automatic stop movement to prevent cutting into table. Adjustable clamp that holds any thickness of stock up to ½ inch. Shipping weight 75 pounds.

In presenting the Boston Wire Stitching Machine to printers and binders, we wish to direct particular attention to its time and labor-saving features and to the elimination in its construction of the faulty ideas of competitive practice.

The "Boston" is original throughout, being a radical departure from everything heretofore brought out in this line. Its adjusting, feeding, cutting and clinching mechanisms are new, correct mechanically and manufactured in a most thorough and painstaking manner under the personal supervision of the inventor in its own newly-equipped factory.

Simplicity is its chief feature, and one which has met the enthusiastic approval of over six hundred users in all sections of the country. All working parts are composed of single pieces of specially prepared steel, easily replaced when worn and so inexpensive that cost of maintenance is reduced to a minimum.

Motor equipment extra according to power requirements.

No. 3 Boston Self-Regulating Wire Stitcher complete \$200 00

The Boston Self-Regulating Wire Stitching Machine

Prospective purchasers of this kind of machinery are invited to examine the "Boston" at any of our houses and to note particularly the following points of superiority.

Single Adjustment -All parts brought to absolute adjustment by turning a hand wheel.

Gravity Tension for Wire-No springs, nuts or screws. Changes of wire made instantly.

Wire Guide-Lined with felt, prevents wearing of guides and injury to wire.

Wire Straightener-Always removes kinks and curls from the wire.

Wire Feed-"Grip" is circular and in contact only while feeding. Automatically changes position each time stitcher is threaded.

Cutter-Made of one piece of specially prepared steel and working in plain sight.

Bender-Bends and guides the legs and head of each staple perfectly.

Driver-Single piece of hardened steel, reversible and easily replaced when worn.

Supporter-Over which staple is formed and supported when driven.

Clinchers-In open space and never in contact with points of wire.

No. 4 Boston Self-Regulating Wire Stitcher \$250 00

No. 4 Boston Wire Stitcher. Saddle Table in working position, Flat Table in rear 1093

The Boston Self-Regulating Wire Stitching Machine

No. 7 Boston Wire Stitcher showing Flat Table in working position, Saddle Table below

Capacity two sheets to full seven-eighths of an inch, taking news, book, coated and similar papers to its full limit.

Designed for heavy, flat stitching, but takes small work perfectly. Built on the lines of the No. 4, having the same superior table features, except that the flat table is larger and heavier, with more front and side room.

Wire used 30 to 24 round, 20 x 24 flat.

The heaviest and best seven-eights inch Wire Stitcher ever made.

No. 7 Boston Self-Regulating Wire Stitcher complete
Write our nearest House for net prices. \$350 00

The Wire Feeder

The wire feeder, simple and accurate in operation, is in contact with the wire only during the forward movement of feeding, returning to its position without scraping across the wire. The steel sector, the principal part of the feeding device, operates directly on a cam, without rolls, ratchets, eccentrics and the many small parts generally employed. It is the only perfect feed. The feeding grip is circular, having many contacts, and changes position automatically each time the stitcher is threaded. This is a new and important feature for the first time worked out.

The Wire Cutter

The wire cutter is an important working part of all wire stitchers, one which is most frequently replaced. In all stitchers excepting the "Boston" this is made of two single parts, with the accompanying screws, springs and bolts. In the "Boston" the cutter is one piece of hardened steel working in plain sight and always ready as seen in the illustration. It can be replaced instantly by removing the iron strap below the face plate and pulling forward the cutter plunger. Frequent and costly accidents cannot result from the cutter being placed out of position, as in other stitchers.

Clinching the Staple

The clinchers are new in principle and consist of two parts, clinchers and clincher points. They are The clinchers are new in principle and consist of two parts, clinchers and clincher points. They are far superior to those used in other machines, in which the points of the wire come in contact with them as the staple is being driven. In the "Boston" the clinchers do not operate until the staple is fully driven, the points of the wire are never in contact with the clinchers, and the clinch is made by the clincher points acting against the entire support of the driver, the latter being delayed in its return for this purpose. The result is the much desired smooth, even, flat clinch, increasing the binding power of wire, and preventing damage to and wrinkling of stock, the inner pages of which are usually marred by defective clinching. Clinchers are easy to clean or replace.

The Boston Self-Regulating Wire Stitching Machine

Something New

We illustrate here a new feature in stitching machines and possible only in the "Boston" owing to its remarkable simplicity.

Figure 1 shows the actual size of the regular half-inch stitch for which the Nos. 3 and 4 machines are fitted. If desired, special extra parts can be furnished at moderate cost for making a three-eighths inch stitch possible on the same machine, with a consequent larger saving in wire. Figure 2 illustrates this stitch, actual size.

The change in the machine can be made in three minutes, and consists of replacing the driving bar, supporter and cutter plunger, and slightly shifting the feed sector—work which can be done by the operator.

Electric Equipment

On page 1093 is shown a No. 3 "Boston" equipped with one-sixth horsepower individual electric motor. This equipment is the best and most compact ever devised for a stitching machine. Where a 110, 220 or 500-volt direct current power or lighting service is in use, these equipments can be furnished complete ready for wiring. In case they are to be attached to the lighting circuit, all that is necessary is to remove the glass bulb and screw in the stitcher extension wire plug, after the fashion of an ordinary extension lamp. We can also provide motors for alternating current 104 to 110 or 208 volts, cycles 60 or 125 per second. These motors will operate on single, two or three phase circuits.

It will be noticed that this electric equipment takes up but little space beyond the frame of the stitcher; that a special foundation plate is furnished, to which are attached rolls making it possible to wheel the machine to any part of the workroom. The equipment is the same on all sizes.

Capacity of Boston Wire Stitchers

No. 3—Two sheets to exceeding three-eighths inch. Wire used, 30, 28, 27, 26, 25 round; 21×25 , 21×28 flat; shipping weight 300 pounds; floor space 24×26 inches; diameter of pulley 10 inches; speed 120 to 140 revolutions a minute; belt $1\frac{1}{2}$ inches.

No. 4—Two sheets to one-half inch. Wire used, 30, 28, 27, 26, 25 round; 21×25 , 21×28 flat; shipping weight 335 pounds; floor space 24×28 inches; diameter of pulley 10 inches; speed 120 to 140 revolutions a minute; belt $1\frac{1}{2}$ inches.

No. 7-Two sheets to full seven-eighths inch. Shipping weight 500 pounds.

Boston Staple Binder

Patent Applied For

Foot Power and Hand Power

The Boston Staple Binder like the Boston Wire Stitcher is built on new lines with valuable features never before used in a stapler. It is the nearest approach to a stitcher yet devised, and its work is neater and better than some of the old line stitchers. It is difficult to distinguish its stapling from the best wire stitching.

Sticks of staples are placed in the machine, at the right hand side as shown in the illustration, just as taken from the box, and may be changed as often as necessary with absolutely no loss, thus saving 25 to 50% over other machines.

A supporter (an exclusive feature) prevents buckling staples, and permits the use of finer wire than heretofore possible. The result is cleaner work.

Clinchers are the same as in the regular Boston Wire Stitching Machines, and operate effectively for even, flat clinching.

The driver is a single piece of steel and can be instantly replaced when necessary. Instant replacement of worn or broken parts is an important feature.

The foot power Boston Stapler has a pedestal and table, as shown in the illustration; the hand power is screwed to a bench or table.

The capacity of both styles is three-sixteenths of an inch, flat or saddle work,

Boston Bindery Tables

Patent applied for by the maker Adjustable to any angle, also to height of any Wire Stitcher

May be used with every make of Wire Stitching Machine

These strong and convenient tables are made by the Boston Wire Stitcher Company to use with the Boston Wire Stitchers, but they are equally desirable for all Wire Stitchers. Every table will operate as a magazine, a saddle or a flat table, and be found valuable in binderies where heretofore a carpenter has had to rig up a stationary affair, admitting of no change. The change in position is accomplished by manipulating the clamps shown in the saddle illustration, the work of a few seconds. Tables are adjustable to any angle; also up and down to conform to the height of the iron table on stitching machine. Base is of iron and heavy enough to counter-balance any work placed on the tops. These tables fill a long-felt need in binderies and are the only equipment on the market for this work.

Perfection Wire Stitchers

Perfection A Wire Stitcher

This machine is specially adapted for light work, saddle or fiat, and will stitch from two sheets up to one-fifth of an inch in thickness. Wire used 24 to 30 gauge. Extra long saddle and table.

Perfection A Wire Stitcher

Perfection No. 2 Wire Stitcher

This cut represents the new Perfection Wire Stitcher No. 2, a modern good machine, made under patents granted in 1898.

Capacity two sheets to one-quarter inch. Wire used 25 to 30 gauge. Stitches flat and saddle.

Perfection No. 2 Wire Stitcher

Perfection Wire Stitchers-Continued

Perfection G Wire Stitcher

Perfection No. 4

Perfection G Wire Stitcher For Power or Treadle

This is an A-1 standard general-purpose machine. Capacity two sheets to fully three-quarters of an inch. Large trough and flat table. Wire used 20 to 28 gauge.

Bookbinding Machinery

Ruling Machines, Standing Presses, Job Backets, Table Shears, Book-Sewers and Other Bindery Equipment

We are prepared to promptly supply all Machinery needed in the Book Bindery, whether the demand be large or small. Only superior Machinery of known merit and established reputation, is handled. All selling houses of the American Type Founders Company will answer inquiries and submit estimates. Correspondence invited when anything is needed for the Bindery.

Bookbinders' Wire on Spools

Prices subject to change without notice

Discount on quantities

Write our nearest House for net prices

· The success of every wire-stitching machine depends largely upon the quality of the wire used. This wire is the best made. There is no economy in poor wire.

A spool holds five pounds of wire. A case contains 200 spools (100 pounds). Spools are 10 cents extra each and are returnable less transportation charges. Do not return spools without previously sending us notice as such notice may enable us to save you some expense.

The table on next page will save users of wire a great deal of time and enable them to estimate accurately the cost of wire in each job and the amount necessary to order.

Table Showing Number of Wire Staples to One Pound of Wire

To ascertain the number of staples to one pound of wire, measure full length of wire in staple, go to first column on left of table and pass down same until you reach the size that corresponds with staple measured; pass along to right until you reach size of wire used, shown by top row of figures. Example: If your staple measures 1½ inches and the size of wire is No. 28, there are 11,940 staples to one pound as

Extra Heavy Rosback Progress Power Perforator

Has hardened tool steel die, guaranteed for five years. Directly under the center of the head and in line with the side rods. Feed gauge for feeding paper into the machine enables you to finish the sheet one way, once through the machine no matter how many perforations on, thus saving handling of the stock the number of times as you have perforations on, minus one.

Automatic sheet delivery on a round hole Perforator has heretofore been unknown. The Progress is the only Perforator on the market equipped with this feature. In the cut of rear view of this machine you will see the sheet just being delivered.

The Progress Perforator is guaranteed to have the greatest capacity of any

The Progress Perforator is the only Machine in the world that embodies the hardened tool steel dies and punches, reclining reartable, feed gauge, automatic sheet delivery, steel slugs, punches on the center guide pins, waste box,

Genuine Rosback Foot Power Perforator

The Original Independent Punch Perforator

This machine is built strong and durable, and makes a perfect perforation. The frame is securely braced and bolted so as to prevent its being racked or twisted out of shape by transportation or otherwise, causing undue wear of the needles and die. A very excellent feature of this machine and one that will be a perfect perforation.

undue wear of the needles and die. A very excellent feature of this machine, and one that will be appreciated by the operator, is the sliding steel plates on front of needle bar (see cut) which enables him to easily and quickly provide for stubs of checks, etc., rendering a portion of the needles inoperative. To do this loosen the thumb screws on the sliding plates, move the plates to a position over that portion of the paper to be perforated, tighten the thumb screws, and the perforator is ready for work. That portion over which the space or spaces between the plates occur will remain unperforated. The stripper has a heavy flanged back, consequently it is stiff and will not spring. The bed on which the

Perfection Perforator Feed Gauge

It comprises two steel side tracks each 21 inches long which afford ample room for the largest paper used and are fastened to the front table of the Perforator by two wood screws. A movable carriage travels on these

tracks by means of pinions secured to the shaft which insures an absolutely parallel movement. The carriage is provided with an adjustable straight edge for truing up the paper when printed matter is not square with the edge of the sheet.

Progress Perforator Feed Gauge

A simple and accurate feed gauge for use on any round-hole perforator. Can be readily attached without any change in the perforator. The "Progress" does not require the removal of stops or sliding them to back of gauge. When not in use can be swung back out of the way by loosening the screw.

Gem Treadle Perforator

Made in Four Sizes

This machine is made of the best material, has hardened and tempered steel dies and the perforations are round as on postage stamps. Needles bent by accident or otherwise can be removed very easily and others inserted as they are all independent of each other.

One hundred extra needles, one pair of pliers, one screw driver, one file for sharpening needles and directions for operating sent with each machine.

Damon Perforating and Scoring Machine

This perforator and scorer consists of a depressible or disappearing, interchangeable steel blade (either with perforating or scoring surface) acting in connection with a base plate or lever all secured within a steel casing and operated by a rubber pressure-quad glued to the tympan, which presses against the lever, bringing blade into position just before taking impression.

Locks in form and saves time and rollers by perforating (or scoring) and printing at one impression.

- 1-Creasing blade.
- 2-Perforating blade in position to take impression.
- 3-Perforator with blade depressed.
- 5-Pressure quad.

5-inch

7-inch

9-inch

6-Pressure quad glued on carboard.

Perforates 10 inches, and is provided with gauges on both sides so that the sheets may be turned and fed in again making a continuous perforated line of twenty inches. The pins make round holes like the perforations on a sheet of postage stamps. Fifteen holes to an inch.

Price

Franklin Hand Perforator 10 inches . . \$25 00

The Kane Perforator

Cheap, simple and effective device, quickly attached to job-press. Makes perfect perforation at time of printing without cutting rollers, printing a black line across sheet or causing annoyance to feeder.

The perforator is less than three-sixteenths of an inch in width and consequently may be used on all ordinary work. An impression on tympan will show just where the perforator should be placed.

13-inch

16-inch

McNamara Gripper Perforator

The McNamara Gripper Perforator and Scorer is bolted on the gripper bar the same as any ordinary gripper: cuts clean and sharply without any perceptible wear: is small and compact enough to allow type to be set close, and yet it will perforate any thing with accuracy and precision, and being carefully built, it has infinite strength and durability. It will not cut because it does not touch the ink rollers or cause hard work for the feeder. Can be attached easily and quickly to any platen press.

Sterling Round Cornering Machine

This machine is for round cornering booklets, catalogues, cards of all kinds, labels, folders, calendar backs and an endless variety of other work.

It is the most popular machine for the purpose ever devised, and over 5000 of them have already been sold.

The machine is self-clamping and very rapid. Every part is made with the utmost care.

The price is \$15, including one knife of the size generally used, but we have four other styles at \$1.25 each.

The operation of the Sterling is so simple and the price so low that no enterprising concern can afford to get along without one of these wonderful machines.

Some of the Many Attachments for the Sterling

The Sterling is like the "Elastic Book Case" always complete but never finished.

We illustrate the Pedestal Foot Power Attachment on which a Sterling can be mounted in a few minutes, allowing the operator to sit down when using the machine, leaving both hands free for guiding the stock.

The price of this attachment is only \$15 and it will be appreciated by every owner of a Sterling, because it will increase the utility of the machine to a very great extent.

We also illustrate the Perforating Attachment which can be added to any Sterling and will prove a great convenience.

The system of gauges is the finest ever devised and they can be instantly adjusted for handling any particular size or shape of work, and are so constructed that adjustments can be made to the hundredth part of an inch.

This attachment costs \$18, and when added to a Sterling you will have the best 10-inch Perforator on the market.

Space will not permit us to show the other attachments for punching of all kinds, including the loose leaf and card index work, eyeletting, stabbing and indexing.

Send to our nearest branch for special illustrated catalogue regarding the Sterling and what it will do.

Tatum Adjustable Paper Punches

This is the standard round-hole punch that is supplied with each of the three styles of Tatum Adjustable Paper Punches. The Punch and Die are shown separ-

ately. Both punch and die are securely mounted in a way that insures their perfect alignment. Changing punches and setting the members to any desired position in the machine can be done quickly and accurately by any boy or girl without using wrench or screwdriver. In regular punching members the throat depth from front to back is 2 inches but a special throat depth adjustable to 8 inches can be provided when desired. As regularly supplied with

Tatum Punches, the standard

No. 201 Standard Punching Member

holders will accommodate any of the 16 stock sizes of round hole punches and dies from No. Y, diameter 13 inc. When special punching members or attachments for open hole or

Tatum Adjustable Paper Punches-Continued

special shapes are wanted with a machine there will be a deduction of \$7.50 each for the standard round hole punch not taken in the regular equipment of the machine. The most distinctive feature of these punches is, that in this member both the punch and die are securely mounted in a single casting or holder in such a way that their perfect alignment is assured under all conditions. This obviates tedious if not impossible adjustment necessary when the punch and die are separately mounted and it insures at once a correct fit and perfect punching surface, and avoids the possibility of chipping the die. Combination punching members are made for special requirements such as punching two or more holes at fixed distances from each other for loose-leaf ledgers, etc. These punches are mounted in a gang in a single casting that insures them against the slightest variation, no matter how, when or where the member may be used. Write for calalogue showing these special combination punches in gangs.

Rosback Die Cutting Press

For Cutting Labels, Stickers, Letters, Special Forms, Etc.

The entire frame is cast in one piece, is perfectly rigid and is guaranteed to be the strongest and most powerful machine of its size on the market. Will work dies up to 11×13 inches. The stroke is $1\frac{1}{2}$ inches and is adjustable to the thickness of a tissue paper.

The Head can be thrown down by hand to try the depth, without removing the belt or any danger whatever of the clutch catching. This is an improvement that will be greatly appreciated by the users of machines of this kind.

This machine is operated by a clutch pulley with a positive stop on the up stroke, or will run continuously as desired. Automatic feed can be attached to this machine for the feeding of strips from rolls and is adjustable from ½ inch up to 3 inches. Stroke 1½ inches, throat 7½ inches up 8½ inches back from center, pulley 32×5 inches, shipping weight 350 pounds.

S. & T. Punch Presses

No. 216 S. & T. Punch Press, with Table

Will punch holes to 151/2 inches apart on any length of sheet

Has heavy oak table with drawer and heavy cast-iron legs. Drawer has removable pan to catch the chips and storage space for extra punch heads. Metal parts handsomely finished in nickel and enamel. All machines have adjustable side and back stops and graduated scale. Sold without punches. Punch prices given on next page.

No. 216 S. & T. Punch Press, without Table. Punches holes to 15% inches apart

The No. 216 S. & T. Punch Press, without table is identically the same machine as shown in the cut with table. The machine has treadle rod threaded at lower end to provide 4 inches of adjustment in length and is adapted for mounting on any substantial table 32 to 36 inches in height. Rods of special length furnished when ordered without extra charge. Has adjustable side and back stops and graduated scale for setting punches. Occupies 18 × 20 inches. Punches not included. Punch prices given on next page.

No. 217 S. & T. Punch Press, foot power, without table, price without punch heads \$50 00

No. 214 S. & T. Punch Press, Hand Power. Punches holes to 13½ inches apart, any length sheet

The No. 214 machine is well adapted for all office uses, being small, compact and low in price and capable of a range of work hitherto unknown in a machine of this class. Any of the punch heads provided for the large presses may be used in this machine.

All punch heads are interchangeable and may be used in either No. 214 or No. 216 presses. Has adjustable side and back stops and graduated scale for setting punches. Machine occupies 15 × 17 inches.

Punch Heads

This construction of punch head is entirely new and is designed for the greatest convenience in punching a large range of round-hole work. It admits of five changes in size of hole; two heads may be spaced any distance apart up to the width of the machines.

The cut shows the five punches in their positions. In operation but one punch is used in each head. To change the size of hole remove the punch and insert in its proper place one of the other punches. The lower dies do not have to be removed. No. 5 A has five punches of the

following diameters: $\frac{1}{8}$, $\frac{7}{18}$, $\frac{7}{18}$, $\frac{1}{4}$ and $\frac{2}{8}$ -inch.

Style D Punch Head is a single round-hole punch head with deep throat. It will admit 14 inch of paper and punch hole a maximum of 17s inch from edge of sheet. Fitted with any size punch up to % inch in diameter. Heads with larger punch than % inch will cost extra. Style D head is adapted for use on machines provided with adjustable back-stop.

Combination Shoot-Board and Type-High Machine

This machine will take blocks of ten inches wide and any length. The carriage or guide frame for plane being moveable from side to side while operating, blocks of the full width of the bed can be shaved at one locking. The cuts or plates are laid face downward on the bed, locked, and then shaved until the knife or file cuts no more, when they will be even typehigh. If blocks are too low lay sheets of paper or cards below them to raise high enough for shaving, and afterwards glue these sheets to bottom

For trimming slugs, rules or furniture (wood or metal of any size) cutting miters and squaring the sides of blocks, the guide frame is taken off and the plane used upon the side of the bed. It can be used as a bench vise, being

Three machines in one-Combination Shoot-Board Type-High Planer, Shaver and Miter Cutter

handy for holding blocks when you want to take off or put on an electrotype plate. For warped blocks, the plates should be taken off, both top and bottom shaved and the plate remounted.

Complete with two planes (one file plain, one knife plain)	\$35 00
Extra files each	0 75
Extra knives each	0.75

American Lead and Rule Cutter No. 20

Recent improvements make the American Lead and Rule Cutter the best machine on the market for cutting linotype slugs. In the new model it is impossible for the Front or Lower Gauge to slip or be forced out of position in cutting heavy slugs or rules. The accurate register of the gauges is absolutely maintained. The novel method of adjusting and locking the gauges, together with several other im-

provements, met with the immediate approval of leading printers everywhere, and today the American Lead and Rule Cutters are generally conceded to be by far the best cutters made, not in one point, but in all points. To begin with, the gauges can be set instantly, effecting a very material saving in time. They are locked automatically, there being no screws to change from one hole to another, etc. They cannot possibly slip, are accurate, and, what is more, are guaranteed to remain so. The flaring notches in the gauge rods are engaged by four teeth of corresponding taper, which, in turn, are held

firmly in position by a strong spring. These teeth seat on their sides and do not touch at the bottom, which renders them self-centering and also compensates for wear, it being obvious that any wear in the teeth will merely permit them to mesh the deeper. The grooved bed makes it impossible for thin material to get under the gauge.

The construction of the Front Gauge makes it not only possible but easy to gauge extremely short measures with unequaled speed and precision.

American Lead and Rule Cutter No. 30

The Micrometer or Point Gauge which comes with the American Lead and Rule Cutter No. 30 Cutter only, can be set quickly and accurately from one nonpareil to forty-five picas by points. This is a decided

convenience in cutting odd or very short pieces; for instance, when in need of a few additional spaces for some odd body such as 14 or 20 point, they can be cut quickly and accurately with the aid of this device.

The Bed and Gauge Rods are graduated to picas and numbered every five ems, the back rod to indicate the measure when reversed and extended beyond the end of the bed. The cutting mechanism is unsurpassed, being operated by a compound lever with double link connection and provided with a straight cut for leads, and a shear

cut for brass. A rigid guide prevents the knives springing from their work. The support avoids any sag in the material between the front gauge and the knives. In cutting short pieces it may be swung back out of the way. The extra foot at the left end of the bed serves to steady the machine if placed on an uneven surface.

American Lead and Rule Cutter No. 30 gauges to 105 picas, by nonpareils. \$12 00

This is a good serviceable machine particularly adapted to small offices and for cutting odd lengths. The gauges are graduated to Picas and numbered every five ems. The bed-gauge is reversible and is graduated and numbered so as to show the measure in both positions. This gauge is held as in a vice by means of a compression screw. The front gauge is held with the customary thumb-screw.

No. 10 graduated to Picas. Capacity 84 ems.

American Lead and Rule Cutter No. 1

The American Lead and Rule Cutter No. 1 is a good and serviceable machine, particularly adapted for small offices and for cutting odd lengths. The bed gauge is reversible, and is clamped quickly and securely by means of a compression thumb screw. This cutter also has the grooved bed, which with the flanges on the gauge head, preclude the possibility of thin material getting under the gauge. Capacity of bed gauge 14 inches. Capacity of front gauge 6 inches.

Handy Lead Cutter

Will cut leads and slugs six points thick, and although not recommended as a rule cutter, will cut two-point brass rule. Has back and front gauges. Leads can be cut very rapidly and easily on this cutter by holding the lever and the handhold on frame in right hand, as in using hand shears. To get the best results this cutter should be screwed to bench or table.

Chandler & Price Lead and Rule Cutter

The bed and gauge are graduated to Picas

The bed is nearly vertical and the lead or rule drops against the gauge edge by gravity, assuring a square cut.

Hercules Steel-Rule Cutter

This machine is made especially to cut steel cutting, creasing and scoring rule, and is the most powerful cutter ever built. It will cut 6 point tempered steel rule and heavy brass rule and slugs like cheese, and leave no burr edge. It is especially adapted for the use of paper-box makers, label printers, paper novelty manufacturers, and all who cut tempered steel rule or heavy brass rule and slugs. The

knives are extra hard and seldom require sharpening. They are set into a slot which exactly fits them so that no adjustment is necessary. Can be taken off and put on quickly. The front gauge will allow a cut of 6½ inches, and the back gauge, which is twenty-five inches in length is graduated to Picas and half-Picas.

Patent Upright Miter Machine

A strong, well-built, accurate machine. The cutting or shaving head has a positive up-and-down motion, and must cut as much at the bottom as at the top, as it cannot slip. The knife is regulated by set-screw. The sliding gauge is the best of its kind, enabling the operator to feed the rule up to the knife, but affords a positive check at the point where the desired length is reached. The bed is graduated, and is made movable, so that the whole cutting-edge of knife can be used. This machine is mounted in a strong, shallow, wooden box, which catches the shavings, and has at the front end an emery board on which the burr of the rules may be rubbed off.

Chandler & Price Mitering Machine

Miters brass or metal rule to any desired angle. Is easy and rapid in its operation. The knife is finely tempered and can easily be removed and sharpened.

Chandler & Price Mitering Machine \$15 00

Hopkins Plate Cutter

Cuts plates and all kinds of matter—bases, brass rule, slugs, furniture, etc. from any thickness to type-high—quicker, neater and easier than by any other method. Saw blades duplicated for 25c. Throw away the jack-knife, saw and miter-box and stop scolding when you make up plates. In successful use in newspaper and job offices throughout the United States. It is a convenience in every job printing office. It is a necessity in all newspaper offices where stereotype plates are used. Weight 10 pounds.

Improved Horton Mailer

Has no equal says the Ladies Home Journal

The American Type Founders Company has had the general agency for the Horton Mailers during nearly ten years, and in that time almost two thousand machines have been sold. Some of the largest publishing houses in the country—like the Curtis Publishing Company of Philadelphis—after testing all the leading mailing machines on the market, are now using the Horton Mailers exclusively, as they have been found to do the best and most rapid work. The Horton Mailers have been improved until they are as perfectly constructed and durable as it is possible to make them.

Bates Machine Company Numbering Machines Model No. 27 for General Job Work

More than 20,000 in use

Size, 1½ × 15 inches

View showing parts detached for cleansing

A type-high, automatic Numbering Machine, designed to be locked in the chase with the form, wholly surrounded by type matter or used separately to print number only. Figures are automatically advanced consecutively 1 to 99999. Quickly taken apart for cleansing without removing any screws. Figures are cut on steel wheels. Only the size and style of figures shown under cut are carried in stock, others being made to order at an extra charge. Price of Model 27, each.

Secretary Numbering - Letters engraved upon extra plungage or steel slides may precede the figures.

Serial Numbering.—Letters engraved upon extra plungers or steel slides may precede the figures, instead of the prefix "No." Letter wheels are also furnished.

Numbering Backward—All models are made to number backward (to avoid turning the sheets or reversing them afterward) without extra charge, but they must be specially made to order.

Special Work—Machines will be made to repeat any number of times and then advance automatically, or to skip as many numbers as required at each impression. Special numbering mechanism for rotary printing machines of any size or speed. Quotations upon request.

Nº 29

Model No. 29 for Numbering Cash Sale Books

Same construction as Model No. 27 but designed to number consecutively from 1 to 50 or from 1 to 100, and upon reaching the limit of its capacity, it automatically changes to 1 and repeats, without re-setting. "O" is usually made to represent 100, thus requiring but two wheels—a serviceable construction which is recommended. Same machines for numbering backward if desired. The most durable machine for this purpose ever produced. Size, 2 Wheels, $1_{10}^{2} \times \frac{7}{8}$ inches; 3 Wheels, $1_{10}^{2} \times \frac{7}{8}$ inches;

Model No. 29 is also made with figures of Models No. 27 and No. 32 without extra charge. Size, $1_{\frac{1}{8}} \times \frac{7}{8}$ inches.

Model No. 31 for Numbering Baggage Checks, Cotton Tags, Lottery Tickets, Pawn Tickets, etc.

An automatic machine made with any size figures from one quarter inch to one inch in height. The design and construction is the same as Model No. 27. All of these machines are more than type-high, but are used with entire success on ordinary printing presses by mortising the bed or re-adjusting the platen. In mortising the bed (which need not weaken the press in any way) the machinist fits an iron block which is inserted and the mortise closed, when it is desired to use the press for regular work. The numbering is far superior to that of any hand or paging machine, and by working several machines to a form the cost is reduced to a minimum or entirely eliminated. Size of machine with 6 wheels, % inch figures, 3 inches long, 2 inches wide, 1% inches high.

Prices quoted on application.

(67890)

1115

Model No. 32 for Printing Waiter Numbers on Restaurant Checks, Etc.

12345

Model No. 33 for Dating Church Collection Envelopes, Transfer Tickets, Etc.

AUG 22 1902 A type-high dating machine designed to be locked in a form. Steel wheels are engraved with dates for twenty years, and set by hand as required, without unlocking the form. Size 1½ × ½ inch. Price of Model 33, each \$10 00

Model No. 39 for Ticket Printing and Special Job Work

Designed for strip tickets where the numbering is placed upon the end of the ticket running cross wise. Made with five, six or more wheels. Plunger can be placed above or below the figures as required. Prices quoted upon application.

Model Nos. 40 and 41 for Special Job Work

Designed for such work as may require special large figures. Frequently used for cash sales books, baggage checks and tickets of all kinds. The figures in this Model are as high as can be made in a type-high machine, but more extended figures can be had if desired. The figures shown in the illustration are stock machines

Model No. 41. 6 wheels . \$30 00 Model No. 40, 5 wheels 27 00 123456

Model No. 51, a Numbering Machine for Special Work

View, showing a section of a frame with a plunger and two numbering heads

Adapted for numbering bond coupons, tickets, trading stamps and similar forms of work where there is no room for plungers. Works on job or cylinder presses. No special attachments of any kind. Quickly adjustable in any part of the frame without removing it from the chase. If required, frames can be so constructed that the machines can be taken out of the frames without unlocking the chase. Frames are

operated by plungers at each end.

Frames made any length, from 6 to 24 inches, operating from 1 to 20 numbering heads. Numbering heads made with any number of wheels and with any style of figures desired. Prices upon application.

Models No. 45 and No. 46, Typographic Perforating Machines

How it is Used - Designed to be locked in the form separately, when there is no printing or numbering to be done, or imposed together with typographic numbering machines and entirely surrounded with type matter.

No Tympan Attachments—No attachments of any kind are necessary on the tympan, and the strength of the tympan remains practically unimpaired.

Bates Typographic Perforating Machines

The Construction—The driving head—Model No. 46—consists of a metal block, (70 × 92 points) in which the plunger and a powerful main spring are mounted. The case containing the perforating blade—Model No. 45—(18 points) is easily assembled to the driver. The blades are made in uniform lengths of two and three inches and all of them in line are interlocked and operated by one driving head which may be so located in the form that the plunger driving the mechanism strikes the tympan beyond the margin of the stock to be perforated.

The Operation—This plunger, when at rest, is above "type-high" and as the impression is made, its depression raises the perforating blade or blades to a position in which the cutters are slightly more than "type-high."

Tool-Steel Cutters—The cutters are made of toolsteel, carefully hardened and tempered, and every part of the machine is made upon the interchangeable system.

Scoring—Creasing or scoring blades may be quickly substituted for perforating blades and used in the same cases with the same driving head.

Any Press—It may be successfully operated upon either platen or cylinder presses, but upon the latter it is designed to perforate in line or parallel with the cylinder only.

Model No. 45 Perforating Blades, 3 inch Sections		8 OO
Model No. 45 Perforating Blades, 2 inch Sections		5 00
Model No. 46 Driving Head		4 00
Scoring Blades, (2 inches or 3 inches, interchangeable with Perfors	ating Blades)	2 50

Model No. 50 with Indicator

A Departure—This Model embodies the highest achievements in the art of Numbering Machine construction.

Every Part of Steel—All metal parts are made of steel, including the wheels contributing rigidity and strength with minimum weight.

Blue Steel Frame—The frame is most substantial, being made of drawn steel ¼-inch thick and is beautifully finished and blued.

Self-Inking—The figures are automatically inked before each impression, from a thick felt pad. The pad holder may be instantly removed from the machine for reinking.

Gauge—An accurate steel gauge plate assures printing precisely upon a line.

The Proposition—This little Machine has been designed to meet the popular demand for a very moderately priced Automatic Numbering Machine of durable construction, capable of accurate work.

Automatic—Can be set for either consecutive, duplicate or repeat numbering. Capacity 1 to 999999.

Gauge—An accurate gauge-plate assures printing precisely upon a line.

Letters and Fractions—Machines with letters for serial numbering—either preceding or following the figure-wheels—fraction wheels and wheels engraved with any characters required, will be made to order. Wheels with ten letters or

"Nickel-Bronze" Wheels—The figure wheels are made of a tough composition metal, having wearing qualities of guaranteed excellence.

123456

Model No. 49 Price \$5 00

123456

Consecutive, Duplicate and Repeat—It is only necessary to move the Indicator until the word representing the class of numbering desired appears in the window of the front plate.

Letters and Fractions—Machines with letters for serial numbering, either preceding or following the figure wheels, fraction wheels and wheels engraved with any characters required will be made to order.

Wheels with ten letters or less, each \$2 00
Wheels with seven fractions or less, each 2 50

Each special wheel reduces the numerical capacity, as it takes the place of a figure wheel.

Stock Machines are made with six wheels and one style of figures only. See fac-simile impression under cut.

Stock Machines are made with six wheels and one style of figures only. See fac-simile impression under cut.

Special Movements for Models 49 and 50

The standard machine is made to number consecutively in duplicate and to repeat continuously. Machines will be made to order which will triplicate, quadruplicate or repeat any number of times up to ten and then advance one unit automatically. Such movements take the place of the usual duplicating mechanism. Extra charge \$100.

Record and Copying Inks for Models No. 40 and No. 50

Specially prepared Numbering Machine Ink is furnished in red, blue and black record.

1 ounce bottles, each			\$0	50

No. 13 "Force" Typo Numberer

The mechanism of the No. 13 "Force" Typo Numberer enables the machine to be made in the most compact form for size of figure and number of wheels, having a single bearing self-locking plunger, avoiding friction and spring pressure on rotation of wheels.

The plunger is made of solid pieces of steel with direct action to operate numbering wheels, which takes the place of the complicated movable plates that contain the serial letter or number. The single bearing plungers are interchangeable (Fig. 2) and supplied with No. or any character engraved or blank if required.

The new No. 13 will work in conjunction with any Typograph Numbering Machine now in use and can be made to a minimum size of 1½ * ¼ inches. Any size of figure and capacity for numbering can be supplied. The mechanism of the No. 13 "Force" Typo Numberer enables the machine to be made in

Wetter Numbering Machines

Wetter Model 125. Actual size 3/8 x 11/2 inches; consecutively numbers from 1 up to 99999. Prints figures like this impression.

\mathcal{N}_{2} 12345

Model 125-5 Wheel, List Price . \$14 00

Model 125

The Standard Model for General Job Work

Locks up in any form like a small cut, can be used on any job or cylinder press; prints clean, sharply-defined figures; is small and compact enough to allow type matter to be set close to the figures, and it will number automatically at each impression of the press, from 1 up to 99999 with accuracy and precision.

Superior Construction

All Wetter machines have large non-breaking plunger springs; are made of the best materials and all working parts are hardened and tempered and every machine guaranteed. All parts interchangeable.

The Steel Figure Wheels

On Wetter machines are finished flat on the face; figures are cut deep and true to size.

The Low Plunger is one of the improvements of the New Model Wetter and permits of working this machine on any make of cylinder or job press, also allows the rollers to ink all figures perfectly; a positive advantage, especially during cold weather when rollers are hard.

Removal "No." Slide—The prefix "No." on all Wetter Machines can be removed and another letter for serially numbering, or any character inserted in its place without removing the machine from the press. This can be done in a moment and is a positive advantage over other machines.

Plunger Can Be Locked so that any number can be printed any number of times and this can be done without removing machine from press. This is a distinctive feature of the Wetter.

All Wetter machines are equipped with an italic "No." to precede figures. Also a blank slide to be used when only the figures are desired to print. We will furnish without extra charge a gothic or Roman "No." slide in place of the italic, if mentioned when ordering.

All our Houses carry in stock Models 125 and 126

Any Wetter Machine can be made on special order, with the plunger on the reverse end or at any distance from the figures desired, for any special work. Or any style machine can be made to number backward or figures cut reverse for numbering on tissue paper; skipping wheels can be furnished to skip any number from 1 to 10, and other special combinations for numbering checks, bonds, coupons, baggage checks, etc., where there are more than one on a page. We issue a special circular giving full Wetter Machines can also be made to print one number any number of times, and then autoparticulars. matically advance to the next higher number.

Some of the Wetter Standard Models

Model 185, for dating Church Envelopes, etc. Numbers consecutively 1 to 99999 and prints date, Jan. 23. 1906. The dating wheels are non-automatic and must be turned by hand.

Genesee Slitter for Cylinder Presses

The Genesee cuts while sheet is held by grippers. Knife and slot in band are beveled to fit exact. Will not throw sheet out of register. Can be adjusted to cut on any part of form. Does not interfere with running of press. When not in use, knife can be thrown back out of way instantly. Will not shear off at ends, but makes a clean true cut. Can be attached to any cylinder press. Full instructions sent with each Slitter.

Genesee Slitter, complete

The Slitting Band is made of specially tempered steel of the best quality obtainable.

The Springs are double re-enforced so as to amply provide for keeping the tension exact.

The Special Spring Knuckle Joint which we use to hold the knife keeps a uniform pressure at all times on the cutting edge.

The Gauge being part of the knuckle joint, is absolutely rigid at all times and adjusts the band to a hairs breadth in perfect alignment. It also, when necessary, will cut the blanket if decided to sink the band for very fine work.

The Solid Steel Bar supporting cutter is made of the best machine steel and will stand any strain. Wing nuts at each end of bar-compact, easily adjusted and removed.

Extra care has been taken in the tempering of the knives to give them a hard, sharp cutting edge that is durable and will last longer than others designed for a like purpose.

No bulky, cumbersome piece of machinery but a clean, compact up-to-date machine that does per-

fect work and a valuable addition to any press.

Rouse Job Stick

Rouse Job Stick

The Rouse Job Stick is a mechanically perfect Composing Stick for quick adjustment to Picas or Nonpareils. It has several novel features, the most important perhaps, being the method of adjustment. This is accomplished by means of a series of regular holes (a full Pica from center to center) in the rear wall of the stick, with a steel rack will often the kines to engage them. By turning a small lever located under the clamp, a half revolution, the rack is moved exactly six points and automatically locked in position, thereby effects and improved clamp that extends clear into the corner where most needed. The Stick is graduated to Picas and numbered every five ems. The measures are correct, and owing to our perfect methods of manufacture the perforations are absolutely uniform, the only possible variation being in the knee. As every one of these is fitted to a hardened steel standard of known accuracy, this difference is scarcely perceptible.

Perfect News Sticks

These Sticks are made for setting one measure only, either 13 or 131/2 ems Pica, and prevent all the annoyances due to variations in Sticks set incorrectly by careless compositors. It is undoubtedly the best Stick made for news measures.

Style No. 1 is made of best malleable iron; the handle and underside are japanned, so that the Stick cannot rust; the pan

10 20 35

. \$1 50

itself is milled out, the sides being absolutely square and rigid, and altogether the Stick is as perfect as could be desired. Made one depth-21/2 inches only, and for 13 or 131/2 ems Pica

Style No. 2 is made of the best of steel, and the set bar or knee is rivited firmly to bottom and back of stick. It is accurate in every respect.

These Sticks are made for 13 or 131/2 ems Pica measure, and are 21/4 inches deep.

Gauge Pins and Guides - of Numbers held

See explanation of	I/IIIIDels nelow
Original Steel Gauge Pins Nos. 1, 2, 3, 4 per dozen	
Gauge Pin Drawers (see illustration at bottom of page	each

Explanation of Numbers

No. 1 gauges are 12 points high with lip theinch long; No. 2, 15 points high, theinch lip; No. 3, 18 points high, theinch lip; No. 4, 12 points high, short lip; No. 5, 15 points high, theinch lip; No. 6, 12 points high, theinch lip. All gauges with tongues are 12 points high.

Golden Steel Gauge Pin

Original Steel Gauge Pin

Spring Tongue Gauge Pin

This is the most satisfactory pin made. It meets almost every requirement of the pressman.

Flexible Side Gauge Pin

May be placed directly under the gripper where it comes down upon the tympan. The sheets are fed to the curved spring arm.
The pin is made of fine thin steel, and having teeth, is ad-

Flexible Side Gauge Pin justable and prevents the sheets slipping under.

Extension Feed Guides

The cut shows the method of securing the guides between platen and platen bail, so that shee may be fed below the lower edge of the platen.

Perfect Register Gauge Pin

Pastes on like a quad, has a thin steel clip which strikes into tympan and prevents sheets from slipping under gauges, and is adjustable after pasting on.

Screw Adjusting Gauge Pin

The prong should be inserted a quarter inch below the feeding line and forced snugly home. The base may be secured to the tympan with paste or glue if desired. The adjustment is got by means of the screw and nut with absolute precision and without weakening the hold of the pin to tympan.

Cylinder Side Guide

Secured to feed-board by the sharp point shown in outline in cut, which is placed at the side

Gauge Pin Drawer

Screws on under the feed-board

Gripper Fingers and Cross-Bar

Adjustable between the Grippers of any size Platen

Fingers and cross bar are instantly attachable to and adjustable upon any press gripper. Gripper fingers are made in three styles: Marginal; 1/8-inch between lines.
1/8-inch between lines.

Acme Plate Cleaning Brush

This is the only brush that will thoroughly clean a half-tone plate. They are made of fine spun specially prepared metal and are designed for cleaning halftones and can also be safely used for cleaning electrotypes and stereotypes. When a process plate reaches the printer it is generally filled with the refuse of previous

with the refuse of previous washings and these it is imposwashings and these it is impossible to remove with the ordinary bristle brush. A single brush will do very satisfactory work, but the best results are gained by use of two brushes, one to use in cleaning the cut with benezine and the other to use on the cut dry.

Acme Plate Cleaning Brush No. 3

Acme Plate Cleaning Brush No. 3

Acme Plate Cleaning Brush No. 3

The No. 1 Brush is ¾ of an inch wide by 5½ inches long.
The No. 3 Brush is 2½ inches long.
The No. 3 Brush is 2½ inches long.
The No. 3 Brush is 2½ inches long.

Directions for Use—Use the first Brush exactly as you would a bristle brush. When cleaning a half-tone plate rub the Brush the way the screen runs. In cleaning a plate of any kind pour the benzine over the plate. If cleaning a dry form pour the benzine on the brush in the usual way. After the cut has become thoroughly dry use the second brush, being careful to brush the cut in the same direction as the screen.

No. 2, weight 5 ounces, each \$2 25

Press Points

For inserting in wood furniture when sheets are printed for folding machine. Points are screwed into wood with wrench as far as cross pin will allow, when they will be found to be correct height.

Dillingham Press Punch

Is secured to the tympan of platen presses in same manner as a feed guide and punches clean hole in card or paper simultaneously with the printing on jobs which have a margin of one inch or more. The method of working this punch is clearly shown in accompanying halftone. The slightly curved

tity curved spring is placed under the upper tympan sheet and the sheet to be punched is fed over this curved spring and under the punch with no more trouble than in feeding to gauge pins. The punch is secured to the tympan by paste or glue or (better still) by a mixture of paste and glue. Two or more punches can be used on one sheet. Punching and printing can be done simultaneously on a variety of work, such as window cards, programmes, orders of dance, souvenirs, etc. Made with three size holes, Nos. 1, 2 and 3, as per diagram. No. 3 will be sent unless otherwise ordered.

Bullock Ejector Press Punch

One or more may be locked in a type form and will cut a clean, round hole 1/4, 1/3 or 1/4 inch in paper or card stock at the same time the job is printed. This punch will not clog as each piece cut is automatically thrown out by the ejector as soon as the impression is released and falls on the floor. The ejector also protects the rollers from any danger of injury from the cutter.

Prices for Bullock Ejector Press Punches

Tympan Gauge Square

for pins as shown in cut.

This is how it is used

The lines on the square are purposely made light so as not to obscure the impression beneath. Saves
time and secures accuracy.

Lieb Label Cutting Gauge

This is the only satisfactory gauge for cutting narrow strips on paper cutters. The sections are made of brass, and they are kept in an upright position by means of springs placed between each link. Even paper cutters having interlocking back gauge and clamp cannot handle all classes of work without the addition of a label gauge, and there is no other gauge on the market that will handle the class of work as accurately as our Lieb Gauge. They can be supplied in any length desired, but minimum charge is for gauge of ten links.

American Lettering Pallet

handsomely finished. Has capacity for a line full 41/2 inches long. Its adjustment is governed by thumb-screws centering the line with one operation from either end. It is an indispensable tool for every bookbinder and is acknowledged to be the best made Pallet on the market.

American Lettering Pallet . . . \$6 00

Brass Type

The American Type Founders Company makes the best assortment of Brass Type, reproducing in brass many of its Type designs that are best adapted for the purpose. Send to our nearest House for our complete and modern specimen book of Brass Types, Ornaments and Borders.

Wesel Patent High Steel Quoin

The design of this Quoin is such as to effectually overcome all tendency to rise or loosen in the form even on the longest runs. It is made of steel, $\frac{1}{2}$ -inch high and is rabbeted along the bottom. The effect of this rabbet is to release the pressure at the foot and to grip the matter firmly and evenly at the top. Will be found of exceptional value on work where a permanent lock-up is absolutely imperative.

Wesel Patent High Steel Quoins are made M-inch high. The No. 1 is 4 inches long, is %-inch wide when closed, and 1 inch wide when spread. The No. 2 Quoin is 3 inches long, %-inch wide when closed, and %-inch wide when open. Ordinary Hempel Keys fit the two sizes. They are made in rights and lefts, and are milled accurately to size.

Wesel Patent All-Brass Riveted Galleys

The corners are dovetailed together by our patented method. It is impossible to force them apart without breaking the heavy brass side. The sides are solidly riveted to the bottoms; and the bottoms, which are of standard thickness, are of specially drawn brass. Wesel Galley Bottoms are made absolutely accurate and flat. The sides and back are grooved to give a firm hold for the fingers and hands in lifting.

Wesel Patent Brass-Lined Galleys

The most substantial and carefully made Brass-Lined Galley. The brass lining is secured to the wood rim and the lining is perfectly smooth inside. A substantial wide wooden rim is used and this is reenforced at the head by a long strip of brass. These Galleys are also made half-lined, or with plain wood rim.

1135

Clark Patent All-Brass Dumping Galley

For newspaper work. Saves labor of emptying tabular matter, advertisements with borders or set in a number of irregular measures, and prevents all danger of pieing. Has a flexible, tapering end, exact width of the column. The matter is secured for proving by our Patent Foot Clamp; the flexible end is inserted between the column rules, the sides resting on the column rules, and the matter shoved off safely. Made any width desired, from one column to full width of page.

				12 inc	hes long	21 inches long							
Columns Width				With Scale	Without Scale	With Scale	Without Scale						
1				\$4 50	\$3 25	\$5 75	\$4 50						
2				5 50	4 25	6 75	5 50						
8				6 50	5 25	7 75	6 50						
4				7 50	6 25	8 75	7 50						
5				8 50	7 25	9 75	8 50						

For each additional column in width add \$1 00 to price list. A 12-inch galley takes 8-inch matter; 21-inch, 17-inch matter. Price for galleys 25 inches long, taking 21-inch matter, add \$1 00 to prices of 21-inch galleys. In ordering give width of column and column rules, and state whether galley is wanted with or without scale, which, unless otherwise ordered, is made 14 agate lines to the inch.

Patent All-Brass Linotype Galley

This new Patent Galley is made solely for linotypes, and is the only Galley for holding linotype slugs without any side lock-up. A foot clamp is attached to each galley to hold up the matter in taking proofs. This galley will save all the trouble and the loss of time in handling side sticks, getting quoins to fit, or foot slugs to keep the end line from falling over. One side of the galley is made lower, and the inside of the rims so tapered as to allow inserting and taking out the linotype slugs from the sides very readily. The galley being only one-half of an inch wider than the matter, is conveniently handled and can be placed on the stone, rack or case without taking up valuable space. On a crowded composing table, in the rush of making up the saving of space is of great importance.

Other sizes made to order Above prices include foot clamp

In ordering give the measure of column width as Galleys are supplied to take one measure only, not exceeding 15 ems; also send a sample linotype slug.

Lincoln All-Brass Galleys

Shows the Galley locked at end and side

A good Galley for newspaper work. Made to order to hold any regular widths of matter in regular use in an office. The upper side or rim of Galley is strongly hinged to the bottom. This hinged side is dropped when emptying on Galley and when matter is ready for locking-up the side is raised and is held by a spring catch at head of Galley and by the end clamp which locks the sides and end at the same operation. The catch is loosened by turning lever to the right. These Galleys are about one inch wider than the width of column they are made to take.

12-inch not exceeding 15 ems Pica wide . . \$2 00 24-inch not exceeding 15 ems Pica wide . . . \$3 00 16-inch not exceeding 15 ems Pica wide 3 50 24-inch long by 25 ems Pica wide 3 50

Prices include foot clamp. In ordering give exact width of columns

1

Challenge Riveted Zinc Galleys

Designed for general use—particularly for storage purposes where it is desirable to keep the forms on the Galleys while taking proofs and correcting. The corners are square where the sides attach to the

bottom, thus insuring perfect proofs of type forms. The material used is Compressed Plate Zinc, especially made for this purpose. The sides of Challenge Riveted Zinc Galleys are formed in the shape known as "channel," thus making the galleys stiff, rigid and true, also making them very easy to lift from the stone when filled with type. Write for net prices.

Distributing Galley

The Galley is held by means of leather loops on the back through which the little finger and thumb are thrust. A label on the back of each Galley explains it.

It is made of pieces of hard wood, firmly grooved together and will stand a lot of wear and tear. It is held in the left hand when in use.

Challenge Patent Galley Stop

A simple device that will efficiently do what it is intended for. It is a narrow strip of steel curved so that it can be compressed on the same principle as a spiral coil spring, the ends are held against the side of the galley while the side of the strip holds the type or linotype very firmly and securely wherever placed. The illustration shows the way it is used. It is pronounced a great convenience to linotype men, printers and make-up men. For galleys up to double column in width.

Challenge Patent Galley Stop, per dozen \$1 20

Hill & Webb Galley Lock

A very useful patented device, made of flexible steel, adjusting itself to a width from %-inch to 2 inches giving a firm and safe lock-up, easily tightened or loosened with the fingers. Adjusts itself to straight or beveled side-sticks. It is durable and does not strain the galleys.

Laing Patent Galley Lock-Up

Attachable to all Brass, Smooth Lined and Patent Lined Galleys

A satisfactory, simple, effective lock-up. It may be screwed on any galley; the side stick (which is not beveled) is attached to the lock-up, and has a parallel motion. It is locked or unlocked by pushing the lever up or down by means of a finger knob. The lock-up and the side stick are made of brass.

Patent Linotype Brush Machine

For removing burs from linotype slugs. A very necessary machine in offices that do first class linotype work, and in all cases where matrices or electrotype moulds are taken of the linotype slugs. The table for holding the galleys is pivoted on the pedestal and is moveable so that the brush can be made to pass over the slugs at any angle. There is a shield receiver to catch the burs as they are detached by the brush which prevents them from scattering. Two brushes are furnished, one 4-inch and one 7-inch; also a set of fast and loose pulleys. The speed of the brush and pulley should be 300 revolutions per minute.

Price with one 4-inch and one 7-inch brush, and set of pulleys on machine

Com-

Ingot Casting Apparatus

This Ingot Casting Apparatus should be in every linotype office. By its aid the reduction of scrap metal into ingots is obtained in the shortest possible time and at the least expense. The top part of the frame which holds the pans or moulds is cast in one piece and is firmly bolted to heavy iron uprights. Each mould contains two pans, one on each side, and the moulds are made to work in unison by means of gears. Style C is made up of two of these double pans. There is a space between the pans to allow the free circulation of air and to assist cooling the pans and contents. Its capacity is 48 ingots. The water cooling attachment is made up of two special pairs of moulds having water chambers between the pans, the inlet being through the shafts at the crank ends of the moulds and the outlet at the gear ends. The style C Apparatus with water cooling attachment will permit the casting of ingots as fast as the ordinary workman can pour the metal with a hand ladle.

Style B is the same as style C excepting that its capacity is double, there being provision for casting 96 ingots.

The water cooling attachment on this style is made in such a manner as to permit the use of each pair of moulds separately, the machine having two separate connections for the inlet and outlet of water.

The single pan mould has compartments for casting 12 ingots at a time, and was designed for use in

offices having but one linotype machine.

Apparatus Style C is 32 × 25 inches over all; Style B, 30 × 46 inches over all; both are 30 inches high from floor to top of moulds. The All-Iron Truck for Style C is 13 × 18 inches inside at top; for Style B, 18 × 32 ½ inches inside at top.

Linotype Furnaces

These Furnaces are made of sheet steel, are lined with asbestos, have extra heavy iron pots and the frames are perforated top and bottom to create a draft and admit air to the burner. It is designed in such a manner as to secure even heat over its entire surface, and in connection with the air mixer to guarantee the most perfect combustion. The design of this burner has reduced the consumption of gas materially below that consumed by the old style furnace using from four to eleven individual burners. Each furnace has a cover, a pipe connecting the pot with the main flue to carry off all flumes from the metal, and a length of flue pipe in which there is a damper.

Make-Up Tables

These are made in three different styles. The Regular Hard Wood Table designed for use in smaller offices, where not subjected to a heavy strain and rough usage.

The Extra Heavy Hardwood Table—very strongly made of the best seasoned hard wood. The sides and ends are strongly bolted to the legs at the top and at the shelf near the bottom. Put together so that it effectually resists the strain occasioned by the rough usage usually accorded it in going to and from the stereotyping room.

stereotyping room.

stereotyping room.

They are mounted on double revolving casters. The wheels are set into a revolving bearing which works on a swivel having a roller bearing against the stationary part on the end of the leg. This allows the table to be easily moved in any direction desirable, and adds much to the life of the structure.

All-Iron Make-Up Tables—these are practically indestructible. The frame is made throughout of heavy wrought-iron piping accurately fitted. It is adequately braced both at the top and bottom of all four sides. The top is bolted directly to the iron frame, which also increases its strength. The shelf is made of sheet iron and is firmly clamped to the lower braces.

The table is set on patent double revolving casters of the same description as those used on the extra heavy hard wood frame tables.

Brass-covered tops consist of a sheet of brass about 10 points in thickness, screwed to the regular iron top.

Beating Tables

The frames of these Tables are made of heavy hardwood, the rails being let into the posts and firmly glued and bolted. The elevating top rests upon two machine cut racks, each rack fitting into a heavy cast iron slide which keeps it in a perfectly perpendicular position. Two cut pinions actuate the slide, they in turn being operated by means of a worm gear and being mounted on a heavy steel shaft set into boxes, which are part of the slides which hold the racks. The worm gear is driven by a crank, which takes very slight effort to raise or lower the top. The iron top is finished perfectly flat and true and is free from all imperfections. When the top is at its lowest position it is 33¼ inches from the floor, and when at its maximum height it is 44½ inches from the floor. The table is mounted upon extra heavy double revolving casters, which makes it easy to handle. It is the best and strongest Beating Table it is possible to make.

^{*}The measurement is the sum of the outside length and width of a Block added together

Mahogany and Iron Patent Stereotype Blocks

Important-Read Before Ordering

New, Old and Boston Style—When made regularly, these blocks are %-inch larger each way than size of back of plate, or %-inch larger each way than size of period matter. The hook, ratchet gutter and clasp brass occupy a space of 9-16 inch, including necessary allowance for taking plate on or off freely, and the two bevels on plate are 3-16 inch wide, or %-inch in all. The block will take on a plate %-inch smaller each way than the largest plate, back dimensions, when the slot in which hook moves is 1 inch, and the smallest plate the block will take is 1¼ inches smaller than size of block over all.

Blocks for Narrow Margins—There are instances where it is impossible to get the desired margins or regularly made blocks. In such instances we can reduce the widths of hooks, ratchets and gutters, or increase the variation between largest and smallest plates by lengthening the slots in which hooks move, as conditions allow. Whenever margins are apparently too scant, our long experience will usually enable us to overcome the dfficulty. In some cases we make a small special charge for such special work. When the slot in which hook moves is made longer than 1 inch on new style blocks it requires longer pinions and 2½ cents per hook is added to the list price of each ¼-inch longer than 1 inch.

Patent Ruled Blocks—The largest plate taken on is 1 inch smaller each way (back dimensions) than outside measurements of block, and the smallest plate (back dimensions) is 2½ inches smaller than outside measurement to list price, and for each hook less deduct 25 cents. For each additional ¼-inch added to slot sdd 2½ cents to list price. All blocks are made ¾-inch thick unless otherwise ordered.

For each extra hook and pinion add 50 cents to list, and for each hook less deduct 25 cents from list. Rule Blocks—Prices for blocks with brass rule borders will be quoted on application.

For each extra hook and pinion add 50 cents to list, and for each hook less deduct 25 cents from list. Rule Blocks—Prices for blocks with brass rule bord

^{*} The measurement is the sum of the outside length and width of a Block added together

Challenge Sectional Blocks

The Expansion System of Printers Blocks

This is a perfectly co-ordinated system of mounts for printing from standard electrotype plates of any size.

The system consists of Register Hooks, each one of the various kinds being designed for a specific purpose, with forms made up of Sectional Bases, either of metal, cast iron or steel, made .759 of an inch high, micro-ground, made on the Point System in regular Pica sizes. In these forms the Register Hooks are placed in any desired position. The height of these bases, with the thickness of the standard electrotype plate .152 of an inch make a perfect printing surface, substantially type high. The Bases are absolutely rigid and accurate and the Register Hooks enable the printer to remove plates quickly for change or make-ready, register them accurately in color work or other fine printing and overcome the mushiness so common in heavy plates mounted on wood.

For color work these blocks are indispensable. The Register Hooks are placed on all sides of the plates; by the use of the key the clutch on one side is released and the one opposite is tightened, the plate being easily moved the smallest fraction of an inch. Each plate can thus be registered independent and with ease.

For book work the Register Hooks are placed on two sides of the plate, front and bottom of page usually, and brass catches opposite them, the Register Hooks being used to fasten and release the plates and the catches to keep them in the same position as one form follows another.

The Challenge System was among the first, if not the very first, that was made for the register of the three color plates and has stood the test for twenty years use. The narrow margin Register Hooks of this System are founded on basic patents.

All Register Hooks are 6×6 ems Pica in size except the Pony Narrow Margin which is 6×7 ems Pica, and being a Ratchet Hook requires a gutter. They are made from one piece of solid brass, the screw, clutch and all other parts are made of tempered steel. They have special openings for cleaning and are finely made and strictly first-class in construction.

The following detailed descriptions and illustrations will give a clear idea of the wide range of this System and enables the printer to select an equipment that will meet his wants. Point System throughout.

Challenge Steel Sectional Blocks

The Challenge Steel Sections may be considered as the basis of this System; they are very light and rigid, micro-ground and full forms of these for large presses can be easily handled. They are made in three sizes, 2×6, 2×8 and 8×8 ems Pica and lined to Pica ems.

Challenge Cast Iron Sectional Blocks

These Blocks are made in fifteen sizes from 4×6 to 16×32 ems Pica, Pica lined. They are microground, will not dent, are light, rigid and accurate and with care will last a life time.

Challenge Metal Sectional Blocks

These are made of hard metal and are an accurate and reliable Block for a small amount of money. They are somewhat heavier than the steel and cast iron. With proper care will prove an entirely satisfactory equipment.

Pony Narrow Margin Hook

This Hook is especially designed for book printing. It is operated with a ratchet and therefore very rapid. A gutter is necessary where this is used. The size of this Hook is $6 \, ^{\circ} 7$ ems Pica.

Challenge Sectional Blocks

Little Giant Register Hook

In this Hook the screw head is stationary and the clutch moves the full run of the slot. This is a very simple, strong, accurate and durable Hook. It is actuated by a key and is capable of making the most accurate register.

The Quickest Register Hook

Is made on the same principles as the Little Giant, but is much more rapid in its action, one movement of the key entirely releasing the plate. This is very generally used as a companion Hook for book work where the System is partly used in color work and partly on book work.

The Eureka Register Hook

This is the original Hook in which the operating mechanism follows the clutch and the principle is fully protected by patents. The Eureka allows plates to be brought within one-fourth of an inch of each other, and one plate can be made to follow the other without interfering with the operating mechanism. It is the standard Hook for color printers.

The Eureka Swivel Register Hook

This is the Eureka Hook placed in 8×8 solid steel base and is used for registering irregular plates as it can be moved at any angle desired.

The Kyle Register Hook

This Hook is made on the same general principle as the Eureka, but the clutch is at the side of the moving mechanism and therefore plates can be brought together with only the thickness of the clutch between them, one-sixth of an inch. It is the Hook allowing the closest margins of any Hook made.

This cut shows the way all Challenge Register Hooks are open at bottom. This leaves a space entirely through the hook. Steam or hot water can be forced through this opening and the hook thoroughly cleaned without dismantling. Saves a great deal of time and the Hook will last much longer when properly taken care of.

Warnock Sectional Register Blocks

The needs of plate (electrotype) printing and halftone and three-color work have led to the devising of many forms of patent base. These may be divided into three general classes: the wooden page block for letterpress edition printing, the sectional block of metal or iron to be assembled into pages or forms and the iron base covering the bed of the press. The last two meet the impression requirements of heavy forms of halftones and the special register needs of three-color work.

A recent invention offers much to the printer who uses patent base and is interested in the economical production of his work. It is the Warnock Sectional Register Block and an investigation of its workings

Fig. 1-Top view of Block

Fig. 2-Inverted Block

show how many advantages are to be gained by its use. Although the block only is referred to in the title, the hook and other devices for holding the plate in position are from the labor-saving point of view perhaps the more important part of the invention.

Fig. 1-Push hook 8 ems long

Fig. 4-Pull hook 8 ems long

Number of Blocks Required to Make 32 Pages of the Following Sizes

	384	Units	8 × 8	ems	make	32	pages	4	×	514	outside	measure	ment
	480	Units	8 × 8	ems	make	32	pages	4	×	6%	outside	measure	ment
	768	Units	8 × 8	ems	make	32	pages	51/4	×	8	outside	measure	ment
	896	Units	8 × 8	ems	make	32	pages	5¼	×	914	outside	measure	ment
1	280	Units	8 × 8	ems	make	32	Dages	65%	×	10%	outside	measure	ment

All these pages may be equipped with register hooks on all four sides or with a solid brass catch. In ordering state clearly whether you wish to make-up pages or fill

the bed of press, and if in pages state whether brasses or pull-hooks are to be used. If plate brasses are to be used 96 will be required and only 96 push-hooks are necessary.

Cut to measure, 4 to 61/2 ems pica.		03	5
Labor saving fonts, 5, 10 or 25 lbs .		0 2	5

Challenge Metal Tie-Up Slugs are grooved on one side so they can be placed around the type pages when being locked up without removing the string. This will save many a page from being pied when it is needed. It will save all the time usually consumed in removing the string and consequently will save the time required for putting string around the form when it is again taken from the chase.

Roller Composition

	we recommend the use of the best compositions only	
Standard per lb Durable per lb	Gem for Northwest per lb	

Steel Roller Supporters

The best bearers yet devised for job presses. They only take up a quarter of an inch of the inside space of a chase, ease the pressure of the rollers on the form, prevent over-inking, equalize impression and save the rollers from cutting, as they are %-inch wide on top.

Paper Counter

To make ready for use in pad work, count out number of sheets wanted by hand on top of which place the plate, then draw the stab up firmly against the paper. The screw in handle holds the stab in place. To operate, place plate on top of lot to be counted and push stab into paper bearing down at same time.

Tablet Knife

Made especially for separating pads; extra thin and strong

Cott's Improved Tablet Holder and Clamp

For straightening up and clamping sheets of paper while being glued for tablets. Will hold any quantity up to 3000 sheets of paper and any size from $2\frac{1}{2} \times 2\frac{1}{2}$ to $8\frac{1}{2} \times 14$ inches.

With additional clamps and larger press boards almost any size of work can easily be handled.

Accommodates all sizes of commercial stationery and admits of their being glued on one or both sides.

Offices doing a good sized business should always order one or more extra clamps and set of boards.

Tablet holder and clamp with set of five press boards		. \$3 25
Extra clamp and five press boards \$1 60	Extra clamp without press boards	. 1 25

Arabol Sphinx Paste for Printers

The ideal Paste for the press room. Keeps soft and free from mould. No risk of lumps getting into the packing or overlays and battering the type. It does not swell the packing nor wrinkle the paper.

Paste for Binders—Try Arabol White Size. Nothing better. Keeps in any climate. Put up in pails or barrels. Any quantity sent from factory on order. Write for prices.

These Chases are Unexcelled for Accuracy, Squareness and Strength

The material used to make these Chases is Bessemer steel, which will stand a much greater strain than ordinary iron. They are milled inside after the Chase is welded by a special milling machine, insuring accuracy not obtained by any other method. These Chases are accurate and square and are guaranteed against breaking or springing.

Important—In ordering Chases mistakes will be avoided by observing the following instructions: Give outside measurements.

Where Chase or Chases are to fit press give actual size of bed. An allowance of ¼ inch will be made in length of Chases.

If Chases are to be made from other than regular stock, state size desired.

If side sticks are ordered state whether they are to be straight or beveled, and give length of forms if other than standard newspaper-size.

^{*}Width of cross bars, 1 inch. Thickness of bars, % inch.

To Estimate Price of Poster Chase, Sizes not Listed

Add length and breadth in inches together to obtain measure. Multiply this measure by 11 cents. For price of News or Poster Chase with bar, add \$2 00 to list of Poster Chase without bar. Minimum price of Poster Chase, \$4 50.

For extra bar only, add \$1 00. For extra pair dovetails, add \$1 00.

Measurements ending in fractions to be figured as next full figure. For example: 17x20% in.=37% inches, figure 38 inches; 33½x45% inches=79% inches, figure 80 inches; 29%x40% inches=69% inches, figure 70 inches.

Charges for Extra Stock

For each A in. wider than regular, add for measurement (length and breadth) 40 ins. and sr	naller \$0 20
For each 18 in. wider than regular, add for measurement (length and breadth) 41 to 60 ins. ir	icl 0 30
For each 18 in. wider than regular, add for measurement (length and breadth) 61 to 80 ins. in	ncl 0 45
For each is in. wider than regular, add for measurement (length and breadth) 81 to 100 ins.	incl. 0 60
For each 1/2 in. wider than regular, add for measurement (length and breadth) 101 and large	r 0 75
For i in. thick stock, add for measurement (length and breadth) 40 ins. and smaller	0 60
For i in. thick stock, add for measurement (length and breadth) 41 to 60 ins. inclusive .	1 00
For ‡ in. thick stock, add for measurement (length and breadth) 61 to 80 ins. inclusive	. 1 40
For I in. thick stock, add for measurement (length and breadth) 81 to 100 ins. inclusive	180
For ? in. thick stock, add for measurement (length and breadth) 101 and larger	2 20
For extra width and \$\frac{1}{2}\$ inch thick stock, add both of the above advanced changes. [w]	

Heading Chases

Estimate Price of Heading Chase, Size not Listed, Same as Poster Chase

Minimum price of Heading Chase without bar \$4 50.

For bar and pair of dovetails, add \$2 00.

Unless otherwise ordered, cross-bar Heading Chases will be furnished.

Figure extra stock same as in Poster Chases.

See Poster list for figuring measurements ending in fractions.

Iron Side and Foot Sticks

Side sticks are made, unless otherwise ordered ¼ inch longer than the standard length of form and foot sticks are made ¼ inch shorter than standard width of form. If larger than six point column rules are used, or columns wider than 13 ems pica, allowance will have to be made. [w]

Stereotype Chases

These Stereotype Chases are exactly type high and are made perfectly square and true, being in use in leading metropolitan daily newspaper offices. The side lock-up screw is attached to the side stick with a collar in such a manner as to enable the operator to lock up and unlock the form with the wrench, moving the side stick backward and forward instantly, thus saving much time and avoiding the use of individual quoins, and insuring also a safe and reliable lock-up.

McGreal Combination Printer's Chase

Patented

Composed of four pieces with female beveled dovetails on one end and male beveled dovetails on the other end of each piece and when fitted together is rigid and firm. They are made from the finest grade of cold-drawn steel, one and one-half inches wide by fiveeighths of an inch thick, all parts interchangeable, accurately fitted at the joints, absolutely square and can be put together and taken apart in a few seconds without hammering or pounding. They will resist one-third more pressure without "giving" than the old wrought-iron chase. The lengths of pieces vary every two inches.

The Combination Printer's Chase can always make the chase a proper size for the form, giving a perfect lock-up in the minimum of time and avoiding the working up invariably caused by a "springy" form,

Useful Information for Printers How to Estimate

To ascertain the quantity of body type required for a publication, find the number of square inches and divide the same by four, and the quotient will be the approximate weight of type required; but, as it is impossible to set the cases entirely clear, it is necessary to add 25 per cent to the weight of large fonts and 33½ per cent to small fonts, to allow for dead letter.

How to Order Sorts

In ordering sorts always inclose a metal cap H and lower case m of the type you wish to match and plainly state the quantity of each character required. Be sure and inclose sample before sealing envelope inclosing order. Better put sample in a small envelope. Order every article by the exact name and number given in the specimen book. Variations from the book names frequently cause error and delay. Do not mutilate a specimen book. It does not help us to receive printed specimens taken from our specimen books. It nordering, write each item on a separate line. Orders written in long paragraphs invite error. Separate the order from the accompanying letter. It will save time. It will save time.

Type Standards

The following is the standard adopted by the International Typographical Union. The basis of measurement is the lower-case alphabet, from a to z inclusive, and the ems used are the same body as the type measured:

				EMS		EMIS
114	Point .			. 18	8 Point	. 14
5	Point .	Ü		. 17	9 Point	. 13
51/2	Point .			. 16	10 Point	. 13
6	Point .			. 15	11 Point	
7	Point .			. 14	12 Point	. 16

American Point System

The following table gives the names of the old bodies and their new designation by points:

	es and then	
31/2	Point	Brilliant
41/2	Point	Diamond
5	Point	Pearl
	Point	
6	Point	Nonpareil

Imposition of Forms

HINTS ON IMPOSITION: A Hand-book for Printers. By T. B. Williams. Leather, 90 pp.
1.00 For sale at all Branches of the American Type Founders Company, and recommended to all who desire the fullest information concerning the imposition of forms.

The make-up should learn to use measuring rule or tape measure and dividers. They are more convenient to measure with than paper, and their use is regarded as evidence of knowledge of the imposition of book forms. The dividers will enable the make-up to verify his measurements quickly. Printers' dividers cost 85 cents.

dividers cost 85 cents.

Ascertain what furniture will be required for the margins of a book form before placing it upon the stone. Time will be saved, and the work will have the appearance of order and neatness.

After a book form is imposed, tighten the quoins, and ascertain by means of a straightedge or square if the pages are of equal length and the head lines or bottom folios are exactly in line. The folios are usually the guides for hand-folding and should receive great attention, otherwise the binder will not secure good register. For the same reason, folios should all be set exactly in the middle of the width of the page.

After a book form has been locked up, it should be tested for squareness with a square. Forms are liable to get twisted or bowed in locking up, especially if the chase is weak. This defect can usually be remedied by loosening the quoins on one side and tightening them on the opposite side.

Margine

The proper allowances for head and back margins depend on judgment and preference to a great degree. The head and foot margins of a trimmed book are usually of equal proportions, but, as the binder will almost invariably find it necessary to cut off more paper from the foot than from the head, the make-up must make sufficient allowance for this extra trim.

When the pages have running heads one-third or less shorter than the width of the page, one-half of the space occupied by the running heads one-third or less shorter than the width of the page, one-half of its used over a page, the head margin is to be calculated from the top line of the page.

The make-up must know whether a book is to be wire-stitched through the back or sewed through the fold. If wire-stitched through the back, an extra allowance additional to the back margin required must be made a little in excess of the space used by the wire. This space varies according to thickness of the book, but is rarely less than three-sixteenths of an inch on each side of the back margin, or three-eighths of an inch in the back gutters.

In forms of 32 pages or more it is advisable, where it is possible, to impose the pages so that the sheat may be cut and folded in signatures of half the number of pages, especially when the paper is heavy; but if the form is imposed to fold as one complete signature then it is advisable to deduct enough from the back margin of the inner sections to equal the extra space taken up by the fold of the outside sections. In imposing forms of 12 or 24 pages, great care must be taken to get the foot and head margins of the inset to be folded in exactly right, and the head and foot margins in such forms should be as evenly divided as possible. More accurate register is obtained when the inset is cut off and folded separately.

Testing Margins

After the proper head and back margins have been decided on, and the pages arranged to conform to them, the form should be tested to ascertain if the foot and front margins are correct. The method is illustrated in the accompanying diagram of a section of a 16-page form. Fold a sheet to quarter of the size of the untrimmed paper to be used. The distance from the foot of page 16 to the foot of page 10 must agree with the length of the quarter sheet (as indicated by the dotted line), and the distance from the back edge of page 7 to the back edge of page 11 must correspond with the width of the quarter sheet. This test can be made just as well by using a measuring rule or tape, in which case, if the quarter sheet were twelve inches wide by eighteen inches long, the distance from the front edge of page 12 to the foot of page 7 to the foot of page 1 must be exactly teighteen inches.

Gripper Margins

As applied to book forms, the space between the type and the outer edge of the chase at the gripper side is the gripper margin. A gauge showing the gripper margin of each press should be obtained from the pressman. When the paper is placed in its correct position on the type form, the distance between the edge of the paper and the edge of chase should be at least half an inch less than the gripper margin, to permit the pressman to move his form into a suitable place. To make a proper allowance for gripper margin, it is often neccessary to place more furniture in the foot margins on the side of the long cross-bar next the gripper than on the other side. The long cross-bar next the gripper than on the other side. The lowest folio of a form should be placed next the gripper edge.

Correct Imposition of Lengthwise Cuts and Tables

The correct rule is that lengthwise tables and cuts shall always read from the foot of page. When a lengthwise cut or table is on one page and the explanatory or descriptive matter on the opposite page, then the cut or table should, if possible, be placed on the page with the even folio

Tests of Correct Imposition

As a general rule, except where for convenience in folding, certain forms are imposed from the center, the lowest (first) folio of a form is placed on the lower left-hand corner. All odd folios are always at the left-hand of the make-up, as viewed from the foot.

The odd and even folios of pages which are side by side in a correctly imposed regular form will, when added together, form a total of one more than the number of pages in a signature. The first and last pages of a signature are always placed side by side—as, for instance, in a 16-page form, where folios 1 and 16 equal seventeen.

Press Points

These are used in forms that are imposed for books, the sections of which are folded by machines. In 16-page forms these points are usually placed exactly 15 inches apart—7½ inches each way from the center of the first fold. The sheets are fed into the folding machine by the point holes to insure register, and the points should be placed exactly in accordance with the instructions of the bookbinder.

Price List of Printing and Binding

A Guide for Charging

*Compiled by David Ramaley, St. Paul, Minn. Copyrighted by David Ramaley, 1904

All the tables and prices are calculated on the bases of FIFTY PER CENT ADVANCE ON THE COST of everything that goes into a complete job of printing. Absolute cost means the price paid for paper stock, inks and labor, and not any part of the wages paid to managers, solicitors or any other expense. The general expense is equal to at least twenty per cent of the output, and may be safely rated at twenty-five per cent, which would leave twelve and one-half per cent profit on these prices. If circumstances are such that the prices of labor and stock are greater than these figures, the employing printer must advance prices by adding a proper percentage. If lower, and competition is sharp, he can reduce prices by a regular discount, not to exceed ten per cent.

*The Employing Printers' Price List, 1904, seventh edition, from which these figures are compiled, can be purchased from the author direct, or from any branch of the American Type Founders Company. 112 pp., cloth binding, for one dollar.

Safe Basis on Which to do a Profitable Business

Adapted from the Code of Ethics of the United Typothetæ of America.

The expense of doing business, such as the wear and tear of material, interest on money invested, bad debts, rents, taxes, insurance, book-keeping, and all other items of expense, should be ever before our eyes, and we should never forget that these must be as surely levied on each particular job as its

our eyes, and we should never forget that these must be as substantially contained as a substantial labor costs.

Always have the courage to ask for a fair remuneration for any work offered, resting assured that it will be more profitable to be without a job than to secure one in which there is a temptation to resort to questionable methods in order to avoid a financial loss in its execution.

A master printer should always contend that he is entitled, when asked for an estimate, to know the names of all who are to be requested to bid on the work. He should also insist upon his right, if he desires it, to know all the prices offered for the work and to whom and what price it was awarded.

A master printer should not make estimates for work that he cannot do. It is always unsafe and often unjust to give prices upon a class of work upon which the cost is not positively known and has to be guessed at.

Estimates calling for detailed specifications of separate value of the paper, composition, electrotyping, presswork, ruling, binding, etc., should always be refused.

Explanatory

The prices under the several divisions of each list, such as "100," "250," "1,000," include all regular charges for labor and material to the customer unless otherwise stated, and when there is a variable factor in such prices the amount estimated for such variable factor is quoted, so that the printer can readily adjust the price in accordance with the conditions governing the work.

We figure hand composition at \$1.00 per 1,000 in all work, including locking up or making up, and at 90c per hour for time work. Machine composition, 80c per 1,000.

Paper is included in these prices at an average advance of 50 per cent on cost, unless otherwise stated; but this includes storage, handling, wastage and cutting—items that are never paid for if the printer only adds 10 or 15 per cent to the cost of paper.

Composition

To be figured at \$1.00 per 1,000 ems, and time work 90c an hour.

Alterations to be figured separately from composition, and charged at the hour rate.

Open Advertising Matter on newspapers or programmes to be measured as 8 Point.

Standing Type, 1c per square inch per month.

Presswork

The value of presswork is a difficult problem, because there are so many different grades of work. The prices in the following tables represent the value of good work. Since the introduction of plated papers and halftone work rates may not be large enough for the best service, but on the average of work in an office the figures ought to be considered as fair and reasonable. The figures under the 100 column practically represent the make-ready.

Flat Papers	00 250	500	1000	ADDED 100
Double medium	2 00 \$2 30	\$ 2 75	\$ 3 60	\$0 18

Quarter medium jobbers		2 00	2 60	0 13

Halftone cuts, if more than four to a form, charge 25 cents each for all over four.

Bronze work, double presswork.

Basis for Figuring Value of Paper

The basis for figuring the value of paper will be 50 per cent on the cost price. This price is to include the proportionate cost of general expense and handling in every way—the opening, cutting, and repacking and waste.

Unless there is a special determination by the customer as to the quality of papers, figures will be based on grades of book and writing papers as follows:

Print paper, 28, c, to be figured at 41/2	Tub sized, 11c, to be figured at
Colored print, 4c, to be figured at 6	Water marked, 13c, to be figured at 20
Common book, 4c, to be figured at 6	Linen, 14c, to be figured at
S. & C. book, 4½c, to be figured at 7	Fine Linen, 16c, to be figured at
S. & S. C. book, 5c, to be figured at 71/2	Superfine Linen, 18c, to be figured at
Plated book, 8c, to be figured at	Pure Linen, 21c, to be figured at
Manilla, 4^3 ic, to be figured at $6^{1/2}$	Crane's Linens, 24c, to be figured at 35
Engine sized, 7c, to be figured at	

Printer's Value of 1,000 Sheets Paper of the Weight Designated at Top of Column

The basis for figuring the value of paper is 50 per cent on the cost price

	IO POINT	8 POINT	7 POINT	6 POINT
In orders of 10000-4 forms	\$15 40	\$16 25	\$16 96	\$18 00

The question of gain by duplicating forms and using a larger press is uncertain when examined critically. With four forms you use a pony and reduce time 2^{1} hours—worth at least \$2.50. On an eighth medium, 10 hours time—worth \$5.00, and deducting cost of plates, \$2.00, leaves only 50c difference between the two forms of working and extra wear of type.

Printing front and back, add for composition only.

24-lb stock will add for paper for each 1000 copies—on 8c paper, 12c; 10c paper, 15c; 12c paper, 19c; 14c paper, 21c; 16c paper, 25c; 18c paper, 28c; 20c paper, 31c.

Folded Letter Circulars

Using half sheet demy or folio. The figures are started on 12 point and \$2.25 for each page of composition. The value of a full page of 10 point is \$3.25; 8 point, \$5.00: 7 point, \$6.60 and of 6 point, \$9.00.

The difference in value of composition becomes an important factor in fixing prices on 3 and 4-page circulars and ought always to be determined by the value of composition on the above basis of measurement.

One page, 20-lb stock, 10c paper	100	802	500	1000 AE	ODED 1000

The above figures include folding which is worth 20c for each 1000 folds
For 2 colors charge \$1.00 for each color except black for washup, and 50 cents for each page of color
form makeup, and the presswork scale above for the added number of impression.
For less than 250 copies deduct from the price the rate per 100 in the last column of figures.
Figure on 10c paper and 20-lb stock, unless requested otherwise.

Card Scale

The card scale on this page agrees approximately with the card scales issued by various dealers in cardboard. There is no standard scale. Printers should procure the card scale of the dealers who supply them with cards. The "Convenient Card Scale and Table of Prices" compiled by Mr. C. F. Pedrick and copyrighted and issued to the trade by Irwin N. Megargee & Co., dealers in cards, 12 South Sixth street, Philadelphia, will save printers a great deal of time and insure accuracy in estimating. This valuable scale shows at a glance: (1) Cost per 1000 cards of any size after being cut from any kind or quality of board ranging in list price from \$1.00 to \$15.00 per 100 sheets 22 × 28 inches; (2) Which way of the sheet a card of any size will cut to the best advantage; (3) Number of sheets of 22 × 28 inches cardboard required to cut 1000 cards of any size. This scale is printed on a large sheet of bond paper in two colors and applicants for it should inclose ten cents in postage stamps.

left-hand corner (B); and the number of cards procurable from a sheet may be ascertained by multiplying the shortwise and longwise numbers. Example: The figures in Roman after the dash indicate the number of cards that can be cut from one piece of cardboard, measuring from the lower right-hand corner The italic figures outside the scale indicate the number of cuts to a sheet for any size of card not exceeding the size of scale, measuring from the upper If a card measures from B longwise to 8 and from B shortwise to 8 the number of cards procurable from one full-sized sheet of 22 × 28 inch card will be 64. of the scale (A)

Business Cards

The sizes and figures given for business cards such as 11—91, 64c., stand for 11 full sheets each cutting 91 cards and the value, including cutting of 1000 of such cards, is 64 cents. On the general rule that all the prices given in these tables have a margin of profit the stock figures represent an addition to the cost of 50 per cent.

Round-corner cards will add 30c for each 1000 added to the foregoing figures.

For cheap entertainment cards use \$1.50 scale. For business cards use the \$4.00 scale unless specially requested for another grade.

In colored ink add 50c to the gross price for any number under 1000 and 10c for added 1000. For two forms, two colors, add \$1.00 to the gross price; presswork scale for second form.

Cards backed with another form on cheap grades add \$1.00 and print both sides at once. On grades \$3.00 and over make separate presswork and charge 50c and presswork scale to gross price.

The finer grades of business cards should be rated somewhat higher than common grades on account of the extra care in composition and presswork.

Above prices to govern professional cards.

In colored ink add 50c to the gross price for any number under 1000 and 10c for added 1000. For two forms, two colors, add \$1.00 to the gross price; presswork scale for second form of 75c for 250 and 6c for added 100s.

Cards backed with another form on cheap grades add \$1.00 and print both sides at once. On grades on this page make separate presswork and charge 50c and presswork scale of 75c for 250 and 6c for added 100s.

In colored ink add \$2.00 for any number under 5000. Over 5000 add for colored ink 40c per 1000

Bill Heads

The usual sizes of stock-ruled bill heads are 6s, 4s, 3s and 2s of flat cap. The prices given are for ruled papers, costing the printer the prices named at the rate per lb. If special ruling is required the full expense of ruling must be added to the figures because the grade of paper used would represent the value without ruling.

Monthly Statements

Stock-ruled statements are generally made from 20-lb or 24-lb folio and have various designations. The regular size, 8s of folio, is $5^{1/2} \times 8^{1/2}$ inches; square statements, 12s of folio, $5^{2}_{3} \times 5^{1/2}$ inches; yankee statements, 12s of folio, $3^{1/2} \times 8^{1/2}$ inches; infant statements, 16s of folio, $4^{1/4} \times 5^{1/2}$ inches; and gem statements, 18s of folio, $3^{1/3} \times 5^{1/3}$ inches.

Use 12c paper and 20-lb stock unless specially requested to furnish some other grade

Letter Heads

Usually printed on quarter-sheet folio the grades of paper differ very materially, but with the designation of cost values of the stock the figures cover all the grades from a cheap writing to a first-class linen paper. The prices are maximum and may be adjusted by a uniform discount. One-fourth off prices given here will bring most jobs to about the cost value.

Blank Books

In handling blank books, printers should abandon quire figuring of 80 pages, and substitute 100 pages. Half binding may be either tight or loose smooth back, with paper or cloth sides and leather corners, usually colored leather.

Three-quarter binding is first-class in every respect as to stock, usually russia back and corners, finished with raised cords or hubs and cloth sides.

Full end and band binding and extra russia ends and bands, full gilt back, are well-known to the trade and need not be described. The figures here submitted are for the best of their class as to binding.

Books of 400 pages-5 quires	BINDING	QUARTER	E. & B.	RUSSIA
Ledgers, journals and blank books—paper \$5.00; ruling \$2.45	\$11 20	\$11 95	\$13 95	\$15 95
Added books in same order	9 25	10 00	12 00	14 00
Added 100 pages	1 60	1 60	1 60	1 60
Books with printed headings-ruling \$3.00; composition \$4.00;				
presswork \$2.00	17 85	18 60	20 60	22 60
Added books in same order	9 55	10 30	12 30	14 30
Added 100 pages	1 75	1 75	1 75	1 75
Books with full-page printing-ruling \$3.50; composition				
\$9.00; presswork \$3.00	24 35	25 10	27 10	29 10
Added books in same order	9 65	10 40	12 40	14 40
Added 100 pages	1 85	1 85	1 85	1 85

If two pages are printed full, add \$3.00 to each book.

Omitting border on full-page printed books will take off \$3.50 from first book and 50 cents from additional books.

For less number of pages, use the same figures as for additional 100 pages.

Index in front, add \$2.00 to each book, including paper. Index through, add \$2.00 to each book.

Canvas cover, add \$3.00. Patent back, \$2.00 extra.

Printed numbered lines down one page, add \$2.00 to first book, and if on both pages, add \$3.00 for first book.

All additions to be added to gross figures.

Double Demy 56-lb Weston or Brown

One book of 250	
The above former are not intended for books in large	mumbana juhana it maju ka daginakla ta aat un

The above figures are not intended for books in large numbers, where it may be desirable to set up or electrotype for a full sheet of paper, to save presswork.

Triplicates will add for perforating and numbering 60c for books of 1,000; 30c for books of 500, 50c for books of 250.

Printing on back of forms will add for the composition or plates of the whole size of the sheet and presswork scale.

Omitting numbers reduces price of each 1,000 forms 60c.

Differences in the cost of paper may be adjusted by tenths. Example: Quarter folio, 2 forms on a sheet, for 1,000 forms, paper at 10c, 95c. If at 12c, add 2-10 of 95c, making the paper value \$1.14 and adding 19c to the total value of the job for each 1,000 copies.

Numbering and Perforating

Consecutive numbering on cards,	checks, deposit certificates, etc.								
500 numbers	1,000 numbers \$ 0 50								
Over 1,000 numbers, 40c per 1,000.
